The Crime Numbers Game - John A. Eterno 2017-07-27

In the mid-1990s, the NYPD created a performance management strategy known as Compstat. It consisted of computerized data, crime analysis, and advanced crime mapping coupled with middle management accountability and crime strategy meetings with high-ranking decision makers. While initially credited with a dramatic reduction in crime, questions quic

The 13 Critical Tasks: An Inside-Out Approach to Solving More Gun Crime - Peter Gagliardi 2019-10-08

African Perspectives on Ethics for Healthcare Professionals - Nico Nortjé 2018-10-24

This book focuses on ethical issues faced by a variety of healthcare practitioners across the Anglophone African continent. This important resource contains in-depth discussions of the most salient current ethical issues by experts in various healthcare fields. Each profession is described from both an African and a South African perspective, and thus contributes to dialogue and critical thinking around African ethics and decision-making. In this way the book provides readers with an understanding of the ethical issues at hand in various professions, including the practical implications of the ethical issues and how to address those effectively. This is a beneficial resource for all those

involved in the various healthcare professions addressed in this book, including undergraduate students, lecturers, researchers and practitioners across the continent. Simply put, with the dynamic changes and challenges in healthcare across the globe and in Africa, this is an indispensable resource for healthcare practitioners.

Language Policy and the Internationalization of Universities - Josep Soler 2019-01-14

Many universities around the world are actively engaged in the process of the internationalization of their higher education systems, trying to become more competitive in all possible respects, especially in the areas of research and teaching. Language, naturally, plays a central role in this process, but this is not always explicitly recognized as such. As a result, key sociolinguistic challenges emerge for both individuals and groups of people. Most prominently, the question of whether English constitutes an opportunity or a threat to other national languages in academic domains is a controversial one and remains unresolved. The analysis featured in this book aims at addressing this question by looking at language policy developments in the context of Estonian higher education. Adopting a discourse approach, the book emphasises the centrality of language not only as a site of struggle, but as a tool and a resource that agents in a give field utilize to orient themselves in certain positions. The book will be of interest to language policy scholars, linguistic anthropologists, and critical sociolinguists. Education scholars interested in discourse studies will also find it useful.

Apartheid - Edgar H. Brookes 2022-10-05

Originally published in 1968, this volume traces the history and growth of Apartheid in South Africa. The acts which enforced Apartheid - the Group Areas Act, Population and Registration Act are given in full. The book also includes documents which reflected reaction to these measures: Parliamentary debates, newspaper reports and policy statements by the leading political parties and religious denominations. The documents are headed by a full historical and analytical introduction.

Humanism and Resilience in Residency Training - Ana Hategan 2020-06-24

This book aims to help identify pre-existing adaptive traits and positive perspectives in resident trainees, while challenging those that are less adaptive by building a formal curriculum for medical education that focuses on the humanistic aspects of medicine. Humanism in medicine is threatened by the false narrative that good physicians are superhumans who do not have their own needs. Written by experts in the field, this book is designed to be a concise, integrated guide to resilience during residency training. Through this guide, trainees learn (i) the usefulness of psychotherapeutic strategies for their own stress management and well-being; (ii) techniques and strategies that are useful in the practice of medicine; and (iii) to consider lifestyle modifications to improve physical and psychological health and well-being, through identification of positive and negative lifestyle factors influencing physicians' response to stress. Since it is designed for busy trainees and physicians, this volume meticulously provides easy-to-use, evidence-based learning tools and therapeutic techniques, including case studies, skill-building exercises, self-test questionnaires, illustrations, useful practice-reminder tips, and other features. Humanism and Resilience in Residency Training is an excellent resource for all medical trainees and professionals who need to incorporate humanism and resilience in their practice, both for accreditation requirements and for personal well-being. This includes medical students and residents, psychiatrists, addiction medicine specialists, family physicians, medical education professionals, hospitalists, nurses, and all healthcare providers

First Nations Policing Policy - Canada. Solicitor General Canada 1996-01-01

The First Nations Policing Policy (FNPP) was introduced by the federal

government in June 1991 to provide First Nations across Canada with access to police services that are professional, effective, culturally appropriate, and accountable to the communities they serve. This guide reflects the changes approved by the government and replaces the earlier guide which was published in 1992.

