**Foundations of Trusted Autonomy** - Hussein A. Abbass 2018-01-15  
This book establishes the foundations needed to realize the ultimate goals for artificial intelligence, such as autonomy and trustworthiness. Aimed at scientists, researchers, technologists, practitioners, and students, it brings together contributions offering the basics, the challenges and the state-of-the-art on trusted autonomous systems in a single volume. The book is structured in three parts, with chapters written by eminent researchers and outstanding practitioners and users in the field. The first part covers foundational artificial intelligence technologies, while the second part covers philosophical, practical and technological perspectives on trust. Lastly, the third part presents advanced topics necessary to create future trusted autonomous systems. The book augments theory with real-world applications including cyber security, defence and space.

**MiG Alley** - Thomas McKelvey Cleaver 2019-11-28

Following the end of the Korean War, the prevailing myth in the West was that of the absolute supremacy of US Air Force pilots and aircraft over their Soviet-supplied opponents. The claims of the 10:1 victory-loss ratio achieved by the US Air Force fighter pilots flying the North American F-86 Sabre against their communist adversaries, among other such fabrications, went unchallenged until the end of the Cold War, when Soviet records of the conflict were finally opened. Packed with first-hand accounts and covering the full range of US Air Force activities over Korea, MiG Alley brings the war vividly to life and the record is finally set

straight on a number of popular fabrications. Thomas McKelvey Cleaver expertly threads together US and Russian sources to reveal the complete story of this bitter struggle in the Eastern skies.

**We Are Best Friends: Animals in Society** - Leslie Irvine 2019-10-01 Friendships between humans and non-human animals were once dismissed as sentimental anthropomorphism. After decades of research on the emotional and cognitive capacities of animals, we now recognize human-animal friendships as true reciprocal relationships. Friendships with animals have many of the same characteristics as friendships between humans. Both parties enjoy the shared presence that friendship entails along with the pleasures that come with knowing another being. Both friends develop ways of communicating apart from, or in addition to, spoken language.

Honda Accord 1994-1997 - John Haynes 1999-01-07

**The Gendered Motorcycle** - Esperanza Miyake 2018-06-14

What happens to gender at 120mph? Are Harley-Davidsons more masculine than Yamahas? The Gendered Motorcycle answers such questions through a critical examination of motorcycles in film, advertising and television. Whilst bikers and biker cultures have been explored previously, the motorcycle itself has remained largely under-theorised, especially in relation to gender. Esperanza Miyake reveals how representations of motorcycles can produce different gendered bodies, identities, spaces and practices. This interdisciplinary book offers new and critical ways to think about gender and motorcycles, and will interest scholars and students of gender, technology and visual cultures, as well as motorcycle industry practitioners and motorcycle enthusiasts.

Triumph Bonneville - Ian Falloon 2018-07-17

Triumph Bonneville: 60 Years is a celebration one of motorcycling's most iconic and beloved bikes. First manufactured in Great Britain in 1959, Triumph's legendary model resonates deeply with motorcycle enthusiasts worldwide who love its style, sound, performance, and undeniable coolness. It's no surprise that Triumph was Steve McQueen's favorite ride. The Bonneville's story is one of successes and challenges as Triumph grew steadily in the post-World War II decades to become America's most successful "import" motorcycle marque. Triumph won every championship worth winning, owned the world speed record for fifteen years, and wooed Hollywood's hottest stars. Bonneville was Triumph's halo machine, one of the highest performance motorcycles of the 1960s. However, as competing marques eventually eclipsed the Bonneville in the 1970s, Triumph management struggled, leading first to bankruptcy and then to the demise of the company in 1983. Triumph was resurrected by British industrialist John Bloor in the late 1990s to become a twenty-first century global success story, which includes a revived and thoroughly retro-contemporary Bonneville range.

**Equity, Growth, and Community** - Chris Benner 2015-10-09

In the last several years, much has been written about growing economic challenges, increasing income inequality, and political polarization in the United States. Addressing these new realities in America's metropolitan regions, this book argues that a few lessons are emerging: first, inequity is bad for economic growth; second, bringing together the concerns of equity and growth requires concerted local action; and third, the fundamental building block for doing this is the creation of diverse and dynamic epistemic (or knowledge) communities, which help to overcome political polarization and to address the challenges of economic restructuring and social divides. "As America bolts toward a more multiracial future in the face of skyrocketing inequality, local leaders are desperately seeking strategies to foster more inclusive growth. Chris Benner and Manuel Pastor's research uncovers a critical ingredient of success: diverse regional leaders coming together to build a foundation of shared knowledge and advance positive change." -- ANGELA GLOVER BLACKWELL, Founder and CEO, PolicyLink CHRIS BENNER is the Dorothy E. Everett Chair in Global Information and Social Entrepreneurship, Director of the Everett Program for Digital Tools for Social Innovation, and Professor of Environmental Studies and Sociology at the University of California, Santa Cruz. His most recent book, coauthored with Manuel Pastor, is *Just Growth: Inclusion and Prosperity in America's Metropolitan Region*. His other books include *This Could Be the Start of Something Big: How Social Movements for Regional Equity Are Transforming Metropolitan America* and *Work in the New Economy: Flexible Labor Markets in the New Economy*. MANUEL PASTOR is

Professor of Sociology and American Studies and Ethnicity at the University of Southern California, where he also serves as Director of USC's Program for Environmental and Regional Equity (PERE) and Codirector of USC's Center for the Study of Immigrant Integration (CSII). He is the coauthor of *Uncommon Common Ground: Race and America's Future* and *This Could Be the Start of Something Big: How Social Movements for Regional Equity Are Transforming Metropolitan America*.
