*The Art of Being Human* - Michael Wesch 2018-08-07

Anthropology is the study of all humans in all times in all places. But it is so much more than that. "Anthropology requires strength, valor, and courage," Nancy Scheper-Hughes noted. "Pierre Bourdieu called

anthropology a combat sport, an extreme sport as well as a tough and rigorous discipline. ... It teaches students not to be afraid of getting one's hands dirty, to get down in the dirt, and to commit yourself, body and mind. Susan Sontag called anthropology a "heroic" profession." What is the payoff for this heroic journey? You will find ideas that can carry you across rivers of doubt and over mountains of fear to find the the light and life of places forgotten. Real anthropology cannot be contained in a book. You have to go out and feel the world's jagged edges, wipe its dust from your brow, and at times, leave your blood in its soil. In this unique book, Dr. Michael Wesch shares many of his own adventures of being an anthropologist and what the science of human beings can tell us about the art of being human. This special first draft edition is a loose framework for more and more complete future chapters and writings. It serves as a companion to anth101.com, a free and open resource for instructors of cultural anthropology. This 2018 text is a revision of the "first draft edition" from 2017 and includes 7 new chapters.

**Cultural Anthropology: An Applied Perspective** - Gary Ferraro  
2017-01-27

CULTURAL ANTHROPOLOGY: AN APPLIED PERSPECTIVE not only provides a comprehensive overview of the discipline, but also fully integrates the application of the theories, insights, and methods of cultural anthropology to contemporary situations that students -- both

majors and non-majors -- are likely to encounter in their lives. The Eleventh Edition is streamlined (with each chapter trimmed by ten percent), further strengthens its two themes of economics and the environment and community and social responsibility, and speaks more directly to students with a greater number of contemporary examples that deal with non-academic career opportunities and the application of anthropological concepts in the workplace. **Dress as Social Relations** - Vibeke Maria Viestad 2018-10-01

To dress is a uniquely human experience, but practices and meanings of dress vary greatly among people. In a Western cultural tradition, the practice of dressing 'properly' has for centuries distinguished 'civilised' people from 'savages'. Through travel literature and historical ethnographic descriptions of the Bushmen of southern Africa, such perceptions and prejudices have made their mark also on the modern research tradition. Because Bushmen were widely considered to be 'nearly naked' the study of dress has played a limited part in academic writings on Bushman culture. In *Dress as Social Relations* Vibeke Maria Viestad challenges this myth of the nearly naked Bushman and provides an interdisciplinary study of Bushman dress, as it is represented in the archives and material culture of historical Bushman communities. Maintaining a critical perspective, Viestad provides an interpretation of the significance of dress for historical Bushman people. Dress, she argues, formed an embodied practice of social relations between humans, animals and other powerful beings of the Bushman world; moreover, this complex and meaningful practice was intimately related to subsistence strategies and social identity. The historical collections under scrutiny present a wide variety of research material representing different aspects of the bodily practice of dress. Whereas the Bleek & Lloyd archive of oral myths and narratives has become renowned for its great research potential, the artefact collections of Dorothea Bleek and Louis Fourie are much less known and have not earlier been published in a richly illustrated and comprehensive way.

A Bagful of Locusts and the Baboon Woman - David N. Suggs 2002

Not since the publication of Lee's case study on the Dobe Ju/'Hoansi and Turnbull's case study on the Mbuti Pygmies, has there been such an interesting addition to the African cases of the Spindler Case Studies in Cultural Anthropology series. Set in the subSaharan Africa in a contemporary context, this ethnography represents over 12 years of field research that focuses on the popular twin themes of culture change and gender roles amongst the BaKgatla of Botswana.

**The Biological Evolution of Religious Mind and Behavior** - Eckart Voland 2009-08-12

In a Darwinian world, religious behavior - just like other behaviors - is likely to have undergone a process of natural selection in which it was rewarded in the evolutionary currency of reproductive success. This book aims to provide a better understanding of the social scenarios in which selection pressure led to religious practices becoming an evolved human trait, i.e. an adaptive answer to the conditions of living and surviving that prevailed among our prehistoric ancestors. This aim is pursued by a team of expert authors from a range of disciplines. Their contributions examine the relevant physiological, emotional, cognitive and social processes. The resulting understanding of the functional interplay of these processes gives valuable insights into the biological roots and benefits of religion.

