**Embedded with Organized Labor** - Steve Early 2009-07  
Describes how union members have organized successfully, on the job and in the community, in the face of employer opposition now and in the past in a series of essays—an unusual exercise in “participatory labor journalism.” From publisher description.

**The Oxford Handbook of Organized Crime** - Letizia Paoli 2014  
This handbook explores

organized crime, which it divides into two main concepts and types: the first is a set of stable organizations illegal per se or whose members systematically engage in crime, and the second is a set of serious criminal activities that are typically carried out for monetary gain.

**Reveille for Radicals** - Saul

Alinsky 2010-08-25

Legendary community organizer Saul Alinsky inspired a generation of activists and politicians with *Reveille for Radicals*, the original handbook for social change. Alinsky writes both practically and philosophically, never wavering from his belief that the American dream can only be achieved by an active democratic citizenship. First published in 1946 and updated in 1969 with a new introduction and afterword, this classic volume is a bold call to action that still resonates today.

*The Universalist Movement in America, 1770-1880* - Ann Lee Bressler 2001

This text offers a cultural history of Universalism & the Universalist idea - the idea that an all-good & all-powerful God saves all souls. Bressler puts forth the unique argument that early Universalists were proponents of an 'improved' Calvinism.

*Black Power at Work* - David Goldberg 2011-05-02

*Black Power at Work* chronicles the history of direct action campaigns to open up the construction industry to black workers in the 1960s and 1970s. The book's case studies of local movements in Brooklyn, Newark, the Bay Area, Detroit, Chicago, and Seattle show how struggles against racism in the construction industry shaped the emergence of Black Power politics outside the U.S. South. In the process, "community control" of the construction industry—especially government War on Poverty and post-rebellion urban reconstruction projects—became central to community

organizing for black economic self-determination and political autonomy. The history of Black Power's community organizing tradition shines a light on more recent debates about job training and placement for unemployed, underemployed, and underrepresented workers. Politicians responded to Black Power protests at federal construction projects by creating modern affirmative action and minority set-aside programs in the late 1960s and early 1970s, but these programs relied on "voluntary" compliance by contractors and unions, government enforcement was inadequate, and they were not connected to jobs programs. Forty years later, the struggle to have construction jobs serve as a pathway out of poverty for inner city residents remains an unfinished part of the struggle for racial justice and labor union reform in the United States.

**On Genetic Interests** - Frank Salter 2017-07-28

From an evolutionary perspective, individuals have a

vi- tal interest in the reproduction of their genes. Yet this interest is overlooked by social and political theory at a time when we need to steer an adaptive course through the unnatural modern world of uneven population growth and decline, global mobility, and loss of family and communal ties. In modern Darwinian theory, bearing children is only one way to reproduce. Since we share genes with our families, ethnic groups, and the species as a whole, ethnocentrism and humanism can be adaptive. They can also be hazardous when taken to extremes. On Genetic Interests canvasses strategies and ethics for conserving our genetic interests in an environmentally sustainable manner sensitive to the interests of others.

*DYNAMITE* - Louis Adamic  
2022-03-01

"Dynamite harkens back to an era of American capitalism a little less glossy, a little

bloodier, and with striking parallels to today."--Feminist Review Labor disputes have produced more violence over a longer period of time in the United States than in any other industrialized country in the world. From the 1890s to the 1930s, hardly a year passed without a serious—and often deadly—clash between workers and management. Written in the 1930s, and with a new introduction by Mike Davis, Dynamite recounts a fascinating and largely forgotten history of class and labor struggle in America's industrial beginnings. It is the story of brutal exploitation, massacres, and judicial murders of the workers. It is also the story of their response: when peaceful strikes yielded no results, workers fought back by any means necessary. Louis Adamic has written the classic story of labor conflict in America, detailing many episodes of labor violence, including the Molly Maguires, the Homestead Strike, Pullman Strike, Colorado Labor Wars, the Los Angeles Times

bombing, as well as the case of Sacco and Vanzetti.