Practice Guideline for the Treatment of Patients with Schizophrenia - American Psychiatric Association 1997

Developed by experts on schizophrenia and exhaustively reviewed by APA members, the "American Psychiatric Association Practice Guideline for the Treatment of Patients With Schizophrenia" provides therapists with a set of patient care strategies that will aid their clinical decision making. The guideline describes the best and most appropriate treatments available to patients with schizophrenia, including psychopharmacological treatments, ECT, and psychosocial and community interventions. It delineates the process of treatment planning and identifies areas in which research may improve our understanding and management of this condition. This guideline will also help managed care organizations develop more scientifically based and clinically sensitive criteria for the utilization and reimbursement of psychiatric services. Armed with these guidelines, clinicians can improve the care of their patients with schizophrenia and enable them to lead happier and more productive lives.

Pediatric Nutrition in Practice - B. Koletzko 2015-04-17

There is no other time in life when the provision of adequate and balanced nutrition is of greater importance than during infancy and childhood. During this dynamic phase characterized by rapid growth, development and developmental plasticity, a sufficient amount and appropriate composition of nutrients both in health and disease are of key importance for growth, functional outcomes such as cognition and immune response, and the metabolic programming of long-term health and well-being. This compact reference text provides concise information to readers who seek quick guidance on practical issues in the nutrition of infants, children and adolescents. After the success of the first edition, which sold more than 50'000 copies in several languages, the editors prepared this thoroughly revised and updated second edition which focuses again on nutritional challenges in both affluent and poor populations around the world. Serving as a practical reference guide, this book will contribute to further improving the quality of feeding of healthy infants and children, as well as enhancing the standards of nutritional care in sick children.

SIDS Sudden Infant and Early Childhood Death - Roger W. Byard 2018-04

This volume covers aspects of sudden infant and early childhood death, ranging from issues with parental grief, to the most recent theories of brainstem neurotransmitters. It also deals with the changes that have occurred over time with the definitions of SIDS (sudden infant death syndrome), SUDI (sudden unexpected death in infancy) and SUDIC (sudden unexpected death in childhood). The text will be indispensable for SIDS researchers, SIDS organisations, paediatric pathologists, forensic pathologists, paediatricians and families, in addition to residents in training programs that involve paediatrics. It will also be of use to other physicians, lawyers and law enforcement officials who deal with these cases, and should be a useful addition to all medical examiner/forensic, paediatric and pathology departments, hospital and university libraries on a global scale. Given the marked changes that have occurred in the epidemiology and understanding of SIDS and sudden death in the very young over the past decade, a text such as this is very timely and is also urgently needed.

Physiological Basis of Acute Care - E-Book - Yoo Kuen Chan 2012-03-16

The aim of this book is to simplify physiological principles in a logical manner and provide important and relevant content to help care providers better manage their acutely ill patients. First time learners as well as health care professionals needing a short refresher course in physiology will find simple, easy-to-understand, basic physiology that is relevant to both the student and the professional care provider. With a focus on the importance of good oxygen delivery as the basis of sustaining life, this book links the fabric of life together and enables readers to apply the principles of physiology to clinical problems and situations. Understanding why the patient has become unwell and how the patient may present, signs and symptoms of patient deterioration as well as the recommended management of these patients enables the care provider to prioritize care decisions relating to the needs of the acutely ill patient. Thus, care providers will be able to incorporate this new way of examining patients so that care which is often approached in a clinical

manner, will now be physiologically driven. • Chapters that link the management of life such as Basis of Life and Physiology of Death for frontline providers. • Chapters covering important organ systems from airway to kidney, including energy, heat and acid-base balance. • Special chapters on maternal-foetal, paediatrics, elderly and obesity. • Clinical implication and application sections within each chapter for students to relate to clinical practice. • Medical illustrations by Frank Netter, the foremost master of medical illustration. • 58 fully coloured illustrations, diagrams and charts to enhance learning and understanding. • Content reviewed by international and Malaysian academicians. Table of Contents 1. What is Physiology? 2. Basis of Life 3. Oxygen Delivery to the Tissues 4. Physiology of the Airway 5. Process of Breathing 6. Cardiovascular Physiology 7. Haemoglobin and Blood 8. Central Nervous System 9. Renal Physiology 10. Physiology of the Liver 11. Heat Balance 12. Acid-Base Balance 13. Fluids and Electrolytes 14. Metabolism, Nutrition and Energy Balance 15. Pain Physiology 16. Physiology of Sepsis 17. Physiology of Obesity 18. Paediatric Physiology 19. Maternal and Foetal Physiology 20. Physiology of the Elderly 21. Physiology of Death Index

Club Drugs and Novel Psychoactive Substances - Owen Bowden-Jones 2020-10-08

Emerging illicit drugs pose a significant clinical challenge. This handbook offers an engaging, concise guide to managing these challenges.

