Structural Awareness in Complex Product Design - Maik S. Maurer 2007

A Few Thousand Bucks - 2017-03-31

In Ezra's first book, he learned about baseball, girls, cars, drinking, and a lot of hard physical labor, not necessarily in that order. America had not yet been pulled into the war in Europe, and we didn't yet know much about that strange little country across the Pacific, known as Japan. As we pick up the story in book two, Ezra is now in his early 20's, working hard for meager pay, and a long way from his family in Illinois and Indiana. He has been to a handful of states, now he thinks he would like to see the world. He enlists in the military and asks to go to the Philippines. He talks about baseball, girls, cars, and drinking, not necessarily in that order. He gets married on Independence Day, and soon after, his country also goes to war. He was on a troopship heading for the Philippines when news came over the radio about Pearl Harbor. It said, "This is not one of those Orson Wells stories like we had on Halloween a couple years before." It said, "This is the real thing." The ship was ordered back to San Francisco. He eventually does get his wish, to go to the Philippines. Come with Ezra as he becomes the wanderer, the man with Government Issue Gypsy blood. With more than 165 pictures, some in color. THIS VERSION OF THE BOOK IS BLACK AND WHITE

Program Evaluation Theory and Practice, First Edition - Donna M. Mertens 2012-03-01

This engaging text takes an evenhanded approach to major theoretical paradigms in evaluation and builds a bridge from them to evaluation practice. Featuring helpful checklists, procedural steps, provocative

questions that invite readers to explore their own theoretical assumptions, and practical exercises, the book provides concrete guidance for conducting large- and small-scale evaluations. Numerous sample studies—many with reflective commentary from the evaluators—reveal the process through which an evaluator incorporates a paradigm into an actual research project. The book shows how theory informs methodological choices (the specifics of planning, implementing, and using evaluations). It offers balanced coverage of quantitative, qualitative, and mixed methods approaches. Useful pedagogical features include:

- *Examples of large- and small-scale evaluations from multiple disciplines.
- *Beginning-of-chapter reflection questions that set the stage for the material covered.
- *"Extending your thinking" questions and practical activities that help readers apply particular theoretical paradigms in their own evaluation projects.
- *Relevant Web links, including pathways to more details about sampling, data collection, and analysis.
- *Boxes offering a closer look at key evaluation concepts and additional studies.
- *Checklists for readers to determine if they have followed recommended practice.

Stainless Steels for Design Engineers - Michael F. McGuire 2008

The rate of growth of stainless steel has outpaced that of other metals and alloys, and by 2010 may surpass aluminum as the second most widely used metal after carbon steel. The 2007 world production of stainless steel was approximately 30,000,000 tons and has nearly doubled in the last ten years. This growth is occurring at the same time that the production of stainless steel continues to become more consolidated. One result of this is a more widespread need to understand stainless steel with fewer resources to provide that information. The concurrent technical evolution in stainless steel and increasing volatility of raw material prices has made it more important for the engineers and designers who use stainless steel to make sound technical judgments about which stainless steels to use and how to use them.

The 71F Advantage - National Defense University Press 2010-09-01

Includes a foreword by Major General David A. Rubenstein. From the editor: "71F, or "71 Foxtrot," is the AOC (area of concentration) code assigned by the U.S. Army to the specialty of Research Psychology. Qualifying as an Army research psychologist requires, first of all, a Ph.D. from a research (not clinical) intensive graduate psychology program. Due to their advanced education, research psychologists receive a direct commission as Army officers in the Medical Service Corps at the rank of captain. In terms of numbers, the 71F AOC is a small one, with only 25 to 30 officers serving in any given year. However, the 71F impact is much bigger than this small cadre suggests. Army research psychologists apply their extensive training and expertise in the science of psychology and social behavior toward understanding, preserving, and enhancing the health, well being, morale, and performance of Soldiers and military families. As is clear throughout the pages of this book, they do this in many ways and in many areas, but always with a scientific approach. This is the 71F advantage: applying the science of psychology to understand the human dimension, and developing programs, policies, and products to benefit the person in military operations. This book grew out of the April 2008 biennial conference of U.S. Army Research Psychologists, held in Bethesda, Maryland. This meeting was to be my last as Consultant to the Surgeon General for Research Psychology, and I thought it would be a good idea to publish proceedings, which had not been done before. As Consultant, I'd often wished for such a document to help explain to people what it is that Army Research Psychologists "do for a living." In addition to our core group of 71Fs, at the Bethesda 2008 meeting we had several brand-new members, and a number of distinguished retirees, the "grey-beards" of the 71F clan. Together with longtime 71F colleagues Ross Pastel and Mark Vaitkus, I also saw an unusual opportunity to capture some of the history of the Army Research Psychology specialty while

providing a representative sample of current 71F research and activities. It seemed to us especially important to do this at a time when the operational demands on the Army and the total force were reaching unprecedented levels, with no sign of easing, and with the Army in turn relying more heavily on research psychology to inform its programs for protecting the health, well being, and performance of Soldiers and their families."