*Challenging Gender Norms* - Sharyn Graham Davies 2007

As part of the Case Studies in Cultural Anthropology series, edited by George Spindler and Janice E. Stockard, Sharyn Graham brings us CHALLENGING GENDER NORMS: THE FIVE GENDERS OF INDONESIA. This case study explores the Bugis ethnic group, native to the Indonesian island of Sulawesi, that recognizes five gender categories

rather than the two acknowledged in most societies. The Bugis acknowledge three sexes (female, male, hermaphrodite), four genders (women, men, calabai, and calalai), and a fifth meta-gender group, the bissu. This ethnography presents individuals' stories, opinions and deliberations, grounding discussions of how gendered identities are constructed in a rapidly changing cultural milieu. The rich ethnographic material contained in this book challenges two types of Western theory? queer theory, which tends to focus on sexuality, and feminist theory, which tends to focus on social gender enactment. Neither theory is well-equipped for articulating the complexities of multiple gender identities and a multifarious gender system. By unraveling social negotiations and examining both individual embodiment and the impact of global forces on localized identities, the book proposes a new theory of gender which incorporates appreciation of variously gendered subjectivities.

Nuer Journeys, Nuer Lives - Jon D. Holtzman 2015-09-07

This book examines contemporary migration to the United States

through a surprising and compelling case study - the Nuer of Sudan, whose traditional life represents one of the most important case studies in the history of anthropology. It provides an opportunity to examine issues of current importance within anthropology, such as social change, transnationalism, displacement, and diaspora in an easy to understand manner. In understanding the experiences of the Nuer, students will not only gain insights into the world refugee problem and the role of immigration in the United States, they will also learn about the features of Nuer life which are considered a standard part of the anthropology curriculum. The book juxtaposes elements of Nuer culture which are well-known within anthropology — and featured in most anthropology textbooks — with new developments arising from the immigration of many other Nuer to the U.S. in the 1990s as refugees from civil war in southern Sudan. Consequently, this book will fit well within existing anthropology curricula, while providing an important update on descriptions of traditional life.

[Land of the Tejas](#) - John Wesley Arnn 2012-12-01

Combining archaeological, historical, ethnographic, and environmental data, *Land of the Tejas* represents a sweeping, interdisciplinary look at Texas during the late prehistoric and early historic periods. Through this revolutionary approach, John Wesley Arnn reconstructs Native identity and social structures among both mobile foragers and sedentary agriculturalists. Providing a new methodology for studying such populations, Arnn describes a complex, vast, exotic region marked by sociocultural and geographical complexity, tracing numerous distinct peoples over multiple centuries. Drawing heavily on a detailed analysis of Toyah (a Late Prehistoric II material culture), as well as early European documentary records, an investigation of the regional environment, and comparisons of these data with similar regions around the world, *Land of the Tejas* examines a full scope of previously overlooked details. From the enigmatic Jumano Indian leader Juan Sabata to Spanish friar Casanas's 1691 account of the vast Native American Tejas alliance, Arnn's study shines new light on Texas's poorly understood past and debunks long-held misconceptions of prehistory and history while proposing a provocative new approach to the process by which we attempt to reconstruct the history of humanity.

**Sexual Violence and Armed Conflict** - Janie L. Leatherman 2013-04-26

Every year, hundreds of thousands of women become victims of sexual violence in conflict zones around the world; in the Democratic Republic of Congo alone, approximately 1,100 rapes are reported each month. This book offers a comprehensive analysis of the causes, consequences and responses to sexual violence in contemporary armed conflict. It explores the function and effect of wartime sexual violence and examines the conditions that make women and girls most vulnerable to these acts both before, during and after conflict. To understand the motivations of the men (and occasionally women) who perpetrate this violence, the book analyzes the role played by systemic and situational factors such as patriarchy and militarized masculinity. Difficult questions of accountability are tackled; in particular, the case of child soldiers, who often suffer a double victimization when forced to commit sexual atrocities. The book concludes by looking at strategies of prevention and protection as well as new programs being set up on the ground to support the rehabilitation of survivors and their communities. Sexual violence in war has long been a taboo subject but, as this book shows, new and courageous steps are at last being taken at both local and international level - to end what has been called the "greatest silence in history".
