Why - Samantha Kleinberg

2015-11-16

Can drinking coffee help
people live longer? What
makes a stock's price go up?

Why did you get the flu? Causal

questions like these arise on a regular basis, but most people likely have not thought deeply about how to answer them. This book helps you think about causality in a structured way: What is a cause, what are causes good for, and what is compelling evidence of causality? Author Samantha Kleinberg shows you how to develop a set of tools for thinking more critically about causes. You'll learn how to question claims, identify causes, make decisions based on causal information, and verify causes through further tests. Whether it's figuring out what data you need, or understanding that the way you collect and prepare data affects the conclusions you can draw from it, *Why will help you sharpen your causal inference skills.*

Biometric System and Data Analysis - Ted Dunstone
2008-10-31

This book brings together aspects of statistics and machine learning to provide a comprehensive guide to evaluating, interpreting and

understanding biometric data. It naturally leads to topics including data mining and prediction to be examined in detail. The book places an emphasis on the various performance measures available for biometric systems, what they mean, and when they should and should not be applied. The evaluation techniques are presented rigorously, however they are always accompanied by intuitive explanations. This is important for the increased acceptance of biometrics among non-technical decision makers, and ultimately the general public.

[A Guide to Responsible Undersea Exploration](#) - Dominic Addario 2010-09-17

A Guide to Responsible Undersea Exploration (RUE) was written to help educate divers who may happen upon what they believe to be undiscovered treasure or artifacts. It is not just university-trained archeologists that make discoveries; it is everyday people like you that may happen across wondrous events that were hitherto lost in time. The proper documentation of your find gives it meaning and historical context. This book tells you how. The author arms you with the tools and knowledge to proceed into areas of the unknown where true explorers

may find themselves.

Clues in the Calico - Barbara Brackman 2009-05-01

In Clues in the Calico Barbara Brackman unveils a much-needed system for dating America's heirloom quilts. She tells how, by collecting and observing quilts and finally analyzing her computer file on close to 900 date-inscribed specimens, she arrived at the system. And through this telling she also imparts a colorful, stunningly illustrated history of quiltmaking along with a good bit of entertaining social history and the newest findings in textile research.

Analysis, Controllability and Optimization of Time-Discrete Systems and Dynamical Games - Werner Krabs 2012-12-06

Focuses on the analysis, optimization and controllability of time-discrete dynamical systems and games under the aspect of stability, controllability and (for games) cooperative and non-cooperative treatment. The investigation of stability is based on Lyapunov's method which is generalized to non-autonomous systems. Optimization and controllability of dynamical systems is treated, among others, with the aid of mapping theorems such as implicit function theorem and inverse mapping theorem. Dynamical games are treated

as cooperative and non-cooperative games and are used in order to deal with the problem of carbon dioxide reduction under economic aspects. The theoretical results are demonstrated by various applications.

Access with Attitude - David Marburger 2011-05-17

For those who find themselves in a battle for public records, Access with Attitude: An Advocate's Guide to Freedom of Information in Ohio is an indispensable weapon. First Amendment lawyer David Marburger and investigative journalist Karl Idsvoog have written a simply worded, practical guide on how to take full advantage of Ohio's so-called Sunshine Laws. Journalists, law firms, labor unions, private investigators, genealogists, realty companies, banks, insurers—anyone who regularly needs access to publicly held information—will find this comprehensive and contentious guide to be

invaluable. Marburger, who drafted many of the provisions that Ohio adopted in its open records law, and coauthor Idsvoog have been fighting for broader access to public records their entire careers. They offer field-tested tips on how to avoid “no,” and advise readers on legal strategies if their requests for information go unmet. Step by step, they show how to avoid delays and make the law work. Whether you’re a citizen, a nonprofit organization, journalist, or attorney going after public records, Access with Attitude is an essential resource.

Black Boy White School -

Brian F. Walker 2012-01-03

In a hard-hitting novel about fitting in—or not—Anthony “Ant” Jones gets transported from his East Cleveland hood to an almost all-white prep school and has to figure out where he belongs...before he loses himself entirely. Black Boy White School is a memorable debut that will appeal to fans of Walter Dean Myers and Sherman Alexie. Anthony has never been outside his rough neighborhood when he receives a scholarship to Belton Academy, an elite prep school in Maine. But at Belton things are far from perfect. Everyone calls him “Tony,” assumes he’s from Brooklyn, expects him to play basketball, and yet acts shocked when he fights back. As Anthony tries to adapt to a world that will never fully accept him, he’s in for a rude awakening: Home is becoming a place where he no longer belongs. In debut author Brian F. Walker’s honest and dynamic novel about staying true to yourself, Anthony might

find a way to survive at Belton, but what will it cost him?

The Shadow of Water -

Jacquelyn Benson 2021-04-01
A dangerous prophecy threatens Edwardian London... and it begins with a murder. Lily Albright can see the future, and it looks like hell. In an England on the brink of war, Lily is plagued by psychic visions of the cataclysmic destruction of London. An ancient prophecy is coming to fruition, and it starts with the gruesome discovery of a corpse in the sewers. To save her city, Lily must untangle a web of conspiracy and violence. She'll need the help of all of her fellow Charismatics—the men and women who know "the impossible things". That includes the enigmatic Lord Strangford, whose ability to see into the darkest corners of Lily's soul threatens to tear their relationship apart. From the gutters of the Limehouse to the champagne-soaked ballrooms of St. John's Wood, Lily races to expose a plot that

could bring the British empire to its knees. But changing fate and preventing an apocalypse will put Lily's charismatic powers to the ultimate test. Jacquelyn Benson continues The London Charismatics with another supernatural historical fantasy full of deadly mystery and arcane powers. Pick up The Shadow of Water and return to the dark, mystical streets of Edwardian England.

Intermediate

Microeconomics - Walter Nicholson 2008

Intermediate Microeconomics offers a clear and concise treatment of microeconomic principles in a useful pedagogic framework. The mathematical level is approachable and uses basic algebra with extensions to calculus where it helps the analysis. The book is also strongly applied in focus and shows the relevance of theory in the "real world". Whilst these features make the book approachable to students, the theoretical content and overall

learning experience is a rigorous one. In this adapted edition Peter Luke and Michael Wood have been brought in to adapt the text for the UK, European and South African market. Applications features in the book have been internationalised, and the European Social Model/US-UK model debate on the macroeconomy discussed at a micro level. This book is designed for students specifically studying economics at an undergraduate or postgraduate level such as MBA within the UK and EU in general, and South Africa. These students would be predominantly second-year students who have already taken an introductory course in microeconomics.
