How Not to Make a Short Film - Roberta Marie Munroe 2009-01-20 Anyone can make a short film, right? Just grab some friends and your handheld and you can do it in a weekend or two before being accepted to a slew of film festivals, right? Wrong. Roberta Munroe screened short film submissions at Sundance for five years, and is an award-winning short filmmaker in her own right. So she knows a thing or two about how not to make a short film. From the first draft of your script to casting, production, editing, and distribution, this is your one-stop primer for breaking into the business. Featuring interviews with many of today's most talented writers, producers, and directors, as well as revealing stories (e.g., what to do when the skinhead crack addict next door begins screaming obscenities as soon as you call "action") from the sets of her own short films, Roberta walks you through the minefield of mistakes that an aspiring filmmaker can make--so that you don't have to make them yourself.

Directing - Michael Rabiger 2013-04-02 Directing: Film Techniques and Aesthetics is a comprehensive manual that teaches the essentials of filmmaking from the perspective of the director. Ideal for film production and directing classes, as well as for aspiring and current directors, Directing covers all phases of preproduction and production, from idea development to final cut. Thoroughly covering the basics, Directing guides the reader to professional standards of expression and control, and goes to the heart of what makes a director. The book outlines a great deal of practical work to meet this goal, with projects, exercises. The third edition emphasizes the connection between knowing and doing, with every principle realizable through projects and exercises. Much has been enhanced and expanded, notably: aspects of dramaturgy; beats and dramatic units; pitching stories and selling one's work; the role of the entrepreneurial producer; and the dangers of embedded moral values. Checklists are loaded with practical recommendations for action, and outcomes assessment tables help the reader honestly gauge his or her progress. Entirely new chapters present: preproduction procedures; production design; script breakdown; procedures and etiquette on the set; shooting location sound; continuity; and working with a composer. The entire book is revised to capitalize on the advantages offered by the revolutionary shift to digital filmmaking.

Dan has shot with X Series cameras for nearly six years, and he's worked closely with the FUJIFILM tech reps and product managers. He knows these cameras inside and out. He knows how they function out in the real world, and he's tested them with a wide range of subject matter, often in extremely challenging conditions, environments, and shooting situations. *FUJIFILM X Series Unlimited* teaches you everything he's learned along the way.

In this book, you'll learn all the camera settings, how to use autofocus, how to use and customize the film simulations to create your own "look," how to set up the camera for maximum image quality and performance, and many other features such as bracketing, exposure modes, the ADV mode filters, how to update firmware, and how to optimize your Fuji to match your style and subject matter.

This book is absolutely packed with tons of great recommendations, advice, and insight. If you take the time to learn and master just a few of the features covered in this guide, you'll be able to take your creative and technical skills to a whole new level.

The Technology of Video and Audio Streaming - David Austerberry 2013-07-24
* Learn the end-to-end process, starting with capture from a video or audio source through to the consumer's media player * A quick-start guide to streaming media technologies * How to monetize content and protect revenue with digital rights management For broadcasters, web developers, project managers implementing streaming media systems, David Austerberry shows how to deploy the technology on your site, from video and audio capture through to the consumer's media player. The

book first deals with Internet basics and gives a thorough coverage of telecommunications networks and the last mile to the home. Video and audio formats are covered, as well as compression standards including Windows Media and MPEG-4. The book then guides you through the streaming process, showing in-depth how to encode audio and video. The deployment of media servers, live webcasting and how the stream is displayed by the consumer's media player are also covered. A final section on associated technologies illustrates how you can protect your revenue sources with digital rights management, looks at content delivery networks and provides examples of successful streaming applications. The supporting website, www.davidausterberry.com/streaming.html, offers updated links to sources of information, manufacturers and suppliers. David Austerberry is co-owner of the new media communications consultancy, Informed Sauce. He has worked with streaming media since the late nineties. Before that, he has been product manager for a number of broadcast equipment manufacturers, and formerly had many years with a leading broadcaster.
