Fu Zhen Song's Dragon Bagua Zhang - Lin Chao Zhen 2010-02-16
The Dragon Bagua Zhang system of third-generation master Fu Zhen Song was one of the most powerful martial arts styles to emerge from 1920s China. Fu Zhen Song had a reputation as a skilled fighter and uncompromising teacher, and his Dragon Bagua style was renowned for its extensive catalog of whirling body movements and fighting techniques. In 1991 Lin Chao Zhen, Fu's formal disciple, brought this mysterious martial art to the United States, where he practiced and taught until his death in 1997. Fu Zhen Song's Dragon Bagua Zhang presents this challenging system in a step-by-step format, including palm forms, stepping patterns, and training methods. Originally written in Chinese by Lin Chao Zhen and translated by his son, Wei Ran Lin, this edition also features an extensive introductory section on the development of the Dragon Bagua form and the history of its lineage. The text is accompanied by 150 photographs of the late master Lin Chao Zhen demonstrating the form, as well as an illustrated two-person practice set that teaches the system's applications for self-defense and sparring.

A Little History of the World - E. H. Gombrich 2014-10-01
E. H. Gombrich's Little History of the World, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time, and his text suggests

illustrations on every page. This illustrated edition of the Little History brings together the pellucid humanity of his narrative with the images that may well have been in his mind's eye as he wrote the book. The two hundred illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. The book incorporates freshly drawn maps, a revised preface, and a new index. Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an enhanced edition of a timeless account of human history.

Now the Chips Are Down - Alison Gazzard 2016-02-19
The story of a pioneering microcomputer: its beginnings as part of a national Computer Literary Project, its innovative hardware, and its creative uses. In 1982, the British Broadcasting Corporation launched its Computer Literacy Project, intended "to introduce interested adults to the world of computers and computing." The BBC accompanied this initiative with television programs, courses, books, and software—an early experiment in multi-platform education. The BBC, along with Acorn Computers, also introduced the BBC Microcomputer, which would be at the forefront of the campaign. The BBC Micro was designed to meet the needs of users in homes and schools, to demystify computing, and to counter the general pessimism among the media in Britain about technology. In this book, Alison Gazzard looks at the BBC Micro, examining the early capabilities of multi-platform content generation and consumption and the multiple literacies this approach enabled—not only in programming and software

creation, but also in accessing information across a range of media, and in "do-it-yourself" computing. She links many of these early developments to current new-media practices. Gazzard looks at games developed for the BBC Micro, including Granny's Garden, an educational game for primary schools, and Elite, the seminal space-trading game. She considers the shift in focus from hardware to peripherals, describing the Teletext Adapter as an early model for software distribution and the Domesday Project (which combined texts, video, and still photographs) as a hypermedia-like experience. Gazzard's account shows the BBC Micro not only as a vehicle for various literacies but also as a user-oriented machine that pushed the boundaries of what could be achieved in order to produce something completely new.

IJER Vol 5-N1 - International Journal of Educational Reform 1996-01-01

The mission of the International Journal of Educational Reform (IJER) is to keep readers up-to-date with worldwide developments in education reform by providing scholarly information and practical analysis from recognized international authorities. As the only peer-reviewed scholarly publication that combines authors' voices without regard for the political affiliations perspectives, or research methodologies, IJER provides readers with a balanced view of all sides of the political and educational mainstream. To this end, IJER includes, but is not limited to, inquiry based and opinion pieces on developments in such areas as policy, administration, curriculum, instruction, law, and research. IJER should thus be of interest to professional educators with decision-making roles and policymakers at all levels turn since it provides a broad-based conversation between and among policymakers, practitioners, and academicians about reform goals, objectives, and methods

for success throughout the world. Readers can call on IJER to learn from an international group of reform implementers by discovering what they can do that has actually worked. IJER can also help readers to understand the pitfalls of current reforms in order to avoid making similar mistakes. Finally, it is the mission of IJER to help readers to learn about key issues in school reform from movers and shakers who help to study and shape the power base directing educational reform in the U.S. and the world.
