The King in Yellow - Robert William Chambers 2020-09-28

Toward the end of the year 1920 the Government of the United States had practically completed the programme, adopted during the last months of President Winthrop's administration. The country was apparently tranquil. Everybody knows how the Tariff and Labour questions were settled. The war with Germany, incident on that country's seizure of the Samoan Islands, had left no visible scars upon the republic, and the temporary occupation of Norfolk by the invading army had been forgotten in the joy over repeated naval victories, and the subsequent ridiculous plight of General Von Gartenlaube's forces in the State of New Jersey. The Cuban and Hawaiian investments had paid one hundred per cent and the territory of Samoa was well worth its cost as a coaling station. The country was in a superb state of defence. Every coast city had been well supplied with land fortifications; the army under the parental eye of the General Staff, organized according to the Prussian system, had been increased to 300,000 men, with a territorial reserve of a million; and six magnificent squadrons of cruisers and battle-ships patrolled the six stations of the navigable seas, leaving a steam reserve amply fitted to control home waters. The gentlemen from the West had at last been constrained to acknowledge that a college for the training of diplomats was as necessary as law schools are for the training of barristers; consequently we were no longer represented abroad by incompetent patriots. The nation was prosperous; Chicago, for a moment paralyzed after a second great fire, had risen from its ruins, white and imperial, and more beautiful than the white city which had been built for its plaything in 1893. Everywhere good architecture was replacing bad, and even in New York, a sudden craving for decency had swept away a great portion of the existing horrors. Streets had been widened, properly paved and lighted, trees had been planted, squares laid out, elevated structures demolished and underground roads built to replace them. The new government buildings and barracks were fine bits of architecture, and the long system of stone quays which completely surrounded the island had been turned into parks which proved a god-send to the population. The subsidizing of the state theatre and state opera brought its own reward. The United States National Academy of Design was much like European institutions of the same kind. Nobody envied the Secretary of Fine Arts, either his cabinet position or his portfolio. The Secretary of Forestry and Game Preservation had a much easier time, thanks to the new system of National Mounted Police. We had profited well by the latest treaties with France and England; the exclusion of foreign-born Jews as a measure of self-preservation, the settlement of the new independent negro state of Suanee, the checking of immigration, the new laws concerning naturalization, and the gradual centralization of power in the executive all contributed to national calm and prosperity. When the Government solved the Indian problem and squadrons of Indian cavalry scouts in native costume were substituted for the pitiable organizations tacked on to the tail of skeletonized regiments by a former Secretary of War, the nation drew a long sigh of relief. When, after the colossal Congress of Religions, bigotry and intolerance were laid in their graves and kindness and charity began to draw warring sects

together, many thought the millennium had arrived, at least in the new world which after all is a world by itself.

United States Army GHQ Maneuvers of 1941 (Paperbound Edition) - Christopher Richard Gabel 1992

The U.S. Army GHQ Maneuvers of 1941 is a masterful study of the largest military training exercises ever conducted by a military organization attempting to mobilize and modernize simultaneously during a rapidly changing international security environment. As suggested by Christopher R. Gabel, the maneuvers had an incalculable influence on the development of the American force structure in World War II, giving Army formations experience in teamwork and combined arms. Viewed by Army Chief of Staff George C. Marshall as the "combat college for troop leading" for the rising crop of field-grade officers, they also served to test emerging assumptions about doctrine, organization, and equipment. Gabel's work assumes its rightful place as an important and useful addition to the body of historical literature on military training. The evolution of training in the U.S. Army, particularly the linkage between maneuvers and changes in doctrine and organization, is worthy of reflection by military students and those with an interest in maneuvers as field laboratories for simulating large-scale engagements.

The Blacks of Premodern China - Don J. Wyatt 2012-02-28

Premodern Chinese described a great variety of the peoples they encountered as "black." The earliest and most frequent of these encounters were with their Southeast Asian neighbors, specifically the Malaysians. But by the midimperial times of the seventh through seventeenth centuries C.E., exposure to peoples from Africa, chiefly slaves arriving from the area of modern Somalia, Kenya, and Tanzania, gradually displaced the original Asian "blacks" in Chinese consciousness. In *The Blacks of Premodern China*, Don J. Wyatt presents the previously unexamined story of the earliest Chinese encounters with this succession of peoples they have historically regarded as black. A series of maritime expeditions along the East African coastline during the early fifteenth century is by far the best known and most documented episode in the story of China's premodern interaction with African blacks. Just as their Western contemporaries had, the Chinese aboard the ships that made landfall in Africa encountered peoples whom they frequently classified as savages. Yet their perceptions of the blacks they met there differed markedly from those of earlier observers at home in that there was little choice but to regard the peoples encountered as free. The premodern saga of dealings between Chinese and blacks concludes with the arrival in China of Portuguese and Spanish traders and Italian clerics with their black slaves in tow. In Chinese writings of the time, the presence of the slaves of the Europeans becomes known only through sketchy mentions of black bondservants. Nevertheless, Wyatt argues that the story of these late premodern blacks, laboring anonymously in China under their European masters, is but a more familiar extension of the previously untold story of their ancestors who toiled in Chinese servitude perhaps in excess of a millennium earlier.

