*How to Build a Bobber on a Budget* - Jose de Miguel 2008-02-15

In the old days all a person needed to build a killer custom motorcycle was a bike, a set of

tools, a little know-how, and a creative vision. But with the rise of the high-dollar, haute mateur Gucci choppers, the true custom bike has gotten out of most riders' reach, right? Dead wrong. In this book Jose de Miguel, a custom builder from way back, sets out to prove that those good old days never ended. In the clearest

and simplest terms, he shows readers how they can turn odds and ends found around the shop into one-off motorcycle parts--and make a cheap, run-of-the mill custom build into a drop-dead show stopper. Following de Miguel's lead, along with his straightforward illustrations, any resourceful owner with rudimentary mechanical skills, a basic tool kit, and--most importantly--a modicum of imagination can build the bobber of his dreams for less than the price of a new bike.

It indicates that relative to other safety net programs in low income countries, social assistance in Albania is fairly well targeted to the poor.

**"The Concept of the 'Master' in Art Education in Britain and Ireland, 1770 to the Present "** - Matthew C. Potter 2017-07-05

A novel investigation into art pedagogy and constructions of national identities in Britain and Ireland, this collection explores the student-master relationship in case studies ranging

chronologically from 1770 to 2013, and geographically over the national art schools of England, Ireland, Scotland and Wales. Essays explore the manner in which the Old Masters were deployed in education; fuelled the individual creativity of art teachers and students; were used as a rhetorical tool for promoting cultural projects in the core and periphery of the British Isles; and united as well as divided opinions in response to changing expectations in discourse on art and education. Case studies examined in this book include the sophisticated tradition of 'academic' inquiry of establishment figures, like Joshua Reynolds and Frederic Leighton, as well as examples of radical reform undertaken by key individuals in the history of art education, such as Edward Poynter and William Coldstream. The role of 'Modern Masters' (like William Orpen, Augustus John, Gwen John and Jeff Wall) is also discussed along with the need for students and teachers to master the realm of art theory in their studio-

based learning environments, and the ultimate pedagogical repercussions of postmodern assaults on the academic bastions of the Old Masters.

*Race Tech's Motorcycle Suspension Bible* - Paul Thede 2010-06-19

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect

your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

**A History of Silicon Valley** - Piero Scaruffi  
2015-12-11

This book is the first history of Silicon Valley

from 1900 to the 2010s. It is a comprehensive study of the greatest creation of wealth in the history of the world, from the establishment of Stanford University to the age of social media. The underlying objective is to find the reason why it was Silicon Valley, and not some place on the East Coast or in Europe, that became the creative technological hub of the 21st century. Silicon Valley did not happen in a vacuum: the book also explores the surrounding social and cultural environment of the Bay Area. This "green" book follows the "red book" of 2012, which was the (sold out) first edition coauthored with Arun Rao, and the "blue book", which was Arun's proof-edited and expanded second edition of all chapters. The 600-page blue book is still available and contains both my old chapters and Arun's chapters. This 500-page green edition contains only my chapters (basically, the chronology) updated to 2015 and with many additions to early chapters and a new chapter on Asia.
