Muncie 4-Speed Transmissions - Paul Cangialosi
2014-10-15

The Muncie 4-speeds, M20, M21, and M22 are some of the most popular manual transmissions ever made and continue to be incredibly popular. The Muncie was the top high-performance manual transmission GM offered in its muscle cars of the 60s and early 70s. It was installed in the Camaro, Chevelle, Buick GS, Pontiac GTO, Olds Cutlass, and many other classic cars. Many owners want to retain the original transmission in their classic cars to maintain its value. Transmission expert and veteran author Paul Cangialosi has created an indispensable reference to Muncie 4-speeds that guides you through each crucial stage of the rebuild process. Comprehensive ID information is provided, so you can positively identify the cases, shafts, and related parts. It discusses available models, parts options, and gearbox cases. Most important, it shows how to completely disassemble the gearbox, identify wear and damage, select the best parts, and complete the rebuild. It also explains how to choose the ideal gear ratio for a particular application. Various high-performance and racing setups are also shown, including essential modifications, gun drilling the shafts, cutting down the gears to remove weight, and achieving race-specific clearances. Muncie 4-speeds need rebuilding after many miles of service and extreme use. In addition, when a muscle car owner builds a high-performance engine that far exceeds stock horsepower, a stronger high-performance transmission must be built to accommodate this torque and horsepower increase. No other book goes into this much detail on the identification of the Muncie 4-

speed, available parts, selection of gear ratios, and the rebuild process.

Eidolon - Alan Chant 2018-06-14

The book follows the two children as they embark on an adventure, which begins with the discovery of a hidden witch's haven in a graveyard and Jordan's first encounter with the spirit world - but by know means the first for Sebastian. Then a haunted observatory on the outskirts of town yields a clue - a piece of an intriguing map leading to, what they believe to be, hidden treasure. After collecting the rest of the clues from around the town, Jordan and Sebastian search for the treasure, but instead of rubies, emeralds and gold doubloons, they find themselves lead to a doorway into another world, called the Phantom Realm.

Great Grilles of the '50s - Mark Misercola 2019

The 1950s was a "golden era" for Detroit, reflecting the endless optimism and futuristic view in America following World War II. Car designers and stylists were inspired by current day fighter jets, space age technology, and chrome. Their creations sported great chrome grilles, bullet-nosed bumpers, enormous tail fins, cockpit-styled dashboards, and frames as big as aircraft carriers. The allure and emotional appeal of these cars has been well document in countless books over the years. But without exception all of these titles look fabulous '50s vehicles as the sum of their parts. None focus specifically on what many consider to be the most distinguishing aspect of many of the cars from the fabulous '50s - their front grilles.

Toyota Land Cruiser - R.M. Clarke 1998-06-18

The first Land Cruiser appeared at about the same time as the Land-Rover. Styling changes occurred in 1952 with the modern range designated F25s and F28s. The FJ43 appeared in the mid-1960s, the 40 and 45 Series in Australia in 1967/8. The FJ55 was introduced in 1969, the 43 series continued to be made in Japan and the 40 and 45 Series had improvements made throughout the 1970s. Production of the FJ55 ceased in 1980 to be followed by the Series 60. This was only available with an in-line, six-cylinder engine of 3980cc. A generous five-seater, and good load carrier, there were few changes made to it after production commenced. This is a book of contemporary road & comparison tests, new model introductions, technical & specification data, driving impressions, of road tests, long-term reports, buying second hand. Models covered include:- FWD Pick-up, Station Wagon, LX, De Luxe, Diesel.

The Origin of Competitive Strength - Akira Kawahara 2012-12-06

When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery

Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in Nikkei Sangyo Shimbun (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the Topeka Capital-Journal and the September 13, 1983 issue of the Asian Wall Street Journal. The Topeka Capital-Journal headline read, "MacArthur's Jeeps Were the Toyota Catalyst. **Toyota Townace/Liteace 88-96** - JPNZ (Firm) 2001