Oxford Desk Reference: Critical Care - Carl Waldmann 2008-11-27

Critical care medicine is an evolving speciality in which the amount of available information is growing daily and spread across a myriad of books, journals and websites. This essential guide brings together this information in an easy-to-use format. Up-to-date, relevant, and evidence-based information on the management of the critically ill is combined in one resource, ideal for the use of Intensive Care Units, High Dependency Units, acute medical or surgical wards, Accident and Emergency departments and operating theatres. The book is designed such that each subject will form a self-contained topic in its own right, laid out across two or four pages to facilitate the key aim of rapid and easy access to information. This makes the information included simple to find, read and absorb, so that the book can be consulted in the clinic or ward setting for information on the optimum management of a particular condition. With chapters written by internationally renowned critical care specialists and edited by the three of the leading figures in UK Critical Care, this book should be an essential resource for all critical care physicians.

The Psychology of Police Deadly Force Encounters - Laurence Miller 2020-02-11

The Psychology of Police Deadly Force Encounters: Science, Practice, and Police is a fascinating look into the reality of police work. The author integrates noted theories into a "street-wise" understanding of being a police officer. The focus of this book is on the use of deadly force by officers—a topic of considerable importance. The author discusses the psychosocial aspects of deadly force use, stemming from the individual officer, the situation, organizational influences, and the police culture. Expanding further into social issues, the controversial topic of race and use of deadly force is discussed. This depiction looks at both sides—that of racial victimization and that of the police—which helps to provide a rather unique perspective on this important issue. Of interest, the author breaks down the different dimensions of cognition as a factor in decision making among police, including the perception of the situation, the action taken depending on that perception, and the role of present and past memory. This will make for a useful training topic to alert officers to the cognitive processes that go into deadly force use—processes that they have the control to change to make a better decision. Next, the book delves into the biological factors that may be involved in police decision making—again where deadly force is involved. The various negative psychological impacts that a deadly force situation may bring about are identified and explained. This book will be useful as a tool for both law enforcement practitioners and researchers to better understand the intricacies of deadly force by the police. For researchers, the book has a multitude of references available for further exploration. It will prove to be a useful guide and reference volume for police managers and supervisors, mental health clinicians, investigators, attorneys, judges, law enforcement educators and trainers, rank and file police officers, including expert witnesses.

Multilevel and Longitudinal Modeling with IBM SPSS - Ronald H. Heck 2013-08-22

This book demonstrates how to use multilevel and longitudinal modeling

techniques available in the IBM SPSS mixed-effects program (MIXED). Annotated screen shots provide readers with a step-by-step understanding of each technique and navigating the program. Readers learn how to set up, run, and interpret a variety of models. Diagnostic tools, data management issues, and related graphics are introduced throughout. Annotated syntax is also available for those who prefer this approach. Extended examples illustrate the logic of model development to show readers the rationale of the research questions and the steps around which the analyses are structured. The data used in the text and syntax examples are available at www.routledge.com/9780415817110. Highlights of the new edition include: Updated throughout to reflect IBM SPSS Version 21. Further coverage of growth trajectories, coding time-related variables, covariance structures, individual change and longitudinal experimental designs (Ch.5). Extended discussion of other types of research designs for examining change (e.g., regression discontinuity, quasi-experimental) over time (Ch.6). New examples specifying multiple latent constructs and parallel growth processes (Ch. 7). Discussion of alternatives for dealing with missing data and the use of sample weights within multilevel data structures (Ch.1). The book opens with the conceptual and methodological issues associated with multilevel and longitudinal modeling, followed by a discussion of SPSS data management techniques which facilitate working with multilevel, longitudinal, and cross-classified data sets. Chapters 3 and 4 introduce the basics of multilevel modeling: developing a multilevel model, interpreting output, and trouble-shooting common programming and modeling problems. Models for investigating individual and organizational change are presented in chapters 5 and 6, followed by models with multivariate outcomes in chapter 7. Chapter 8 provides an illustration of multilevel models with cross-classified data structures. The book concludes with ways to expand on the various multilevel and longitudinal modeling techniques and issues when conducting multilevel analyses. It's ideal for courses on multilevel and longitudinal modeling, multivariate statistics, and research design taught in education, psychology, business, and sociology.

