The Oxford Handbook of the History of Education - John L. Rury 2019-06-17

This handbook offers a global view of the historical development of educational institutions, systems of schooling, ideas about education, and educational experiences. Its 36 chapters consider changing scholarship in the field, examine nationally-oriented works by comparing themes and approaches, lend international perspective on a range of issues in education, and provide suggestions for further research and analysis. Like many other subfields of historical analysis, the history of education has been deeply affected by global processes of social and political change, especially since the 1960s. The handbook weighs the influence of various interpretive perspectives, including revisionist viewpoints, taking particular note of changes in the past half century. Contributors

consider how schooling and other educational experiences have been shaped by the larger social and political context, and how these influences have affected the experiences of students, their families and the educators who have worked with them. The Handbook provides insight and perspective on a wide range of topics, including pre-modern education, colonialism and anti-colonial struggles, indigenous education, minority issues in education, comparative, international, and transnational education, childhood education, non-formal and informal education, and a range of other issues. Each contribution includes endnotes and a bibliography for readers interested in further study.

American Cool - Peter N. Stearns 1994-04
Cool. The concept has distinctly American qualities and it permeates almost every aspect of contemporary American culture. From Kool cigarettes and the Peanuts cartoon's Joe Cool to West Side Story (Keep cool, boy.) and urban slang (Be cool. Chill out.), the idea of cool, in its many manifestations, has seized a central place in our vocabulary. Where did this preoccupation with cool come from? How was Victorian culture, seemingly so ensconced, replaced with the current emotional status quo? From whence came American Cool? These are the questions Peter Stearns seeks to answer in this timely and engaging volume. *American Cool* focuses extensively on the transition decades, from the erosion of Victorianism in the 1920s to the solidification of a cool culture in the 1960s. Beyond describing the characteristics of the new directions and how they altered or amended earlier standards, the book seeks to explain why the change occurred. It then assesses some of the outcomes and longer-range consequences of this transformation.

Peace in World History - Peter N. Stearns
2014-04-03

In *Peace in World History*, Peter N. Stearns examines the ideas of peace that have existed throughout history, and how societies have sought to put them into practice. Beginning with the status of peace in early hunter-gatherer and agricultural societies, and continuing through the present day, the narrative gives students a clear view of the ways people across the world have understood and striven to achieve peace throughout history. Topics covered include: Comparison of the 'pax Romana' and 'pax Sinica' of Rome and China Concepts of peace in Buddhism, Christianity, and Islam, and their historical impact The place of peace in the periods of expanding empires The emergence, starting in the 19th century, of formal schemes to promote peace amid increasingly destructive technologies for warfare Moving away from the view of history as a series of military conflicts, *Peace in World History* offers a new way of looking at world history by focusing on peace. Showing how concepts of peace have evolved over time even as they have been challenged by war and conflict, this lively and engaging narrative enables students to consider peace as a human possibility.

Handbook of Epistemic Cognition - Jeffrey A. Greene 2016-01-22

The *Handbook of Epistemic Cognition* brings together leading work from across disciplines, to provide a comprehensive overview of an increasingly important topic: how people acquire, understand, justify, change, and use knowledge in formal and informal contexts. Research into inquiry, understanding, and discovery within academic disciplines has progressed from general models of conceptual change to a focus upon the learning trajectories that lead to expert-like conceptualizations, skills,

and performance. Outside of academic domains, issues of who and what to believe, and how to integrate multiple sources of information into coherent and useful knowledge, have arisen as primary challenges of the 21st century. In six sections, scholars write within and across fields to focus and advance the role of epistemic cognition in education. With special attention to how researchers across disciplines can communicate and collaborate more effectively, this book will be an invaluable resource for anyone interested in the future of knowledge and knowing. Dr. Jeffrey A. Greene is an associate professor of Learning Sciences and Psychological Studies in the School of Education at the University of North Carolina at Chapel Hill. Dr. William A. Sandoval is a professor in the division of Urban Schooling at the UCLA Graduate School of Education & Information Studies. Dr. Ivar Bråten is a professor of Educational Psychology at the Faculty of Educational Sciences at the University of Oslo, Norway.

