**Secondhand** - Adam Minter 2019-11-12

"Revelatory, terrifying, but, ultimately, hopeful."  
-Elizabeth Kolbert, Pulitzer Prize-winning author of *THE SIXTH EXTINCTION* From the author of *Junkyard Planet*, a journey into the surprising afterlives of our former possessions. Downsizing. Decluttering. Discarding. Sooner or later, all of us are faced with things we no longer need or want. But when we drop our old clothes and other items off at a local donation center, where do they go? Sometimes across the country-or even halfway across the world-to people and places who find value in what we leave behind. In *Secondhand*, journalist Adam Minter takes us on an unexpected adventure into the often-hidden, multibillion-dollar industry of reuse: thrift stores in the American Southwest to vintage shops in Tokyo, flea markets in Southeast Asia to used-goods enterprises in Ghana, and more. Along the way, Minter meets the fascinating people who handle-and profit from-our rising tide of discarded stuff, and asks a pressing question: In a world that craves shiny and new, is there room for it all? *Secondhand*

offers hopeful answers and hard truths. A history of the stuff we've used and a contemplation of why we keep buying more, it also reveals the marketing practices, design failures, and racial prejudices that push used items into landfills instead of new homes. *Secondhand* shows us that it doesn't have to be this way, and what really needs to change to build a sustainable future free of excess stuff.

**Sprawl Repair Manual** - Galina Tachieva 2010-09-14

There is a wealth of research and literature explaining suburban sprawl and the urgent need to retrofit suburbia. However, until now there has been no single guide that directly explains how to repair typical sprawl elements. The Sprawl Repair Manual demonstrates a step-by-step design process for the re-balancing and re-urbanization of suburbia into more sustainable, economical, energy- and resource-efficient patterns, from the region and the community to the block and the individual building. As Galina Tachieva asserts in this exceptionally useful book, sprawl repair will require a proactive and aggressive approach, focused on design, regulation and incentives. The Sprawl Repair Manual is a much-needed, single-volume reference for fixing sprawl, incorporating changes into the regulatory system, and implementing repairs through incentives and permitting strategies. This manual specifies the expertise that's needed and details the techniques and algorithms of sprawl repair within the context of reducing the financial and ecological footprint of urban growth. The Sprawl Repair Manual draws on more than two decades of practical experience in the field of repairing and building communities to analyze the current pattern of sprawl development, disassemble it into its elemental components, and present a process for transforming them into human-scale, sustainable elements. The techniques are illustrated both two- and three-dimensionally, providing users with clear methodologies for the sprawl repair interventions, some of which are radical, but all of which will produce positive results.

Plus, we can all be part of it: you, your second cousin, that guy that lives down the street and the person you follow on Instagram on the other side of the world. *The Innovation Delusion* - Lee Vinsel 2020-09-08  
"Innovation" is the hottest buzzword in business. But what if our obsession with finding the next big thing has distracted us from the work that matters most? "The most important book I've read in a long time . . . It explains so much about what is wrong with our technology, our economy, and the world, and gives a simple recipe for how to fix it: Focus on understanding what it takes for your products and services to last."—Tim O'Reilly, founder of O'Reilly Media  
It's hard to avoid innovation these days. Nearly every product gets marketed as being disruptive, whether it's genuinely a new invention or just a new toothbrush. But in this manifesto on the state of American work, historians of technology Lee Vinsel and Andrew L. Russell argue that our way of thinking about and pursuing innovation has made us poorer, less safe, and—ironically—less innovative. Drawing on years of original research and reporting, *The Innovation Delusion* shows how the ideology of change for its own sake has proved a disaster. Corporations have spent millions hiring chief innovation officers while their core businesses tank. Computer science programs have drilled their students on programming and design, even though the overwhelming majority of jobs are in IT and maintenance. In countless cities, suburban sprawl has left local governments with loads of deferred repairs that they can't afford to fix. And sometimes innovation even kills—like in 2018 when a Miami bridge hailed for its innovative design collapsed onto a highway and killed six people. In this provocative, deeply

researched book, Vinsel and Russell tell the story of how we devalued the work that underpins modern life—and, in doing so, wrecked our economy and public infrastructure while lining the pockets of consultants who combine the ego of Silicon Valley with the worst of Wall Street's greed. The authors offer a compelling plan for how we can shift our focus away from the pursuit of growth at all costs, and back toward neglected activities like maintenance, care, and upkeep. For anyone concerned by the crumbling state of our roads and bridges or the direction our economy is headed, *The Innovation Delusion* is a deeply necessary reevaluation of a trend we can still disrupt.

**LaserWriter II** - Tamara Shopsin 2021-10-19

A WIRED Pick for the 7 Books You Need to Read

This Winter and one of Vox's 11 Titles Not to Miss From the incomparable New York Times and New Yorker illustrator Tamara Shopsin, a debut novel about a NYC printer repair technician who comes of age alongside the Apple computer—featuring original artistic designs by the author. *LaserWriter II* is a coming-of-age tale set in the legendary 90s indie NYC Mac repair shop TekServe—a voyage back in time to when the internet was new, when New York City was gritty, and when Apple made off-beat computers for weirdos. Our guide is Claire, a 19-year-old who barely speaks to her bohemian co-workers, but knows when it's time to snap on an antistatic bracelet. Tamara Shopsin brings us a classically New York novel that couldn't feel more timely. Interweaving the history of digital technology with a tale both touchingly human and delightfully technical, Shopsin brings an idiosyncratic cast of characters to life with a light touch, a sharp eye, and an unmistakable voice. Filled with pixelated philosophy and lots of printers, *LaserWriter II* is, at its heart, a parable about an apple.
