Hav - Jan Morris 2011-08-30

A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published *Last Letters from Hav* in 1985, it was short-listed for the Booker Prize. Here it is joined by *Hav of the Myrmidons*, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.

Gipsy Moth Circles the World - Sir Francis Chichester 2016-06-16

From time immemorial, few narrative genres have had the power to so stir the emotions or captivate the imagination as the true account of a lone adventurer's triumph over the titanic forces of nature. Among the handful of such tales to emerge in the twentieth century, one of the most enduring surely must be Sir Francis Chichester's account of his solitary, nine-month journey around the world in his 53-foot ketch Gipsy Moth IV. The story of how the sixty-five-year-old navigator singlehandedly circumnavigated the globe, the whole way battling hostile seas as well as his boat's numerous design flaws, is a tale of superhuman tenacity and endurance to be read and reread by sailors and armchair adventurers alike. First published in 1967, just months after the completion of Chichester's historic journey, Gipsy Moth Circles the World was an instant international best-seller. It inspired the first solo around-the-world race and remains a timeless testament to the spirit of adventure. Francis Chichester's 1967 singlehanded circumnavigation set a blazing record for speed. He completed the voyage with just one stop and 226 days at sea. It was an amazing performance; that he was sixty-five years

old made it the more so. Chichester then sat down to write one of the great narratives of modern voyaging.

Voyaging Under Power, 4th Edition - Robert P. Beebe 2012-12-13

The passagemaking bible updated to help you live your long-distance voyaging dreams First published in 1975, Robert Beebe's Voyaging Under Power revolutionized long-distance cruising, encouraging powerboaters to enjoy what was once exclusive to sailboats and their crews: crossing oceans to exotic, interesting, and beautiful places in comfort with a minimum of problems and expense. Now power-cruising couple Denis and Mary Umstot, whose interest in power voyaging was ignited by Beebe's work, have updated Voyaging Under Power for the twenty-first century. The much anticipated Voyaging Under Power, Fourth Edition, includes Beebe's original wisdom and philosophy of passagemaking, as well as his groundbreaking thoughts on vessel stability and fuel monitoring. Fourteen new chapters provide insights into a range of additional topics vital for ocean passages and passagemakers, including: Seaworthiness, stability, and other design concepts Options for stabilizing passagemakers including paravanes, active and passive fins, and antiroll tanks Selecting and understanding the critical systems for long-distance voyaging A decision process for choosing a new boat or analyzing the suitability of a used boat An examination of passagemaking models from Nordhavn, Kadey-Krogen, Seahorse, and Dashew, as well as the designs of Stephen Seaton, Michael Kasten, George Buehler, Dave Gerr, and others Highlights of successful and proven passagemakers of the past, including examples from eleven builders and designers First-hand accounts from passagemakers around the globe, including the Mediterranean, Black Sea, South America, South Pacific, Madagascar, and beyond Tips on understanding and predicting weather and waves and what to do in a storm Understanding offshore safety issues, including how to avoid trouble and cross oceans in comfort Choosing and training crew as well as communication tips for a better cruising experience Preparing for and resolving maintenance problems at sea and in distant anchorages "The list of contributors shows the quality of experience in the pages of this

fourth edition. Anyone wanting to join, or at least understand the elements of, the long-distance passagemaking lifestyle will find a great deal of knowledge that is realistic, useful, and timely. You'll keep *Voyaging Under Power* on your pilothouse bookshelf (or its electronic equivalent) for years to come." -- Bill Parlatore, Founder of PassageMaker Magazine "Captain Beebe applied Navy experience, technical creativity, and an open mind to his self-appointed task of inventing the long-range power cruiser. He embraced ideas that others discarded as readily as he rejected solutions others found indispensable. His path, like all innovators, was the uncommon one and his selfless sharing in *Voyaging Under Power* literally launched a thousand ships. This Fourth Edition of Beebe's classic draws on new ideas and the accumulated wisdom of today's yacht designers and experienced ocean voyagers to further Beebe's cause and liberate thousands more from the tyranny of dry land." -- Michael Jones, Ocean Traveler, Ship Design Collaborator, and Proud Parent of Google Earth

**Althusser and Law** - Laurent de Sutter 2013-03-05

Althusser and Law is the first book specifically dedicated to the place of law in Louis Althusser's philosophy. The growing importance of Althusser's philosophy in contemporary debates on the left has - for practical and political, as well theoretical reasons - made a sustained consideration of his conception of law more necessary than ever. As a form of what Althusser called 'Ideological State Apparatuses', law is at the forefront of political struggles: from the destruction of Labour Law to the exploitation of Patent Law; from the privatisation of Public Law to the ongoing hegemony of Commercial Law; and from the discourse on Human Rights to the practice of judicial courts. Is Althusser still useful in helping us to understand these struggles? Does he have something to teach us about how law is produced, and how it is used and misused? This collection demonstrates that Althusser's ideas about law are more

important, and more contemporary, than ever. Indeed, the contributors to Althusser and Law argue that Althusser offers a new and invaluable perspective on the place of law in contemporary life.