Western Civilization in World History - Peter N. Stearns 2008-01-28

Western civilization and world history are often seen as different, or even mutually exclusive, routes into historical studies. This volume shows that they can be successfully linked, providing a tool to see each subject in the context of the other, identifying influences and connections. *Western Civilization in World History* takes up the recent debates about the merits of the well-established 'Western civ' approach versus the newer field of world history. Peter N. Stearns outlines key aspects of Western civilization - often assumed rather than analyzed - and reviews them in a global context.

Premodern Travel in World History - Stephen Gosch 2007-12-12

This book features some of the greatest travellers in human history - people who undertook long journeys to places they knew little or nothing about. From Roman tourists, to the establishment of the Silk Road; an epic trek round China and India in the seventh century, to Marco Polo and through to the first speculations on space travel, *Premodern Travel in World History* provides an overview of long-distance travel in Afro-Eurasia from around 400BCE to 1500. This survey uses succinct accounts of the

most epic journeys in the premodern world as lenses through which to examine the development of early travel, trade and cultural interchange between China, central Asia, India and southeast Asia, while also discussing themes such as the growth of empires and the spread of world religions. Complete with maps, this concise and interesting study analyzes how travel pushed and shaped the boundaries of political, geographical and cultural frontiers.

An Emotional History of the United States -

Professor of History and Provost Peter N Stearns 1998

Emotions lie at our very core as human beings. How we process and grapple with our emotions, how and what we emote, and how we respond to the emotions of others, constitute the essence of our social universe. In a very real sense, we exist only through the prism of our emotions. And yet the profound effect of human emotion on history, politics, religion, and culture, remains underexamined. While the influence of emotion in such realms as American foreign policy has been well-documented, other emotional aspects of American history have escaped notice. What role, for instance, does emotion have in the practice of African American religion? How do shame and self-hatred influence American

conceptions of identity? How does our emotional life change as we age? To what degree is American consumerism driven by basic human emotion? With this landmark anthology, historians Peter N. Stearns and Jan Lewis provide a road map of the American emotional landscape. From the emotional world of working-class Massachusetts to the prayers of evangelical and pentecostal women and the gendered nature of black rage, these essays provide a multicultural snapshot of the unique nature, and evolution, of American emotions.

Battleground of Desire - Peter N. Stearns 1999-04

Stearns (history, Carnegie Mellon University) explores the history of American self control and discusses the wide social implications of self control as a characteristic prescribed by every culture in different ways. He investigates issues that define American attitudes towards morality, sexuality, and disciplines of the body, covering the Victorian legacy through current norms. In comparing trends throughout our cultural history, he points out that there has been no collapse of impulse control or moral demonstration between the eras, only a shift in form. [International Handbook of Emotions in Education](#) - Reinhard Pekrun 2014-04-16

For more than a decade, there has been growing interest and research on the pivotal role of emotions in educational settings. This groundbreaking handbook is the first to highlight this emerging field of research and to describe in detail the ways in which emotions affect learning and instruction in the classroom as well as students' and teachers' development and well-being. Informed by research from a number of related fields, the handbook includes four sections. Section I focuses on fundamental principles of emotion, including the interplay among emotion, cognition, and motivation, the regulation of emotion, and emotional intelligence. Section II examines emotions and emotion regulation in classroom settings, addressing specific emotions (enjoyment, interest, curiosity, pride, anxiety, confusion, shame, and boredom) as well as social-emotional learning programs. Section III highlights research on emotions in academic content domains (mathematics, science, and reading/writing), contextual factors (classroom, family, and culture), and teacher emotions. The final section examines the various methodological approaches to studying emotions in educational settings. With work from leading international experts across disciplines, this book synthesizes the latest research on emotions in education.

education etc. The final section provides a series of chapters on the pedagogy of citizenship education with discussions about curriculum, teaching, learning and assessment.

