Center Center - James Whiteside 2021-08-17

"James Whiteside is an electrifying performer, an incredible athlete, and an artist, through and through. To know James is to love him; with Center Center, you are about to fall in love." —Jennifer Garner "A frank examination and celebration of queerness." —Good Morning America A daring, joyous, and inspiring memoir-in-essays from the American Ballet Theatre principal dancer-slash-drag queen-slash-pop star who's redefining what it means to be a man in ballet There's a mark on every stage around the world that signifies the center of its depth and width, called "center center." James Whiteside has dreamed of standing on that very mark as a principal dancer with the prestigious American Ballet Theatre ever since he was a twelve-year-old blown away by watching the company's spring gala. The GLAMOUR. The VIRTUOSITY. The RIPPED MEN IN TIGHTS! In this absurd and absurdist collection of essays, Whiteside tells us the story of how he got to be a primo ballerino—stopping along the way to muse about the tragically fated childhood pets who taught him how to feel, reminisce on ill-advised partying at summer dance camps, and imagine fantastical run-ins with Jesus on Grindr. Also in these pages are tales of the two alter egos he created to subvert the strict classical rigor of ballet: JbDubs, an out-and-proud pop musician, and Ühu Betch, an over-the-top drag queen named after Yoohoo chocolate milk. Center Center is an exuberant behind-the-scenes tour of Whiteside's triple life, both on- and offstage—a raunchy, curious, and unapologetic celebration of queerness, self-expression, friendship, sex, creativity, and pushing boundaries that will entertain you, shock you*, inspire you, embolden you . . . and maybe even make you cry. *THIS IS NOT A BOOK FOR CHILDREN.

Designing and Evaluating Usable Technology in Industrial Research - Clare-Marie Karat 2010

This book is about HCI research in an industrial research setting. It is based on the experiences of two researchers at the IBM T. J. Watson Research Center. Over the last two decades, Drs. John and Clare-Marie Karat have conducted HCI research to create innovative usable technology for users across a variety of domains. We begin the book by introducing the reader to the context of industrial research as well as a set of common themes or guidelines to consider in conducting HCI research in practice. Then case study examples of HCI approaches to the

design and evaluation of usable solutions for people are presented and discussed in three domain areas: - item Conversational speech technologies, - item Personalization in eCommerce, and - item Security and privacy policy management technologies In each of the case studies, the authors illustrate and discuss examples of HCI approaches to design and evaluation that worked well and those that did not. They discuss what was learned over time about different HCI methods in practice, and changes that were made to the HCI tools used over time. The Karats discuss trade-offs and issues related to time, resources, and money and the value derived from different HCI methods in practice. These decisions are ones that need to be made regularly in the industrial sector. Similarities and differences with the types of decisions made in this regard in academia will be discussed. The authors then use the context of the three case studies in the three research domains to draw insights and conclusions about the themes that were introduced in the beginning of the book. The Karats conclude with their perspective about the future of HCI industrial research.