The Canadian Encyclopedia - James H. Marsh 1999

This edition of "The Canadian Encyclopedia is the largest, most comprehensive book ever published in Canada for the general reader. It is COMPLETE: every aspect of Canada, from its rock formations to its rock bands, is represented here. It is UNABRIDGED: all of the information in the four red volumes of the famous 1988 edition is contained here in this single volume. It has been EXPANDED: since 1988 teams of researchers have been diligently fleshing out old entries and recording new ones; as a result, the text from 1988 has grown by 50% to over 4,000,000 words. It has been UPDATED: the researchers and contributors worked hard to make the information as current as possible. Other words apply to this extraordinary work of scholarship: AUTHORITATIVE, RELIABLE and READABLE. Every entry is compiled by an expert. Equally important, every entry is written for a Canadian reader, from the Canadian point of view. The finished work - many years in the making, and the equivalent of forty average-sized books - is an extraordinary storehouse of information about our country. This book deserves pride of place on the bookshelf in every Canadian Home. It is no accident that the cover of this book is based on the Canadian flag. For the proud truth is that

this volume represents a great national achievement. From its formal inception in 1979, this encyclopedia has always represented a vote of faith in Canada; in Canada as a separate place whose natural worlds and whose peoples and their achievements deserve to be recorded and celebrated. At the start of a new century and a new millennium, in an increasingly borderless corporate world that seems ever more hostile to national distinctions and aspirations, this "Canadian Encyclopedia is offered in a spirit of defiance and of faith in our future. The statistics behind this volume are staggering. The opening sixty pages list the 250 Consultants, the roughly 4,000 Contributors (all experts in the field they describe) and the scores of researchers, editors, typesetters, proofreaders and others who contributed their skills to this massive project. The 2,640 pages incorporate over 10,000 articles and over 4,000,000 words, making it the largest - some might say the greatest - Canadian book ever published. There are, of course, many special features. These include a map of Canada, a special page comparing the key statistics of the 23 major Canadian cities, maps of our cities, a variety of tables and photographs, and finely detailed illustrations of our wildlife, not to mention the colourful, informative endpapers. But above all the book is "encyclopedic" - which the "Canadian Oxford Dictionary describes as "embracing all branches of learning." This means that (with rare exceptions) there is satisfaction for the reader who seeks information on any Canadian subject. From the first entry "A mari usque ad mare - "from sea to sea" (which is Canada's motto, and a good description of this volume's range) to the "Zouaves (who mustered in Quebec to fight for the beleaguered Papacy) there is the required summary of information, clearly and accurately presented. For the browser the constant variety of entries and the lure of regular cross-references will provide hours of fascination. The word "encyclopedia" derives from Greek expressions alluding to a grand "circle of knowledge." Our knowledge has expanded immeasurably since the time that one mind could encompass all that was known. Yet now Canada's finest scientists, academics and specialists have distilled their knowledge of our country between the covers of one volume. The result is a book for every Canadian who values learning, and values Canada.

The Avro Arrow - Palmiro Campagna 2019-02-16

Declassified government records shed additional light on the cancellation and subsequent destruction of the Avro Arrow. The controversial cancellation of the Avro Arrow — an extraordinary achievement of Canadian military aviation — continues to fire debate today. When the program was scrapped in 1959, all completed aircraft and those awaiting assembly were destroyed, along with tooling and technical information. Was abandoning the program the right decision? Did Canada lose more than it gained? Brimming with information to fill in gaps in the Arrow's troubled history, and with an update on the latest search for the scale models launched deliberately into Lake Ontario as part of the test program, *The Avro Arrow* tackles the outstanding questions head on.

Global Trends 2040 - National Intelligence Council 2021-03

"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) *Global Trends 2040-A More Contested World* (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Two Centuries of US Military Operations in Liberia - Niels Hahn 2020-03-31

This book reviews the history of the United States-Liberia relations from the early 1820s to 2015, with particular attention paid to the role of the US armed forces. Contrary to most literature on the genesis and development of Liberia, this book demonstrates how US military power has been the primary influence shaping Liberia's history. This includes the role played by the US military in the founding of Liberia, the protection of the country during the European formal colonial era, multiple covert operations in securing US-friendly administrations in Liberia, and direct military interventions when necessary to secure American interests in the region.

