The Taxation of Companies in Europe - International Bureau of Fiscal Documentation 1998

Revenue Law - John Tiley 2012-10-11

This is the 7th Edition of John Tiley's major text on revenue law, now massively restructured to focus upon the UK Tax system, Income Tax, Capital Gains Tax, and Inheritance Tax. What were previously sections dealing with Corporation Tax, International and European Tax, Savings and Charities have been spun-off to an entirely new book entitled *Advanced Topics in Revenue Law*. While this narrowing of the scope of Revenue Law means that it focuses on the most important UK taxes, its reduced size also makes it a more manageable and portable volume for law students and practitioners. As with previous editions, the text has been revised to incorporate changes wrought by new enactments in the past four years. This, however, remains the only book on tax law which continues to explain the new law found in ITEPA, ITTOIA and ITA in light of its legislative predecessors, with references to the former enactments still remaining where relevant. Those familiar with the old law of income tax but wanting to find their way round the new will find this work particularly valuable. The book is designed for law students taking the subject in the final year of their law degree course or for more advanced courses and is intended to be of interest to all who enjoy tax law. Its purpose is not only to provide an account of the rules but to include

citation of the relevant literature from legal periodicals and some discussion of, or reference to, the background material in terms of policy, history or other countries' tax systems.

*Environmental Fiscal Reform and Unemployment* - Carlo Carraro  
2013-03-14

The European Union faces several interlinked challenges: how to protect the environment and favour sustainability; how to reduce unemployment and foster competitiveness in a context of growing globalization; how to reduce regional disparities among and within member countries. The recent policy debate has clarified that the above objectives are not a trade off if jointly tackled. In particular, win-win policy options are available to the European Union by an appropriate integration of regulation, macro policy, social policy, fiscal policy and environmental policy. Evidence shows that optimising on each single policy will not meet the needs of the European Union. On the contrary, an integrated approach will make it possible to reach the various objectives, as stated in the Treaty on European Union, in the 5th Environmental Action Programme, in the White Paper on Growth, Competitiveness and Employment. This integrated approach would implement a genuine sustainable development policy.

**Pre-Incident Indicators of Terrorist Incidents** - Brent L. Smith  
2011-01

This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior

to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

**The Security Economy** - OECD 2004-06-09

With the market for security goods and services having expanded rapidly since 9/11, this study examines the potential costs of major disruptions, the trade-offs between tighter security and economic efficiency, and the implications of tighter security for privacy and other democratic liberties.

Retooling for an Aging America - Institute of Medicine 2008-08-27

As the first of the nation's 78 million baby boomers begin reaching age 65 in 2011, they will face a health care workforce that is too small and woefully unprepared to meet their specific health needs. Retooling for an Aging America calls for bold initiatives starting immediately to train all health care providers in the basics of geriatric care and to prepare family members and other informal caregivers, who currently receive little or no training in how to tend to their aging loved ones. The book also recommends that Medicare, Medicaid, and other health plans pay higher

rates to boost recruitment and retention of geriatric specialists and care aides. Educators and health professional groups can use Retooling for an Aging America to institute or increase formal education and training in geriatrics. Consumer groups can use the book to advocate for improving the care for older adults. Health care professional and occupational groups can use it to improve the quality of health care jobs.