Transforming History - Mary Jo Festle

2020-04-14

Teaching history well is not just a matter of knowing history—it is a set of skills that can be developed and honed through practice. In this theoretically informed but eminently practical volume, Mary Jo Festle examines the recent explosion of research on the teaching and learning of history. Illuminated by her own work, Festle applies the concept of "backward design" as an organizing framework to the history classroom. She provides concrete strategies for setting up an environment that is inclusive and welcoming but still challenging and engaging. Instructors will improve their own conceptual understandings of teaching and learning issues, as well as receive guidance on designing courses and implementing pedagogies consistent with what research tells us about how students learn. The book offers practical illustrations of assignments, goals, questions, grading rubrics, unit plans, and formats for peer observation that are adaptable for courses on any subject and of any size. *Transforming History* is a critical guide for higher and secondary education

faculty—neophytes and longtime professionals alike—working to improve student learning.

Education in World History - Mark S. Johnson

2022-09-01

Education in World History shows how broad currents in transnational history have interacted with trends in educational organization and teaching practices over time. From antiquity and early classical societies to present day, this book highlights the ways in which changes in religious and intellectual life and economic patterns in key world regions have generated developments in education. Since the postclassical period, cross-cultural connections have also influenced educational change. In more recent times, transnational dialogues and mobility have played a vital role in shaping educational patterns.

Ranging through South and East Asia, Africa, Europe and the Americas, the book also considers how the impact of modern forces, such as industrialization and nationalism, have transformed education in fundamental ways.

Throughout the volume, Mark S. Johnson and Peter N. Stearns emphasize the tensions between elite and state educational interests and more diverse popular demands for access and, often, for more innovative pedagogy.

Suitable for introductory world history and history of education courses, this lively overview reconsiders the history of education from the perspective of world and comparative history.

Sources for the History of Emotions - Katie Barclay 2020-07-03

Offering insights on the wide range of sources that are available from across the globe and throughout history for the study of the history of emotions, this book provides students with a handbook for beginning their own research within the field. Divided into three parts, *Sources for the History of Emotions* begins by giving key starting points into the ethical, methodological and theoretical issues in the field. Part II shows how emotions historians have proved imaginative in their discovering and use of varied materials, considering such sources as rituals, relics and religious rhetoric, prescriptive literature, medicine, science and psychology, and fiction, while Part III offers introductions to

some of the big or emerging topics in the field, including embodied emotions, comparative emotions, and intersectionality and emotion. Written by key scholars of emotions history, the book shows readers the ways in which different sources can be used to extract information about the history of emotions, highlighting the kind of data available and how it can be used in a field for which there is no convenient archive of sources. The focused discussion of sources offered in this book, which not only builds on existing research, but encourages further efforts, makes it ideal reading and a key resource for all students of emotions history.

The Joy of Teaching - Peter Filene 2009-11-13
Gathering concepts and techniques borrowed from outstanding college professors, *The Joy of Teaching* provides helpful guidance for new instructors developing and teaching their first college courses. Award-winning professor Peter Filene proposes that teaching should not be like a baseball game in which the instructor pitches ideas to students to see whether they hit or strike out. Ideally, he says, teaching should resemble a game of Frisbee in which the teacher invites students to catch ideas and pass them on. Rather than prescribe any single model for success, Filene lays out the advantages and disadvantages of various pedagogical strategies, inviting new teachers to make choices based on their own personalities, values, and goals. Filene tackles everything from syllabus writing and lecture planning to class discussions, grading, and teacher-student interactions outside the classroom. The book's down-to-earth, accessible style makes it appropriate for new teachers in all fields. Instructors in the humanities, the social sciences, and the natural sciences will all welcome its invaluable tips for successful teaching and learning.