Education, Human Rights and Peace in Sustainable Development - Maigul Nugmanova 2020-11-19

The aim of sustainable development is to balance our economic, environmental and social needs, allowing prosperity for current and future generations. Countries must be allowed to meet their basic needs of employment, food, energy, water and sanitation. There is a clear relationship between the three topics of the book: right to education has been recognized as a human right - education has a role in peace-building. Additionally, education, human rights and peace have a significant role in sustainable development. The United Nations have defined a broad range of internationally accepted rights, including civil, cultural, economic, political and social rights. However, this book demonstrates that there are still people and nations not respecting the Universal Declaration of Human Rights. Chapters from Brazil, Cameroon, Ethiopia, Kazakhstan, Israel, Peru, Russia and South-Africa cover topics like civil war, human abuses, the vulnerability of indigenous people, abortion, epilepsy, food security, lack of health equities in maternal and child health, and democracy or lack of it. We sincerely hope that this book will contribute to the joint pursuit of humanity to make the world better after we all get over the coronavirus pandemic.

Handbook of Police Psychology - Jack Kitaeff 2019-06-11

The Handbook of Police Psychology features contributions from over 30 leading experts on the core matters of police psychology. The collection surveys everything from the beginnings of police psychology and early influences on the profession; to pre-employment screening, assessment, and evaluation; to clinical interventions. Alongside original chapters first published in 2011, this edition features new content on deadly force encounters, officer resilience training, and police leadership enhancement. Influential figures in the field of police psychology are discussed, including America's first full-time police psychologist, who served in the Los Angeles Police Department, and the first full-time police officer to earn a doctorate in psychology while still in uniform, who served with the New York Police Department. The Handbook of Police Psychology is an invaluable resource for police legal advisors, policy writers, and police psychologists, as well as for graduates studying police or forensic psychology.

Free The Animal: Lose Weight & Fat With The Paleo Diet - Richard Nikoley 2012-06-12

Drawing on evolutionary logic, scientific research, and his own personal experiences, blogger Richard Nikoley of Free the Animal (freetheanimal.com) presents a complete guide to losing weight and fat

the natural way. After many frustrating years of trying to lose weight by adhering to mainstream nutritional guidelines, Richard made a radical decision to throw the rules out. Instead of eating whole grains and lean meat, he ate what his body had always craved: animal fat, and lots of it—and the extra weight started falling away. In "Free The Animal: How To Lose Weight & Fat On The Paleo Diet", Richard shares his tips for eating, fasting, and exercising as wild humans did for millenia. Find out how to embrace your primal cravings for nutritionally dense animal fats and fiber-rich plant sources. Learn to stop listening to the "experts" and start tuning in to your body's natural signals. Richard's approach to the Paleo lifestyle will help you lose fat, gain muscle, and unleash the energy of the animal inside you.

Functional Somatic Symptoms in Children and Adolescents - Kasia Kozłowska 2020

This open access book sets out the stress-system model for functional somatic symptoms in children and adolescents. The book begins by exploring the initial encounter between the paediatrician, child, and family, moves through the assessment process, including the formulation and the treatment contract, and then describes the various forms of treatment that are designed to settle the child's dysregulated stress system. This approach both provides a new understanding of how such symptoms emerge -- typically, through a history of recurrent or chronic stress, either physical or psychological -- and points the way to effective assessment, management, and treatment that put the child (and family) back on the road to health and well-being.

Social Taboo - Richard Cassalata 2016-11-16

This hard hitting book describes domestic violence from the male victim's point of view. Male victims of domestic violence are not only victimized by abusive women but also by a justice system that refuses to protect men from violent women. This book details how local law enforcement agencies do not take action to deter female to male domestic violence. Even when allegations of abuse are reported and clearly documented in police reports. For decades, law enforcement agencies have not been properly trained to identify female batterers or false reporters, largely because of political considerations. Therefore, responding officers rarely question women's statements during a report because they lack training and fall back on faulty gender stereotypes. In most cases, female batterers count on gender stereotypes when making a false allegation. Using the harmful myth of "men are abusers" and "women are victims" in domestic violence situations gives female batterers even more power and control over their male victims. However, when men report abuse they will often receive no sympathy or protection from their batterer. Abused men, more often than not, are arrested when woman provide a flimsy statement to hide the abuse she inflicted on her victim. This book highlights a case in shocking detail were an abusive woman used the justice system as one of many tools of domestic violence. The abusive woman described in this case is a public school teacher in Arizona and may be in a classroom teaching your child today! As this book highlights, there is a real and inherent danger to the general public when female batters are not arrested when men report domestic violence. Clearly, when male domestic violence victims lose, we all do.

