American Justice - James Neff 2017-10-03

Three shocking tales of violence, intrigue, and the search for truth from a two-time Edgar Award finalist and Ann Rule's "favorite true-crime writer." In this riveting collection, prize-winning investigative journalist James Neff examines the Dr. Sam Sheppard murder mystery; the terrifying pursuit of a serial rapist in Cleveland, Ohio; and the spectacular rise and fall of Teamster boss Jackie Presser. *The Wrong Man*: In 1954, in suburban Cleveland, Dr. Sam Sheppard's wife, Marilyn, was beaten to death in their home. Investigators, the press, the public, and the courts worked in lockstep to convict Sheppard. Sentenced to life in prison, he served nearly a decade before he was acquitted in a retrial. Culled from DNA evidence, testimony that was never heard in court, prison diaries, and interviews with key players, *The Wrong Man* makes a convincing case for Sheppard's innocence and reveals the identity of the true killer. "Gripping and meticulously researched . . . [A] first-degree murder mystery" (People). *Unfinished Murder*: From 1983 to 1988, serial rapist Ronnie Shelton preyed on the women of Cleveland. Dubbed the West Side Rapist, he spied on his victims, stalked them, and brutally assaulted them in their homes. Arrested at least fifteen times for other crimes, Shelton slipped through the cracks of the justice system so often it seemed he'd never be caught—until his courageous victims united to put him behind bars. A finalist for the Edgar Award, *Unfinished Murder* is based on more than 150 interviews with the survivors, the police, psychiatrists, and Shelton himself, who was sentenced to 3,195 years in prison, the longest in Ohio state history. *Mobbed Up*: As the president of America's largest labor union, Jackie Presser navigated a dangerous balancing act with the Teamsters, the Mafia, and the Justice Department. At the same time he was taking orders from New York mob boss Fat Tony Salerno, Presser was serving as the FBI's top informant on organized crime. Drawing on thousands of pages of classified files, Neff follows the trail of greed and hubris all the way to the Nixon and Reagan White Houses, where Presser was treated as a valued friend. "[A] damning tale . . . A portrait of pervasive corruption that should concern anyone who cares about the way this country works" (Los Angeles Times).

The Wrong Man - James Neff 2015-04-07

This Edgar Award finalist—one of Ann Rule's top five true-crime picks—is

a "gripping" definitive account of the Dr. Sam Sheppard murder case (The New York Times Book Review). "My God . . . I think they've killed Marilyn!" At 5:40 a.m. on July 4, 1954, the mayor of Bay Village, a small suburb of Cleveland, Ohio, received a frantic phone call from his neighbor Dr. Sam Sheppard. The news was too terrible to comprehend: Marilyn, Sam's lovely wife, was dead, her face and torso beaten beyond recognition by an unknown assailant who had knocked Sam unconscious and escaped just before dawn. In the adjacent bedroom, Chip, the Sheppards' seven-year-old son, had slept through the entire ordeal. Almost immediately, the police began to suspect Sam Sheppard. The local press rushed to cast judgment on the handsome, prosperous doctor. After a misguided investigation, Sheppard was arrested and charged with murder. Sentenced to life in prison, he served for nearly a decade before he was acquitted in a retrial. Until his death, he maintained his innocence. Culled from DNA evidence, testimony that was never heard in court, prison diaries, and interviews with the Sheppard family and other key players, *The Wrong Man* makes a convincing case for Sheppard's innocence and reveals the identity of the real killer. This ebook contains ten photographs not included in previous editions.

Textbook of Acute Trauma Care - Peter D. Lax 2022

This book provides a systemic approach to acute trauma care in line with the ABCDE paradigm and up-to-date information on assessing and managing major trauma from the pre-hospital to the rehabilitation phase. The book's early sections are dedicated to identifying and managing pathology caused by massive haemorrhage, airway, breathing, circulation or neurological trauma and examining the current evidence base relating to their management. The book then builds from fundamental skills to advanced interventions so that each level of responder can identify and implement aspects of clinical practice that will be of benefit to them at their stage. This approach also explains advanced interventions that may be executed subsequently, explaining

how each phase of care sits together. This has a further benefit of producing seamless care for patients by practitioners of different levels using this book as a reference point. Later sections deal with specifics of in-hospital trauma care by specialty, including the explanation of decision making processes by specialties, use of diagnostic and interventional radiology, rehabilitation and psychological aspects of trauma care. The Textbook of Acute Trauma Care also focuses on non-clinical issues relevant to trauma such as training and logistics of retrieval and repatriation, aviation considerations in HEMS, legal and forensic evidence considerations and ethical issues dealing with trauma patients. In addition, the book contains chapters from international experts on cognitive and human factors relating to healthcare and suggests strategies for training and minimising errors. This book is an essential resource for all grades of practitioner, from first responders to Consultant/Attending Physician level providers.

Self Assessment in Musculoskeletal Pathology X-rays - Karen Sakhivel-Wainford 2011

Today many radiographers are trained to report on trauma radiographs. Universities are also training student radiographers to comment on trauma radiographs. It is useful, in some cases essential, that whilst we review the trauma radiograph we also recognise and note any appropriate pathology. For instance a patient attends Accident and Emergency with pain in their knee for several weeks following trauma; the radiographs show no fracture but some signs of a malignant bony

tumour, which on further investigation is an osteo sarcoma. As with the other books in the series, this book starts with several chapters by different authors followed by a series of 100 cases. Self-assessment in Musculoskeletal Pathology X-rays will appear to a variety of health professions and like others in the series, is intended to accompany a reporting course and to be used alongside further research and reading.
