*A History of Zinnias* - Eric Grissell 2020-03-30

A History of Zinnias brings forward the fascinating adventure of zinnias and the spirit of civilization. With colorful illustrations, this book is a cultural and horticultural history documenting the development of garden zinnias—one of the top ten garden annuals grown in the United States today. The deep and exciting history of garden zinnias pieces together a tale involving Aztecs, Spanish conquistadors, people of faith, people of medicine, explorers, scientists, writers, botanists, painters, and gardeners. The trail leads from the halls of Moctezuma to a cliff-diving prime minister; from Handel, Mozart, and Rossini to Gilbert and Sullivan; from a little-known confession by Benjamin Franklin to a controversy raised by Charles Darwin; from Emily Dickinson, who writes of death and zinnias, to a twenty-year-old woman who writes of reanimated corpses; and from a scissor-wielding septuagenarian who painted with bits of paper to the "Black Grandma Moses" who painted zinnias and inspired the opera Zinnias. Zinnias are far more than just a flower: They represent the constant exploration of humankind's quest for beauty and innovation.

*Dis/ability in Media, Law and History* - Micky Lee 2022-06-17

This book explores how being "disabled" originates in the physical world, social representations and rules, and historical power relations—the interplay of which render bodies "normal" or not. Do parking signs that represent people in wheelchairs as self-propelling influence how we view

dis/ability? How do wheelchair users understand their own bodies and an environment not built for them? By asking questions like these the authors reveal how normalization has informed people's experiences of their bodies and their fight for substantive equality. Understanding these processes requires acknowledging the tension between social construction and embodiment as well as centering the intersection of dis/abilities with other identities, such as race, class, gender, sex orientation, citizen status, and so on. Scholars and researchers will find that this book provides new avenues for thinking about dis/ability. A wider audience will find it accessible and informative.

[The White Eyelash](#) - Susan Kinsolving 2007-12-01

A poetry collection of "peculiar grace" from the National Book Critics Circle Award finalist author of *Dailies & Rushes* (Brian Phillips, Poetry Magazine). Susan Kinsolving's first poetry collection, *Dailies & Rushes*, was hailed as a "brilliant debut" by the *New York Times*, and "grand and almost terrifying" by the *New Yorker*. In her new work, *The White Eyelash*, she turns the extremes of her recent experiences—especially those with her ageing, mentally ill mother—into poems of harsh factuality. This dark narrative sequence is highly contrasted by the humor presented in a section called "Light Fare & Oddballs." Once again, Kinsolving exhibits a daunting range with signature style and substance. "[The White Eyelash] finds the poet remembering her trouble mother, concentrating on visual detail or pursuing light-verse forms and verbal games with a demotically highbrow, casual grace. . . . Often organized around colors . . . these poems show a love for beauty and a casual line reminiscent of Eamon Grennan's." —Publishers Weekly

**When Judaism Meets Science** - Roger L. Price 2019-04-22

This book seeks to confront the challenge that science presents to the traditional pillars of Judaism. It identifies and analyzes a wide variety of issues, including some contemporary sacred cows. First, the book considers what is fact and what is fiction in the primary stories contained in Judaism's foundational texts. Then, drawing on Jewish ethical teachings, it seeks to determine how Judaism and science can inform each other with respect to a broad range of contemporary issues, from abortion and allergies to vaccinations and violence with firearms. Finally, it peeks into the future to address issues that Judaism and science are just now beginning to discuss, such as an exotheology for aliens on distant planets, a Jewdroid who seeks acceptance in a shul, and even the fate of the universe itself. When Judaism Meets Science addresses readers of all persuasions--regardless of denomination and whether a believer or not--as the author builds a case, with specific recommendations, for the value of a reality-based Judaism, one grounded on both traditional ethics and empirical evidence that can resonate with the educated adults of Israel.

**The Piano Shop on the Left Bank** - Thad Carhart 2002-03-12

Walking his two young children to school every morning, Thad Carhart passes an unassuming little storefront in his Paris neighborhood.

Intrigued by its simple sign—Desforges Pianos—he enters, only to have his way barred by the shop’s imperious owner. Unable to stifle his curiosity, he finally lands the proper introduction, and a world previously hidden is brought into view. Luc, the atelier’s master, proves an indispensable guide to the history and art of the piano. Intertwined with the story of a musical friendship are reflections on how pianos work, their glorious history, and stories of the people who care for them, from amateur pianists to the craftsmen who make the mechanism sing. The Piano Shop on the Left Bank is at once a beguiling portrait of a Paris not found on any map and a tender account of the awakening of a lost childhood passion. Praise for The Piano Shop on the Left Bank:

“[Carhart’s] writing is fluid and lovely enough to lure the rustiest plunker back to the piano bench and the most jaded traveler back to Paris.” -San Francisco Chronicle “Captivating . . . [Carhart] joins the tiny company of foreigners who have written of the French as verbs. . . . What he tries to capture is not the sight of them, but what they see.” -The New York Times “Thoroughly engaging . . . In part it is a book about that most unpredictable and pleasurable of human experiences, serendipity. . . .

The book is also about something more difficult to pin down, friendship and community.” -The Washington Post “Carhart writes with a

sensuousness enhanced by patience and grounded by the humble acquisition of new insight into music, his childhood, and his relationship to the city of Paris.” -The New Yorker NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE WASHINGTON POST BOOK WORLD

This volume extends the ISSI series on magnetic fields in the Universe into the domain of what are by far the strongest fields in the Universe, and stronger than any field that could be produced on Earth. The

chapters describe the magnetic fields in non-degenerate strongly magnetized stars, in degenerate stars (such as white dwarfs and neutron stars), exotic members called magnetars, and in their environments, as well as magnetic fields in the environments of black holes. These strong fields have a profound effect on the behavior of matter, visible in particular in highly variable processes like radiation in all known wavelengths, including Gamma-Ray bursts. The generation and structure of such strong magnetic fields and effects on the environment are also described.

**Pulsating Stars** - Márcio Catelan 2015-03-23

This book surveys our understanding of stars which change in brightness because they pulsate. Pulsating variable stars are keys to distance scales inside and beyond the Milky Way galaxy. They test our understanding not only of stellar pulsation theory but also of stellar structure and evolution theory. Moreover, pulsating stars are important probes of the formation and evolution of our own and neighboring galaxies. Our understanding of pulsating stars has greatly increased in recent years as large-scale surveys of pulsating stars in the Milky Way and other Local Group galaxies have provided a wealth of new observations and as space-based instruments have studied particular pulsating stars in unprecedented detail.