U.S. Army Signals Intelligence In World War II - James L. Gilbert 2004-06-01

This book is part of the Army historical community's commemoration of the fiftieth anniversary of World War II. American victory in that conflict was brought about not only by the valor of our fighting men and the immensity of our productive capacity, but also by the availability of superb military intelligence. Much of this intelligence came from the ability of our armed forces to intercept and decipher the most secret communications of their adversaries. For many years security considerations prevented any public mention of these successes in the official histories. Now much of the story can be told. To preserve the memory of the Army's role in this intelligence war, the U. S. Army Center of Military History has joined with the History Office, U. S. Army Intelligence and Security Command (INSCOM), to publish this collection of documents on Army signals intelligence in World War II. INSCOM carries on the heritage of the Army's World War II Signal Security Agency, which by breaking the Japanese diplomatic ciphers and military codes helped speed the way of our forces to victory. The book is intended both for an Army audience and for the general public - including those World War II veterans who participated in the signals intelligence war and who for so many years were constrained to keep their contributions secret. The security barriers have now been lifted, and the Army is proud to acknowledge those contributions. Harold W. Nelson Charles F. Scanlon Brigadier General, US Army Major General, US Army Chief of Military History Commanding General, US Army Intelligence and Security Command

Night of the Bayonets - Lee Eric 2020-12-02

In the final days of World War II in Europe, Georgians serving in the Wehrmacht on Texel island off the Dutch coast rose up and slaughtered their German masters. Hitler ordered the island to be retaken and fighting continued for weeks, well after the war's end. The uprising had its origins in the bloody history of Georgia in the twentieth century, a history that saw the country move from German occupation, to three short years of independence, to Soviet rule after it was conquered by the Red Army in 1921. A bloody rebellion against the Soviets took place in 1924, but it remained under Russian Soviet rule. Thousands of Georgians served in the Soviet forces during World War II and among those who were captured, given the choice of "starve or fight", some took up the German offer to don Wehrmacht uniforms. The loyalty of the Georgians was always in doubt, as Hitler himself suspected, and once deployed to the Netherlands, the

Georgian soldiers made contact with the local Communist resistance. When the opportunity arose, the Georgians took the decision to rise up and slaughter the Germans, seizing control of the island. In just a few hours, they massacred some 400 German officers using knives and bayonets to avoid raising the alarm. An enraged Hitler learned about the mutiny and ordered the Germans to fight back, showing no mercy to either the Georgians or the Dutch civilians who hid them. It was not until 20 May, 12 days after the war had ended, that Canadian forces landed on the island and finally put an end to the slaughter. Eric Lee explores this fascinating but little known last battle of the Second World War: its origins, the incredible details of the battle and its ongoing legacy.

Diary of R.C.A.F. Serviceman Michael Kutyn - Greg Kutyn 2010-06

"A life story, beautifully narrated and illustrated with a wealth of photos and maps, is a captivating account of the drama of the twentieth century. From your proud roots in a devoted family of immigrants to the Canadian West, through your dedicated sacrifices during World War II, to your present status as a venerated patriarch of a lovely family and an honoured citizen of Canada, the Diary has a personal feel to it, even though it offers a panoramic sweep through events that shaped the contemporary world. I confess that when I began to read the book this afternoon, I could not put it down until I had reached the final pages

A Shameful Act - Taner Akcam 2007-08-21

A landmark assessment of Turkish culpability in the Armenian genocide, the first history of its kind by a Turkish historian In 1915, under the cover of a world war, some one million Armenians were killed through starvation, forced marches, forced exile, and mass acts of slaughter. Although Armenians and world opinion have held the Ottoman powers responsible, Turkey has consistently rejected any claim of intentional genocide. Now, in a pioneering work of excavation, Turkish historian Taner Akcam has made extensive and unprecedented use of Ottoman and other sources to produce a scrupulous charge sheet against the Turkish authorities. The first scholar of any nationality to have mined the significant evidence—in Turkish military and court records, parliamentary minutes, letters, and eyewitness accounts—Akcam follows the chain of events leading up to the killing and then reconstructs its systematic orchestration by coordinated departments of the Ottoman state, the ruling political parties, and the military. He also probes the crucial question of how Turkey succeeded in evading responsibility, pointing to competing international interests in the region, the priorities of Turkish nationalists, and the international community's inadequate attempts to bring the perpetrators to justice. As Turkey lobbies to enter the European Union, Akcam's work becomes ever more important and relevant. Beyond its timeliness, *A Shameful Act* is sure to take its lasting place as a classic and necessary work on the subject.

Canada and the Battle of Vimy Ridge, 9-12 April 1917 - Brereton Greenhous 2017

"Ninety years ago, Canadians defined who they were based on their region, province, culture and ethnic communities. Our national identity was little more than a vague notion. At that time, when Canada was still carving out its place on the world stage, our country was called to fight alongside the Allies during the First World War. History would remember the victories and courage of our soldiers, but if there was one battle that would forge our national identity, it was the Battle of Vimy Ridge"--Page [10].

The Transportation Corps - Joseph Bykofsky 1957

The Book of Negroes - Lawrence Hill 2010

Abducted from her West African village at the age of eleven and sold as a slave in the American South, Aminata Diallo thinks only of freedom - and of finding her way home again. After escaping the plantation, torn from her husband and child, she passes through Manhattan in the chaos of the Revolutionary War, is shipped to Nova Scotia, and then joins a group of freed slaves on a harrowing return odyssey to Africa. Lawrence Hill's epic novel, winner of the Commonwealth Writers' Prize, spans three continents and six

decades to bring to life a dark and shameful chapter in our history through the story of one brave and resourceful woman.