**L. Gardner and Sons Limited** - Graham Edge 2002

Surprisingly very little has been written about the famous Gardner engine company whose diesel engines were renowned for economy, reliability, and longevity. This company was a true pioneer of diesel engine propulsion for automotive purposes, but it also had considerable influence in industrial, marine, and rail traction fields. After some seven years of research this is the full history of Gardner's from its origins in 1868 to its virtual demise in the mid-1990s. The book has been written with input from Dion Houghton and Paul Gardner and much of the information has never been made public knowledge before. Containing 224 pages of very informative text and appendices and illustrated with over 260 historic photographs.

**Bratva Vow** - Shanna Bell 2021-11-25

Monsters aren't born, they are created. Katya. After spending years in hospitals, I can finally have a life. Then my mom abandons me to the care of the most breathtaking man I've ever seen. He's like the embodiment of Death, a Greek tragedy waiting to unfold. Can I break through the darkness that has a hold on him? Kristoff. My soul is black as tar. I'm a cold-hearted killer, the leader of my own Bratva. What mother in her right mind would leave a teenage daughter on my doorstep? A desperate one who's willing to make a deal with the devil. Note: This is the free prequel novella to the Bratva Royalty duet. Trigger warning: this book contains some traumas and scenes of violence. ### **Inshore Craft** - Basil Greenhill 2013-04-15

This comprehensive reference work describes and illustrates some 200 types of inshore craft that once fished and traded, under oar and sail, around the coasts of the British Isles. The types are arranged by coastal area and each is described in terms of its shape and design, fitness for location and purpose, build, evolution and geographical distribution. Details of dimensions, rig, building materials, seamanship and the survival of examples are given where known, while hundreds of line drawings and photographs show the vessels in their original forms. A team of twelve experts describe all these boat types and, in addition, there are introductions to the main geographic areas outlining the physical environments, fisheries and other uses of the sea that have influenced boat design; maps of all the areas show ports and physical features. At the beginning of the last century sail and oar dominated fisheries and local trade: one hundred years later those craft have all but vanished. This book brings alive for maritime historians and enthusiasts, traditional boat sailors, modelmakers, and all those with an interest in local history, the vast array of craft that were once such a significant feature of our inshore seas. *Inshore Craft* is a spectacular achievement—*Wooden Boat Magazine*

### *Kid Carolina* - Heidi Schnakenberg 2010-03-10

The Reynolds tobacco family was an American dynasty like the Rockefellers, Vanderbilts, and Astors. R.J. "Dick" Reynolds Jr. was born into privilege and decadence, but his disastrous personal life eventually destroyed almost every relationship he cherished and stole his health at a relatively young age. Dick Reynolds was dubbed "Kid Carolina" when as a teenager, he ran away from home and stowed away as part of the crew on a freighter. For the rest of his life he'd turn to the sea, instead of his friends and family, for comfort. Dick disappeared for months at a time, leading the dual life of a business mogul and troubled soul, both of which became legendary. Despite his personal demons, Dick played a pivotal role in shaping twentieth-century America through his business

savvy and politics. He developed Delta and Eastern Airlines, single handedly secured FDR's third term election, and served as mayor of Winston-Salem, where his tobacco fortune was built. Yet below the gilded surface lay a turbulent life of alcoholism, infidelity, and loneliness. His chaotic existence culminated in a surprise fourth marriage and was shortly followed by a strange death, the end of a life every bit as awe-inspiring as it was disturbing.

### *Ultimate Guide to Tractors* - Jim Glastonbury 2010-04-15

Tractors, unique in their uses, have undergone thousands of changes over the years to become one of the most handy machines one can have, in any form. There have been so many amazing discoveries and inventions in the history of mankind that it would be difficult to place them in order of importance. Many have revolutionized the way society works, and this could also be said of the humble tractor. Without it, it would be impossible to produce the vast amounts of food required by society today, and for this reason alone it must qualify as a small but essential cog in the vast machine that is the modern world. The earliest pioneer machines used steam traction rather than the new-fangled internal combustion engines, but technological break-throughs came thick and fast: diesel engines, Harry Ferguson's revolutionary three-point-hitch, sophisticated hydraulics, and the wonders of electronics in our own time. Henry Ford made tractors that small farmers could afford, International Harvester pioneered the 1920s Farmall - the first tractor able to cope with row crops - while Allis-Chalmers introduced pneumatic rubber tires in the 1930s. Nearly 30 years later the Steiger brothers invented an entirely new breed, the giant four-wheel-drive articulated super-tractor. This book covers more than a century of tractor-making and features tractors that are regarded with something like affection - Case, Fordson, Massey-Ferguson, Minneapolis-Moline, Versatile - they are all here and many others. Tractors of all shapes, sizes, ages, colors and types - they are here in all their resplendent glory.

*Freud's Mistress* - Karen Mack 2014-06-03

"A thrilling story of seduction, betrayal, and loss, *Freud's Mistress* will titillate fans of *Memoirs of a Geisha* and *The Other Boleyn*

*Girl*."—Booklist In fin-de-siècle Vienna, it was not easy for a woman to find fulfillment both intellectually and sexually. But many believe that Minna Bernays was able to find both with one man—her brother-in-law, Sigmund Freud. At once a portrait of two sisters—the rebellious, independent Minna and her inhibited sister, Martha—and of the

compelling and controversial doctor who would be revered as one of the twentieth century's greatest thinkers, *Freud's Mistress* is a novel rich with passion and historical detail and "a portrait of forbidden desire [with] a thought-provoking central question: How far are you willing to go to be happy?"\* \*Publishers Weekly
