### **Flipping a Switch: Your Guide to Happiness and Financial Security in Later Life**

- Barbara O'Neill

2020-07-30

Leaving full-time employment to enter retirement often requires a 180-degree change--in mindset and behavior--from the way you managed your time and money previously. This is especially true for Baby Boomers who may have never experienced adult life without a full-time job and have been practicing the same habits since their 20s. These life transitions can be looked at as if they require "flipping a switch." Some changes happen suddenly like an on/off switch, while others happen over time like a "dimmer switch". Some "switches" are voluntary like spending accumulated savings,

while some are mandatory like taking required minimum distributions starting at age 72. And to make matters more confusing, there are also lifestyle and social changes to consider as well. Flipping a Switch discusses 35 financial, lifestyle, and social transitions you'll encounter upon entering retirement, including:

- Full-time work to new pastimes
- Saving money to spending money
- Receiving a paycheck to creating a "paycheck"
- Funding retirement savings plans to taking required minimum distribution withdrawals
- Accumulating possessions to downsizing

Everyone has unique "switches" to flip. Flipping a Switch: Your Guide to Happiness and Financial Security in Later Life offers important information and guidance new retirees need before undertaking their new life. Each chapter includes a "How to Flip This Switch" section with suggested action steps. Nationally known speaker, author, and Certified Financial Planner® Dr.

**Seniors, Protect Yourself Against Investment Fraud** - 2007

**Elder Fraud Wars** - David Neil Kirkman 2020-05-12  
By recounting actual court cases, this book examines the multi-billion-dollar elder fraud industry, the special vulnerabilities of those it targets, and the ease and

frequency with which it obtains hundreds of thousands of dollars per victim. It also reveals successful strategies for combating that industry and the important contributions to that effort by concerned bankers, doctors, reporters and others in the private sector. The cases reveal an increasingly sophisticated global industry that targets each victim with a series of repeat "hits." This tactic--criminals call it "reloading"--sets the elder fraud industry apart from groups that defraud younger individuals. Twelve key age-related fraud vulnerabilities are illustrated in the cases. So, too, are the scammers' skills in mapping their target's unique combination of vulnerabilities and then tailoring their narratives to exploit each one. Most of the cases highlight actual victims, scam artists or fraud fighters. Their individual stories range from inspiring and sometimes comical to frustrating and deeply disturbing. Readers with aging parents, law enforcement

officials, medical professionals, members of the financial industry and others who work with older adults will find it particularly useful.
