2016-07-22

By now it's a given: if we're to help our ELLs and SELs access the rigorous demands of today's content standards, we must cultivate the "code" that drives school success: academic language. Look no further for assistance than this much-anticipated series from Ivannia Soto, in which she invites field authorities Jeff Zwiers, David and Yvonne Freeman, Margarita Calderon, and Noma LeMoine to share every teacher's need-to-know strategies on the four essential

components of academic language. The subject of this volume is grammar and syntax. With this book as your roadmap, you'll learn how to: Teach grammar in the context of students' speech and writing Use strategies such as sentence frames, passives, combining simple sentences into more complex sentences, and nominalization to create more complex noun phrases Assess academic language development through a four-step process Look inside and discover the tools you need to help students master more sophisticated and complex grammatical and syntactical structures right away. Better yet, read all four volumes in the series and put in place a start-to-finish instructional plan for closing the achievement gap.

Leading for Literacy - Ruth Schoenbach
2016-12-05

Clear, on-the-ground guidance for Reading Apprenticeship implementation *Leading for Literacy* provides tools and real-life examples to expand the benefits of a literacy approach that sparks students' engaged reading and thinking across disciplines, from middle school through community college. A companion to the landmark *Reading for Understanding*, this book guides teachers, leaders, and administrators through the nuts, bolts, benefits, and stumbling blocks of creating Reading Apprenticeship communities that extend a culture of literacy beyond individual classrooms. This book explains how to generate authentic buy-in from teachers

and administrators, use the Reading Apprenticeship Framework to turn reform overload into reform coherence, and create literacy teams, professional learning communities, and Reading Apprenticeship communities of practice that sustain an institutional focus on a student-centered, strengths-based culture of literacy. Key insights from Reading Apprenticeship practitioners across the country address how to get started, build momentum, assess progress, and build partnerships and networks across schools, districts, campuses, and regions. Persistently low levels of adolescent literacy continue to short-change students, contribute to discredited high school diplomas, and cause millions of students to drop out of high school and community college. Forty percent or more of community college students require remedial reading courses as college freshman. The researchers at WestEd's Strategic Literacy Initiative developed the Reading Apprenticeship

Framework to provide educators with a proven path to improving literacy for all students, and this book provides clear guidance on bringing the framework to life. How to integrate Reading Apprenticeship with existing reform efforts How to use formative assessment to promote teacher and student growth How to coach and empower teachers How to cultivate literacy leadership How to provide long-term support for a strong content-literacy program Nationwide classroom testing has shown Reading Apprenticeship to promote not only literacy and content knowledge, but also motivation and positive academic identity—leading to better student outcomes that reach beyond the classroom walls. Leading for Literacy lays out compelling ways to spread the benefits of Reading Apprenticeship, with practical guidance and real-world insight.

Literacy and Learning in the Content Areas - Sharon Kane 2017-07-05

The 3rd Edition of Literacy & Learning in the Content Areas helps readers build the knowledge, motivation, tools, and confidence they need as they integrate literacy into their middle and high school content area classrooms. Its unique approach to teaching content area literacy actively engages preservice and practicing teachers in reading and writing and the very activities that they will use to teach literacy to their own students in middle and high school classrooms. Rather than passively learning about strategies for incorporating content area literacy activities, readers get hands-on experience in such techniques as mapping/webbing, anticipation guides, booktalks, class websites, and journal writing and reflection. Readers also learn how to integrate children's and young adult literature,

primary sources, biographies, essays, poetry, and online content, communities, and websites into their classrooms. Each chapter offers concrete teaching examples and practical suggestions to help make literacy relevant to students' content area learning. Author Sharon Kane demonstrates how relevant reading, writing, speaking, listening, and visual learning activities can improve learning in content area subjects and at the same time help readers meet national content knowledge standards and benchmarks.

Context - Margarita Espino Calderón

By now it's a given: if we're to help our ELLs and SELs access the rigorous demands of today's content standards, we must cultivate the "code" that drives school success: academic language. Look no further for assistance than this much-anticipated series from Ivannia Soto, in which she invites field authorities Jeff Zwiers, David and Yvonne Freeman, Margarita Calderon, and Noma LeMoine to share every teacher's need-to-know strategies on the four essential components of academic language. strategies for teaching academic vocabulary, moving students from Tier 1 to Tiers 2 and 3 words and selecting appropriate words to teach Assess vocabulary growth as you go Our vocabulary instruction must come from the texts our ELLs and SELs are about to read, not from a set of activities that teach words in isolation. Handbook of Research in Second Language Teaching and Learning - Eli Hinkel

2016-11-18

Volume III of the Handbook of Research in Second Language Teaching and Learning, like Volumes I and II, is a comprehensive, state-of-the-art overview of current research into social contexts of second language (L2)/foreign language (FL) teaching and learning; language policy; curriculum; types of instruction;

incremental language skills such as listening, speaking, reading, writing, vocabulary, and grammar; international communication; pragmatics; assessment and testing. It differs from earlier volumes in its main purpose—to provide a more in-depth discussion and detailed focus on the development of the essential language skills required for any type of communication: speaking, listening, reading, vocabulary, grammar, and writing. Volume III preserves continuity with previous volumes in its coverage of all the classical areas of research in L2/FL teaching and learning and applied linguistics, but rather than offering a historical review of disciplinary traditions, it explores innovations and new directions of research, acknowledges the enormous complexity of teaching and learning the essential language abilities, and offers a diversity of perspectives. Chapter authors are all leading authorities in their disciplinary areas. What's new in Volume III? Updates the prominent areas of research,

including the sub-disciplines addressed in Volumes I and II, and represents the disciplinary mainstays. Considers and discusses perspectives held by different schools of thought on the what, the how, and the why of teaching foundational language skills, including theories, pedagogical principles, and their implementation in practice. Captures new and ongoing developments and trends in the key areas of L2/FL teaching and learning, and innovative research topics that have gained substantial recognition in current publications, including the role of corpora, technology, and digital literacy in L2/FL teaching and learning. Examines new trends in language pedagogy and research, such as an increased societal emphasis on teaching academic language for schooling, somewhat contradictory definitions of literacy, and the growing needs for instruction in intercultural communication.

