Riding Man - Mark Gardiner 2012-07-15

For 100 years, the Isle of Man Tourist Trophy races have been the world's most dangerous organized sporting event. As one of thirty thousand fans who attended the annual spectacle, Mark Gardiner harbored no illusions about his own skill or bravery. He was, however, an avid motorcyclist for whom the race represented a boyhood dream. He went home, quit his job, sold everything he owned, and returned to the Island to race there himself. *Riding Man* is the account of an Everyman, struggling to qualify for -- and survive -- the TT races. If you're a dreamer, the lesson in this book is that the pursuit of any worthwhile goal involves risks, rewards and, almost inevitably some regrets. If you're not a dreamer, the lesson is more important: the deepest regrets are always over risks not taken.

"The Concept of the 'Master' in Art Education in Britain and Ireland, 1770 to the Present" - Matthew C. Potter 2017-07-05

A novel investigation into art pedagogy and constructions of national identities in Britain and Ireland, this collection explores the student-master relationship in case studies ranging chronologically from 1770 to 2013, and geographically over the national art schools of England, Ireland, Scotland and Wales. Essays explore the manner in which the Old Masters were deployed in education; fuelled the individual creativity of art teachers and students; were used as a rhetorical tool for promoting cultural projects in the core and periphery of the British Isles; and united as well as divided opinions in response to changing expectations in discourse on art and education. Case studies examined in this book include the sophisticated tradition of 'academic' inquiry of establishment figures, like Joshua Reynolds and Frederic Leighton, as well as examples of radical reform undertaken by key individuals in the history of art education, such as Edward Poynter and William Coldstream. The role of

'Modern Masters' (like William Orpen, Augustus John, Gwen John and Jeff Wall) is also discussed along with the need for students and teachers to master the realm of art theory in their studio-based learning environments, and the ultimate pedagogical repercussions of postmodern assaults on the academic bastions of the Old Masters.

The Moral Status of Combatants - Michael Skerker 2020

This book develops a new contractualist foundation for just war theory, which defends the traditional view of the moral equality of combatants and associated egalitarian moral norms. Traditionally it has been viewed that combatants on both sides of a war have the same right to fight, irrespective of the justice of their cause, and both sides must observe the same restrictions on the use of force, especially prohibitions on targeting non-combatants. Revisionist philosophers have argued that combatants on the unjust side of a war have no right to fight; that pro-war civilians on the unjust side might be targetable; and that lawful combatants on the unjust side might in principle be liable to prosecution for their participation on the unjust side. This book seeks to undercut the revisionist project and defend the traditional view of the moral equality of combatants. It does so by showing how revisionist philosophers fail to

build a strong foundation for their arguments and misunderstand that there is a moral difference between collective military violence and a collection of individually unjustified violent actions. Finally, the book develops a theory defending the traditional view of military ethics based on a universal duty of all people to support just institutions. This book will be of much interest to students of just war theory, ethics philosophy, and war studies.

Practical Watch Repairing - Donald De Carle 2020-02-07

Here is a unique book. It describes the theories and processes of repairing and adjusting the modern watch in precise and meticulous detail: a thing which has never been done so completely before in the many books on the same subject. As a text book it is a revelation. Taking

nothing for granted, except the ability to read and comprehend a simple description of mechanical processes, de Carle takes his reader through every stage and every operation of watch repairing ...and to deal with them thoroughly is quite a programme - it takes 300 pages containing 24 chapters, two appendices and 553 illustrations. The fine draughtsmanship and accurate technical detail of the illustrations set a new standard. Practical Watch Repairing can justifiably claim to be the best illustrated book on practical horology yet issued, and one of the best of its kind on any subject. The publication of the book marks the beginning of a new epoch in the study of the mechanics of horology.

50 Wild Motorcycle Tales - Walter F. Kern 2014-06-21

This book is an anthology of motorcycle stories. These 50 stories were submitted to me over a 13-year period by a wide range of motorcyclists from all walks of life. These authors tell their own personal stories of what happened to them as they rode their motorcycles. Among these writers are a few professionals who made some of their works available to me early in their careers. They now have books of their own. Some tales are very short, and some are very long. I've tried to mix them up. You may find the stories of some authors grouped together. Each tale was intensively edited to provide a good reader experience. You'll find humor, risk-taking, adventures, poetry, rhyming verse, 2-up excursions, world travelers, stupid tricks on bikes, lessons learned, winter riding perils, hazards while riding, and stories told by returning riders. I wrote five of these stories. Two of my stories relate my experiences on my motorcycle trips. Two stories are fictional children's stories that involve fantasy and motorcycles. The last story is a short fictional tale that describes an alternate world of motorcycles. Got a better original tale? Send it to me for consideration in a possible sequel.

Legendary Motorcycles - Basem Wasef, Jay Leno

Motorcycles are mythic, far more than mere transportation, but some are in a class of their own, truly legendary machines. There are the Triumphs: James Dean's, Marlon Brando's in The Wild Ones, the one Steve McQueen took over the fence in The Great Escape. There are Evel Knievel's and Elvis's Harleys, the Easy Rider Stars 'n' Stripes bike, and T. E. Lawrence's Brough Superior SS100; Von Dutch's Condor, Craig Vetter's Mystery Ship, and Mike Hailwood's Honda RC162. These are just some of the machines that have made motorcycle history, and that make this book a feast for the eyes and a fact-filled odyssey for the motorcycle aficionado. Illustrated with commissioned photographs and historical images, the book profiles the bikes--not just the models but the actual motorcycles--that have achieved legendary status in the last century. Their stories, told here in detail for the first time, make up the story of the motorcycle in American culture. Prince2 Foundation Training Manual - Van Haren Publishing 2017-01-15

Thank you for reading our PRINCE2 Foundation Training Manual. The main objective of this book is to provide an easy-to-read and easy-to-understand PRINCE2(R) Foundation training manual. The official PRINCE2 manual, "Managing Successful Projects with PRINCE2," is an excellent reference manual, but it is not a training manual and should not be used as one, as it is very difficult to comprehend and understand if you are new to project management. The official PRINCE2 manual also covers the complete Practitioner Syllabus, and it's impossible to know which parts are just focused on the PRINCE2 Foundation syllabus, so you have to read everything, which is not good if you are just studying for the foundation exam. Henceforth, this book is meant to be (and is) an easy introduction to PRINCE2 based on the Foundation syllabus, and it's quickly becoming the most read book for people wishing to learn about PRINCE2 and prepare for the foundation exam.

Suzuki GSX-R - Marc Cook 2005-01-01

The first GSX-R was created in 1985 as a groundbreaking departure from the ponderous sportbikes of the day. That revolutionary motorcycle took a time-honored racing credo to heart: light is right. (And another one: It can never be too fast.) Never before had the performance and design of a race bike been so faithfully carried over to the street. In the seven generations since, Suzuki has remained true to the concept of the original GSX-R: to build the most serious, track-worthy sportbike. What's more, the company's engineers have been relentless in their pursuit to

refine and improve the bike.