Education for Rural Development - Food and Agriculture

Organization of the United Nations 2003

An international joint study by the Food and Agriculture Organization of the United Nations (FAO) and UNESCO's International Institute for Educational Planning (IIEP) was conducted on education and rural development to review the status of the topic from the standpoint of public policies and the conceptual frameworks on which they are based and also to shed light on what may be called "good practice." The findings of the study are meant to serve not as models, but rather as points of reference for all those who are seeking ways of developing education in rural areas and contributing more effectively to rural development. Chapter I, "Education and Rural Development: Setting the Framework" (David Atchoarena and Charlotte Sedel), provides a contextual and theoretical introduction to the new rural development and poverty reduction thinking, as well as a discussion on the contribution of education to rural development. In Chapter II, "Basic Education in Rural Areas: Status, Issues and Prospects" (Michael Lakin with Lavinia Gasperini), the book reviews in depth the provision of basic education in rural areas and offers some policy directions for improvement. Further exploring a particular dimension of basic education, Chapter III, "Making Learning Relevant: Principles and Evidence from Recent Experiences" (Peter Taylor, Daniel Desmond, James Grieshop and Aarti Subramaniam), devotes specific attention to strategies linking the formal school teaching with students' life environment, including agriculture, and to garden-

based learning. The intention is to provide updated information and new insights on much-debated aspects which are often associated with rural areas although their application is much broader. Chapter IV, "Strategies and Institutions for Promoting Skills for Rural Development" (David Atchoarena, Ian Wallace, Kate Green, and Candido Alberto Gomes), shifts the analysis from education to work and discusses the implications of the transformation of rural labor markets for skill development. A particular concern is the rise in rural non-farm employment and the need to enlarge the policy focus from agricultural education and training to technical and vocational education for rural development. This debate is taken further in Chapter V, "Higher Education and Rural Development: A New Perspective" (Charles Maguire and David Atchoarena), which considers higher level skills and the contribution of the tertiary education sector to rural development. Special attention is given to the reform of higher agricultural institutions and lessons based on case studies are provided to document good practice in institutional reform. Finally, Chapter VI, "Main Findings and Implications for Policy and Donor Support" (David Atchoarena with Lavinia Gasperini, Michael Lakin and Charles Maguire), concentrates on the main findings of the study and discusses policy implications and possible responses for donors and countries. (Contains 28 tables, 14 figures, and 64 boxes.).

Understanding Police Culture - John P. Crank 2014-09-25

Police culture has been widely criticized as a source of resistance to change and reform, and is often misunderstood. This book seeks to capture the heart of police culture—including its tragedies and celebrations—and to understand its powerful themes of morality, solidarity, and common sense, by systematically integrating a broad literature on police culture into middle-range theory, and developing original perspectives about many aspects of police work.

Demand and Supply of Skills in Ghana - Peter Darvas 2014-07-03

Skills development in Ghana encompasses foundational skills, transferable/soft-skills, and technical and vocational skills. This report focuses on one segment of this skills development system: formal and informal technical and vocational education and training (TVET) at the pre-tertiary level. TVET represents a major intersection between education, youth and the labor market. The government has long promised to the population that increasing technical and vocational skills training opportunities will help solve youth unemployment. However, market distortions and inefficiencies have led to an adverse cycle of high costs, inadequate quality of supply and low demand, leading to further pressures on the effectiveness and efficiency of TVET services. This adverse cycle means that the political and policy promise of skills development helping to ease the unemployment problem is at risk of remaining unfulfilled. The report focuses on social and economic demand for (pre-tertiary) technical and vocational skills and maps out the supply of these skills from formal and informal, private and public sectors. The dual purpose has been to both carry out an institutional and policy analysis and also to establish a platform for monitoring sector performance and assisting policy and Development Partner harmonization. The report analyzes the economic and social demand for technical and vocational skills and the suitability of the current supply as well as the effectiveness of policy, coordination and financing of technical and vocational skills development. The report annex provides the summary of economic demand analyses from the key sectors reviewed and provides a full mapping of all technical and vocational programs in Ghana. The study offers a comprehensive set of policy recommendations for improving Ghana's pre-tertiary technical and vocational skills development sector, which will be of interest to policy makers and development partners in Ghana.