Reading in Secondary Content Areas - Zhihui Fang 2008

What does it mean to teach reading in the context of the middle and high school classroom? Don't students already know how to read by the time they get to secondary school? And how can a busy teacher take time away from the packed curriculum of science, history, mathematics, or language arts to teach reading? This book presents a linguistic approach to teaching reading in different subjects; an approach that focuses on language itself. Central to this approach is a view that knowledge is constructed in and through language and that language changes with changes in knowledge.

As students move from elementary to secondary schools, they encounter specialized knowledge and engage in new contexts of learning in all subjects. This means that the language of secondary school learning is quite different from the language of the elementary years. While in the elementary years the subject matter of reading materials is often close to students' everyday life experiences, the curriculum of secondary school deals with knowledge that is removed from students' personal lives and everyday contexts. The language that constructs this more specialized knowledge thus tends to be more abstract, technical, information-laden, and hierarchically organized than the more familiar and "friendly" language that students typically encounter during the elementary years. Students need to develop specialized literacies (literacy relevant to each content area) as well as a critical literacy they can use across subject areas to engage with, reflect on, and assess specialized and advanced knowledge. This

functional language analysis approach is shown using actual secondary social studies, science, and math textbooks and using a literary text.

Content Area Reading and Literacy - Donna E. Alvermann 2012

"Students and teachers have long appreciated the scope of topics and examples, the research-based information, and the accessible writing style presented by these three trusted authorities in the field of adolescent literacy. This seventh edition includes up-to-date information to help teachers address the literacy needs of English learners in their classrooms and today's culturally diverse student population, while also addressing new frameworks for reading and writing instruction, including a sociocultural perspective on teaching and learning and insights from the New Literacies. As in previous editions, this seventh

edition is based on the assumption that, rather than just a mere add-on, "content literacy is integral to every discipline and special subject area, to the teachable moments that make less stellar ones tolerable, and, most important, to each student's motivation and engagement with learning." The ideas the authors present are backed by research, tested in real classrooms, and designed to help teachers apply what is useful to their own particular disciplines. The ideas they share--both new and from "--Publisher. *Your Guide to College Success: Strategies for Achieving Your Goals* - Jane S. Halonen

Funds of Knowledge - Norma Gonzalez
2006-04-21

The concept of "funds of knowledge" is based on a simple premise: people are competent and have knowledge, and their life experiences have

given them that knowledge. The claim in this book is that first-hand research experiences with families allow one to document this competence and knowledge, and that such engagement provides many possibilities for positive pedagogical actions. Drawing from both Vygotskian and neo-sociocultural perspectives in designing a methodology that views the everyday practices of language and action as constructing knowledge, the funds of knowledge approach facilitates a systematic and powerful way to represent communities in terms of the resources they possess and how to harness them for classroom teaching. This book accomplishes three objectives: It gives readers the basic methodology and techniques followed in the contributors' funds of knowledge research; it extends the boundaries of what these researchers have done; and it explores the applications to classroom practice that can result from teachers knowing the communities in which they work. In a time when national

educational discourses focus on system reform and wholesale replicability across school sites, this book offers a counter-perspective stating that instruction must be linked to students' lives, and that details of effective pedagogy should be linked to local histories and community contexts. This approach should not be confused with parent participation programs, although that is often a fortuitous consequence of the work described. It is also not an attempt to teach parents "how to do school" although that could certainly be an outcome if the parents so desired. Instead, the funds of knowledge approach attempts to accomplish something that may be even more challenging: to alter the perceptions of working-class or poor communities by viewing their households primarily in terms of their strengths and resources, their defining pedagogical characteristics. Funds of Knowledge: Theorizing Practices in Households, Communities, and Classrooms is a critically important volume for

all teachers and teachers-to-be, and for researchers and graduate students of language, culture, and education.

In doing so, however, the authors have tried to maintain the brevity, stylistic

clarity, and classroom focus of the earlier volume. Key features of this important new book include: *Teaching Flexibility. Although written with the needs of pre-service teachers in mind, theory and research are treated in sufficient depth to make the book suitable for graduate courses and for teacher study groups. It is also appropriate for secondary reading specialists or literacy coaches responsible for establishing or maintaining a school-wide literacy program.

*Changes in New Edition. All chapters have been reorganized and most of the text rewritten. In addition, new chapters not usually included in content area reading texts were added. These cover: 1) adolescents' out-of-school literacy experiences and in-school preferences; 2) digital resources for content learning; and 3)

considerations for the reading specialist. *Socio-Cultural Perspective. Like other volumes in the Literacy Teaching Series, the perspective of this one is socio-cultural and constructivist. It recognizes that classroom teaching and learning are closely intertwined with surrounding school and community cultures as well as the culture and language of the subject being studied. Likewise, literacy is not simply a matter of reading and writing but involves using multiple literacies to negotiate and construct meaning. *Practical Orientation. Although supporting theory and research are included in all chapters, instructional strategies with illustrative examples from practicing teachers are included in most chapters. Each chapter concludes with "Application Activities" and "From Our Professional Library" references.
