Clinical Medical Assisting Online to Accompany Bonewit: Clinical Procedures for Medical Assistants (User Guide and Access Code) - Kathy Bonewit-West 2004-12-10

State-of-the art courseware technology allows users to benefit from a complete, "ready-to-use" distance learning course or interactive classroom supplement on clinical medical

assisting. *Clinical Medical Assisting Online* combines content, application, assessment, and communication tools into one unique learning tool. The online component guides students through the application of content in a "virtual externship," directing them to read from the text, interact with a cast of doctors, patients, and medical assistants, and apply key clinical concepts and skills in a realistic medical office. Students will also be exposed to different patient scenarios to take vital signs, administer medications, perform a venipuncture, and more. This media-rich, contextual environment allows students to apply the content and practice the skills and competencies they must demonstrate and master to excel in the real world. Contains coverage of all clinical competencies included in curricula of both the Commission on Accreditation of Allied Health Education Programs (CAAHEP) and the Accrediting Bureau of Health Education Schools (ABHES). Virtual mentor, with content written in the first person,

acts as an externship supervisor addressing the student. Periodic questions throughout allow students to check their comprehension and learn from feedback, keeping them actively engaged with the material. Using interactivity and feedback throughout, the student learns "just-in-time" about various clinical procedures; i.e., at the point in time when they actually need to know - the way many adults prefer to learn. Competency-based activities give the student an opportunity to apply skills in a "safe" virtual environment before demonstrating them before their instructor in a lab setting. An extensive glossary of definitions and audio pronunciations builds student confidence; where appropriate, each term is hotlinked within the online content. Course management system (that is, either Evolve, Blackboard, or WebCT learning systems) includes automatic scoring and gradebook for the instructor and real-time chat, calendar, e-mail, bulletin board, and more for the class as a whole.

Virtual Medical Office for Clinical Procedures for Medical Assistants - Kathy Bonewit-West 2007-04

Gain realistic experience in a physician's office without leaving the classroom! By using Elsevier's Virtual Medical Office learning system an Elsevier textbook, a study guide, and interactive software students develop critical thinking and decision-making skills they'll need in their externships and on the job. In Virtual Medical Office, students experience patient care from check-in through check-out, exploring all national curriculum competencies. It shows how to manage different patients and why. Each study guide lesson directs the student through the textbook and software and presents exercises focused on one or two medical assisting competencies at a time based on what they experience. Realistic software simulations of handling a difficult patient, setting up the exam room, and many more, bridge the gap between the classroom and the real world.

Money-saving package with the textbook is also available. Search ISBN 1-4160-4175-3. 15 unique cases promote understanding of how the competencies established by ABHES (Accrediting Bureau of Health Education Schools) and CAAHEP (Commission on Accreditation of Allied Health Education Programs) come into play in the workplace. More than two hours of video clips highlight the communication and professionalism competencies of patient care. Realistic information resources are shown, such as medical records for each case, an office policy manual, a fee schedule, a daysheet, and more. Performance summaries allow students to compare their decisions for each case to those of an expert and evaluate any differences between the two. A study guide: Complements textbook content through lessons that correlate reading assignments with patients in the virtual practice. Focuses on one or two competencies in each lesson, to create brief, manageable learning

experiences. Demonstrates how all CAAHEP and ABHES medical assisting competencies come into play in the workplace. Promotes active learning as students collect information from a variety of sources to make patient care decisions. Encourages critical thinking as students discuss and critique the performance of the medical assistants in the videos. Augments knowledge of HIPAA by directing students to compare the policy manual, the contents of each case's medical record, and what actually happens in the videos. Makes lessons available online, allowing students to complete their assignments and submit them electronically to their instructor.

[Virtual Medical Office for Clinical Procedures for Medical Assistants \(Access Card\)](#) - Kathy Bonewit-West 2014-02-28

Develop the critical thinking and decision-making skills you need to confidently succeed in practice with Virtual Medical Office. This

innovative learning system simulates the experience of working in a real medical office and integrates content from your Clinical Procedures for Medical Assistants, 9th Edition textbook with an engaging study guide and interactive lessons to enable you to make decisions and learn from your mistakes in a realistic and completely safe environment. Integrates text reading assignments with study guide lessons that direct you to the VMO software online. Software includes 15 unique cases, each designed to highlight a different combination of medical assisting competencies as defined by CAAHEP and ABHES. Immerses you in a realistic yet safe environment. Software contains complete medical charts for each patient, including extensive back histories, giving you plenty of material to use for practicing coding and filing claims. Each software case includes 5 videos (one at check-in, three in the exam room, and one at check-out), offering you a rare opportunity to step into the

shoes of billable service providers and compare what is documented against what actually happens in the video. Interface tested and designed to match computer experience level of coding and billing students. Performance summary allows you to compare your decisions for each case with the expert's and evaluate any differences between the two. Each study guide lesson focuses on a few objectives, to create brief (20-30 minutes of "seat time"), manageable learning experiences. Promotes active learning as you collect information from a variety of sources to make decisions about each case's care. Encourages critical thinking as you discuss and critique the performance of the medical assistants in the videos. Study Guide Lessons available online allows you to complete your assignments and submit them electronically to your instructor. NEW! Updated content reflects revisions of the Bonewit-West Clinical 9th Edition textbook.