Reducing Inequalities - Rémi Genevey 2013-01-01

The reduction of inequalities within and between countries stands as a policy goal, and deserves to take centre stage in the design of the Sustainable Development Goals agreed during the Rio+20 Summit in 2012. The 2013 edition of *A Planet for Life* represents a unique international initiative grounded on conceptual and strategic thinking, and "most importantly" empirical experiments, conducted on five continents and touching on multiple realities. This unprecedented collection of works proposes a solid empirical approach, rather than an ideological one, to inform future debate. The case studies collected in this volume demonstrate the complexity of the new systems required to accommodate each country's specific economic, political and cultural realities. These systems combine technical, financial, legal, fiscal and organizational elements with a great deal of applied expertise, and are articulated within a clear, well-understood, growth- and job-generating development strategy. Inequality reduction does not occur by decree; neither does it automatically arise through economic growth, nor through policies that equalize incomes downward via ill conceived fiscal policies. Inequality reduction involves a collaborative effort that must motivate all concerned parties, one that constitutes a genuine political and social innovation, and one that often runs counter to prevailing political and economic forces.

Safety, Justice & People's Power - Richard Conyngham 2016

Webs of Power - Starhawk 2010-01-01

Writing from the front lines, Starhawk chronicles the global justice movement sparked by Seattle's 1999 anti-World Trade Organization protest. A life-long activist, Starhawk is deeply involved as a direct action participant and trainer in the antiglobalization movement. The book is divided into "Actions" and "Visions." In Part I, Starhawk begins with an overview of the complex political and economic powers that the antiglobalization movement opposes. Then, recounting the blow-by-blow events of the critical confrontations faced by the antiglobalization protestors—from Seattle to Genoa—Starhawk discusses police brutality, the Black Bloc versus the pacifists, and the magic of solidarity. In Part II, Starhawk spins a vision of the future of the antiglobalization movement. Drawing on her twenty years of experience as an activist, ecofeminist, and witch, she explores the debate between violent and nonviolent tactics; the definition of an economy of true abundance; and how we can transform our rage and despair, face our fears, and renew our spirits while acting to change the world. Starhawk is the author or coauthor of eight books, including *The Twelve Wild Swans: Journeys Into Magic, Healing and Action* (HarperSanFrancisco, 2000); the Twentieth Anniversary Edition of *The Spiral Dance* (HarperSanFrancisco, 1999); and *Circle Round: Raising Children in the Goddess Tradition* (Bantam, 1998). Well-known in the Wiccan and Pagan Community, Starhawk is a columnist on the web for beliefnet.com and for znet. She lives in San Francisco. Schizophrenia Treatment Outcomes - Amresh Shrivastava 2020-02-05

This book analyzes schizophrenia management in the context of recent clinical therapeutic advances that have transformed the measurements and outcomes landscape. Unlike any other resource, this volume

carefully develops the social and clinical guidelines that affect the life of the patient and defines its role in schizophrenia treatment outcomes. The text begins by determining the concepts, development, neuroscience, and guidelines for positive outcomes before analyzing the gaps in the literature. The text addresses medical concerns in relation to outcomes in schizophrenic patients, including substance use, impact from antipsychotic medications, and medical comorbidities. The text also covers external determinants that may inhibit positive outcomes, including cultural factors, stigma, and environmental issues. Written by experts in schizophrenia care, this book compiles sound research, current clinical trends, and modern measurement markers into a well-organized compendium that delivers this data into a practical guide for measuring treatment outcomes in patients suffering from the disease. Schizophrenia Treatment Outcomes is the ultimate guide for psychiatrists, psychologists, nurses, social workers, and all medical practitioners interested in improving outcomes for schizophrenia patients.

