Classic Beetle - Keith Seume
2015-10-15

The specially commissioned photographs in this book display each Beetle variant model in their full glory. From the military vehicles of the 1930s through the post-WWII cars, up to and including the final German-built model of 1979, this book offers a loving tribute to the car in sumptuous

detail. The beautifully restored and kept cars of each decade are displayed across several double page spreads. Parts of each model are shown in close-up, compared and explained using studio photographs of each model's steering wheels, indicators, engine bays and other aspects of design and function. The history of the Beetle is illustrated using

contemporary archive photography, and attention is given to the cultural impact of the Beetle as shown through movies (such as the Herbie franchise), advertising and graphic design. This large format, fully illustrated book presents the Beetle as an object of art, albeit one that starts every time and will run forever on reused cooking oil, with a little modification. Patina Volkswagens - Mark

Walker 2022-01-07

Since the early 2000s, the apparent explosion of interest in Volkswagens with original paint, rust and patina has

inspired a generation of car fanatics, who might not be able to afford to restore a car to show condition, but still want a good looking, cool car that will stand out from the crowd. Once looked upon as being in need of restoration, cars with original paint, rust and patina, especially within the global Volkswagen community, have gradually become far more popular than restored cars. When walking down a line of cars at a car show, it's easy to see why; these cars are rare, unspoiled survivors - cars that tell a story of an interesting and varied past. The look of the Volkswagens being built in this style is so honest, unspoiled and characterful, that it has begun to inspire the media; even Hollywood movie stars and celebrities. Whilst this has undoubtedly resulted in increased car values, and turned a brand of cars that had always been a cheap, honest mode of transportation into something cool with a high price tag, the generation it initially inspired has grown with the hobby, and produced a

micro-industry that still manages to embrace the 'Built not bought' ethos. This book, superbly illustrated with stunning colour photographs, takes an inside look at some of the key car builders, dealers, celebrities and hobbyists, as well as the different styles of build, meaning every single car has a style all its own.

How to Build a Patina Volkswagen - Mark Walker 2020-05-12

The explosion of Patina Volkswagens on social media has inspired those car fanatics who realise that you don't have to restore a car to end up with a good-looking ride. At last, you can stand out from the crowd, even on a tight budget. The look of the cars that result from patina builds is honest, unspoiled, and characterful; it has also inspired the media, movie stars and celebrities. Interest in patination has undoubtedly resulted in increased car values, and turned a brand of cars that had always been a cheap, honest

mode of transportation into something cool with a high price tag. The people the look initially inspired have grown with the hobby, finding ways to still be cool on a tight budget and producing a micro-industry that still manages to embrace the 'built not bought' ethos. How to Build a Patina Volkswagen book takes a look at the differing styles of patina VW build, and imparts tips on finding and buying a project car, carrying out a sympathetic patina style renovation and includes a chapter on re-creating a patina finish on repaired areas or missing parts.

The Volkswagen Beetle - Jonathan Wood 2008-03-04
The Volkswagen Beetle is the most successful car in the history of the automobile and over twenty million examples have been built. Conceived by Adolf Hitler in the spirit of the Model T Ford and designed by Ferdinand Porsche in the 1930s, the Beetle did not enter series production until 1945, after the ending of the Second World War. Its familiar but unconventional lines have since become recognisable throughout the world and,

incredibly, it is still being built at VW's Mexican factory. This edition brings the story up to date and charts the arrival and evolution of the New Beetle, visually inspired by the original, which appeared in 1998. About the author Jonathan Wood is a founder member of the staff of Classic Cars, the magazine which gave its name to the movement. He is the author of some 35 books, which include an acclaimed history of the Volkswagen Beetle. Other titles for Shire by this author are: The Bean Austin Seven The Citroen The Bullnose Morris Classic Cars The Model T Ford The Rolls-Royce
