**Henri Matisse** - Karl D. Buchberg 2014

Henri Matisse is one of the leading figures of modern art. His unparalleled cut-outs are among the most significant of any artist's late works. When ill health first prevented Matisse from painting, he began to cut into painted paper with scissors as his primary technique to make maquettes for a number of commissions, from books and stained glass window designs to tapestries and ceramics. Taking the form of a 'studio diary', the catalogue re-examines the cut-

outs in terms of the methods and materials that Matisse used, and looks at the tensions in the works between finish and process; and drawings and colour.

[Special Teaching For Special Needs Methods & Courses](#) - John Boom 2017-10-30

When a teacher speaks to anyone there is a level of assumption that those people will understand what you say. But in the education system there are always a percentage of people that don't understand everything spoken or taught to them. The reason many kids pass through the regular and special school education system with learning issues is because they can't cope with that normal level of assumption of understanding that people assume everyone has. So these people simply can't pick things up as easy as others and they're left behind in the education system. This is why I developed "Special Teaching For Special Needs. It's to teach teachers to get down to the level of

understanding needed for those others to learn and retain that information. I'm not disrespecting the hard work teachers do every day but I'm trying to point out that some people need to be taught differently to cope with the everyday learning process. This book is for use by teachers and for those that home-school their kids.