Disorder and Decline - Wesley G. Skogan 1992

"Crime, disorder, and decay symbolize the decline of America's inner cities. Skogan's book is theoretically acute, methodologically sophisticated, and politically astute. It should be required reading for every urban sociologist, policy planner, and public official."--Jerome H. Skolnick, University of California, Berkeley "Panhandling, graffiti, prostitution, abandoned cars and buildings, and junk-filled lots are evidence of neighborhood disorder and decline. In this absorbing and valuable study, Skogan discusses the implications of disorder and skillfully analyzes experimental efforts undertaken to confront it in several American cities."--Gilbert Geis, University of California, Irvine "This timely book not only documents the relationship between disorder and neighborhood decline, but provides a cogent analysis of the currently favored solutions to problems such as community policing and citizen self-help."--Dr. Thomas A. Reppetto, President, Citizens Crime Commission of New York City

Ecosystem Management - Gary Meffe 2012-08-31

Today's natural resource managers must be able to navigate among the complicated interactions and conflicting interests of diverse stakeholders and decisionmakers. Technical and scientific knowledge, though necessary, are not sufficient. Science is merely one component in a multifaceted world of decision making. And while the demands of resource management have changed greatly, natural resource education and textbooks have not. Until now. *Ecosystem Management* represents a different kind of textbook for a different kind of course. It offers a new and exciting approach that engages students in active problem solving by using detailed landscape scenarios that reflect the complex issues and conflicting interests that face today's resource managers and scientists. Focusing on the application of the sciences of ecology and conservation biology to real-world concerns, it emphasizes the intricate ecological, socioeconomic, and institutional matrix in which natural resource management functions, and illustrates how to be more effective in that challenging arena. Each chapter is rich with exercises to help facilitate problem-based learning. The main text is supplemented by boxes and figures that provide examples, perspectives, definitions, summaries, and learning tools, along with a variety of essays written by practitioners with on-the-ground experience in applying the principles of ecosystem

management. Accompanying the textbook is an instructor's manual that provides a detailed overview of the book and specific guidance on designing a course around it. *Ecosystem Management* grew out of a training course developed and presented by the authors for the U.S. Fish and Wildlife Service at its National Training Center in Shepherdstown, West Virginia. In 20 offerings to more than 600 natural resource professionals, the authors learned a great deal about what is needed to function successfully as a professional resource manager. The book offers important insights and a unique perspective derived from that invaluable experience.

Living in and from the forests of Central Africa - Food and Agriculture Organization of the United Nations 2017-01-01

Living in and from the forests of Central Africa is intended first and foremost as a full-scale extension tool concerning NWFPs in Central Africa. It is a work on the groups who have always lived in these forests, forests that contribute to every aspect of their daily lives, both material and spiritual, and enable them to survive even in periods of extreme crisis.

The Global Practice of Forensic Science - Douglas H. Ubelaker 2015-02-16

The Global Practice of Forensic Science presents histories, issues, patterns, and diversity in the applications of international forensic science. Written by 64 experienced and internationally recognized forensic scientists, the volume documents the practice of forensic science in 28 countries from Africa, the Americas, Asia, Australia and Europe. Each country's chapter explores factors of political history, academic linkages, the influence of individual cases, facility development, types of cases examined, integration within forensic science, recruitment, training, funding, certification, accreditation, quality control, technology, disaster preparedness, legal issues, research and future directions. Aimed at all scholars interested in international forensic science, the volume provides detail on the diverse fields within forensic science and their applications around the world.

Working on a Warmer Planet - 2020

Police Use of Force, Tasers and Other Less-Lethal Weapons -

Law and Order in Australia - Donald James Weatherburn 2004

How much crime is committed in Australia? What sort of crime, where and by whom? What can we do to stop it? This book deals in facts and dispels myths. Don Weatherburn, Director of the NSW Bureau of Crime Statistics and Research, shows how policies are driven by the political need to manage public reactions, not to control and prevent crime. *Law and Order in Australia* informs public debate about crime in Australia by contrasting popular assumptions about crime and crime control with what is actually known to be true. The opening chapter sets the scene by asking how serious Australia's crime problems are. Weatherburn then offers a critique of the way Australian governments attempt to deal with Australia's crime problems. This is followed by the foundations for a discussion of what actually works in crime prevention and control by highlighting some basic facts about crime and offenders. The final chapters discuss what the evidence reveals about crime prevention and control and the key issues in crime prevention and control in Australia. Weatherburn clearly provides numerous ideas for better policies, ones that will actually work.
