*Porsche by Mailander* - Karl E. Ludvigsen 2011-04-08

Among the many holdings of the Ludvigsen Library were the works of Rodolfo Mailander, who photographed races, motor shows, new-car introduction and other events in Europe from 1950 through 1955. This handsome portrait-format book presents Mailander's photography,

selected and with commentary by Karl Ludvigsen, of Porsche cars and people through these years. Spread over 250 pages are some 300 images taken by a man who was intimately involved with this world. By far the majority of these photographs have never before been published.

Ludvigsen provides a knowledgeable and entertaining commentary on each, together with a year-by-year overview of the activities of Porsche during these exciting early years. The early Fifties were the dramatic formative years of Porsche, which was founded as a sports-car producer in 1948. The first-ever Porsche car scored a race victory that same year. Porsche's first effort at Le Mans in 1951 brought a class victory, and Le Mans was destined to remain a major target for Porsche's racers in the future. With the arrival of the fabled 550 Spyders in 1953 Porsche scored class victories on all continents with such drivers as Stirling Moss, Hans Herrmann and Richard von Frankenberg. As well, during these years Porsche developed and expanded its range of sports cars for the road. Included in the book are: - Exciting and evocative scenes from the great sports-car races, rallies, road races and hillclimbs: Monza, Berne, the Nürburgring, the Mille Miglia, Monte Carlo, Reims and others. - Behind-the-scenes views of the Porsche factory and the building of these great cars. - The Porsche road cars in their environment and at the great Salons of Paris, Turin and Geneva. - Porsche people, including Ferry Porsche, his engineers and his drivers. Chilton's Import Car Repair Manual, 1986 - Chilton Book Company 1985

The Hack Mechanic Guide to European Automotive Electrical Systems - Rob Siegel 2016-06-27

Electrical issues in European cars can be intimidating. The Hack Mechanic Guide to European Automotive Electrical Systems shows you how to think about electricity in your car and then take on real-world electrical problems. The principles discussed can be applied to most conventional internal-combustion-engined vehicles, with a focus on European cars spanning the past six decades. Drawing on The Hack Mechanic's wisdom and experience, the 38 chapters cover key electrical topics such as battery, starter, alternator, ignition, circuits, and relays. Through a practical and informal approach featuring hundreds of full-color illustrations, author Rob Siegel takes the fear-factor out of projects like making wire repairs, measuring voltage drops, or figuring out if you have a bad fuel pump relay. Essential tools such as multimeters (DVOM), oscilloscopes, and scan tools are discussed, with special attention given to the automotive multimeter needed to troubleshoot many modern sensors. You'll get step-by-step troubleshooting procedures ranging from safely jump starting a battery to diagnosing parasitic current drain and vehicle energy diagnosis. And you'll find detailed testing procedures for most problematic electrical components on your European car such as oxygen sensors, crankshaft and camshaft sensors, wheel speed sensors, fuel pumps, solenoids, and actuators. Reading wiring diagrams and decoding the German DIN standard are also covered. Whether you are a DIY mechanic or a professional technician, The Hack Mechanic Guide to European Automotive Electrical Systems will increase your confidence in tackling automotive electrical problem-solving. This book applies to gasoline and diesel powered internal combustion engine vehicles. Not

intended for hybrid or electric vehicles.

Popular Science - 1985-10

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.