**Antisemitism, Its History and Causes** - Bernard Lazare 1903

Upsetting the Apple Cart - Frederick Douglass Opie 2014-12-02

Upsetting the Apple Cart surveys the history of black-Latino coalitions in New York City from 1959 to 1989. In those years, African American and Latino Progressives organized, mobilized, and transformed neighborhoods, workplaces, university campuses, and representative government in the nation's urban capital. Upsetting the Apple Cart makes new contributions to our understanding of protest movements and strikes in the 1960s and 1970s and reveals the little-known role of left-of-center organizations in New York City politics as well as the influence of Jesse Jackson's 1984 and 1988 presidential campaigns on city elections. Frederick Douglass Opie provides a social history of

black and Latino working-class collaboration in shared living and work spaces and exposes racist suspicion and divisive jockeying among elites in political clubs and anti-poverty programs. He ultimately offers a different interpretation of the story of the labor, student, civil rights, and Black Power movements than has been traditionally told. His work highlights both the largely unknown agents of historic change in the city and the noted politicians, political strategists, and union leaders whose careers were built on this history. Also, as Napoleon said, "An army marches on its stomach," and Opie's history equally delves into the role that food plays in social movements, with representative recipes from the American South and the Caribbean included throughout.

*The Individual and Society in Islam* - Abdelwahab Bouhdiba  
1998-01-01

This volume, the first of six to be published, studies fundamental values of Islam, along with the nature of rights and the responsibilities in a general context. The authors analyse the development of social thought and morality in Islam, and ways in which they are enforced through the family and education. Particular attention is paid to the status of women, children, youth and the socially excluded. Several chapters broach specially Islamic approaches to economics, government and justice. A world religion since its inception in the seventh century A.D., Islam is today

seeking vigorous answers to contemporary problems through its multi-faceted history. Issues of poverty and wealth, inequality and demands for political expression, and respect for diversity in a difficult world of conformity are dealt with in this series. The study is organized along thematic rather than chronological lines and thus it is not necessary to read the volumes in order. Volume II is in fact the first to have been published. Volume IV is forthcoming end 2002, volume V mid 2003 and volumes III and VI in 2004. **The Tribes and the States** - William James Sidis 2021-01-06  
The Tribes and the States is a history of the indigenous peoples of New England and the effect they exerted on the governments and civic systems that emerged in pre and post revolutionary America. Written by child prodigy William James Sidis, the book contends that American democracy has been shaped largely by the various native peoples European colonists encountered as they settled the continent. Completed in 1936, The Tribes and the States is still a unique, progressive and under-acknowledged history of the United States.---TABLE OF CONTENTSCHAPTER I - RED RACE PRE-HISTORY - Source of the Red Race - The Cro-Magnons - AtlantisCHAPTER II - THE RED MAN IN AMERICA -

**"The Kingdom of God is  
Within You"** - graf Leo Tolstoy  
1894  
The Kingdom of God Is Within  
You, is a non-fiction book  
written by Leo Tolstoy. A  
philosophical treatise, the book  
was first published in Germany  
in 1894 after being banned in  
his home country of Russia. It  
is the culmination of thirty  
years of Tolstoy's thinking, and  
lays out a new organization for  
society based on a literal  
Christian interpretation.The  
Kingdom of God is Within You  
is a key text for Tolstoyan,

nonviolent resistance, and Christian anarchist movements.

**Imperial Leather** - Anne McClintock 2013-10-01

Imperial Leather chronicles the dangerous liaisons between gender, race and class that shaped British imperialism and its bloody dismantling.

Spanning the century between Victorian Britain and the current struggle for power in South Africa, the book takes up the complex relationships between race and sexuality, fetishism and money, gender and violence, domesticity and the imperial market, and the gendering of nationalism within the zones of imperial and anti-imperial power.

*Freedom in the World*  
1997-1998 - Roger Kaplan  
1998-04

The Comparative Survey of Freedom is an institutional effort by Freedom House to monitor the progress and decline of political rights and civil liberties in 191 nations and 59 related territories.

These year-end reviews of freedom began in 1955, when

they were called the Balance Sheet of Freedom and, still later, the Annual Survey of the Progress of Freedom. This program was expanded in the early 1970s, and has appeared in Freedom Review since 1973. It has also been issued in a more developed context as a yearbook since 1978. Since 1989, the Survey project has been a year-long effort produced by regional experts, consultants and human rights specialists. The Survey derives its information from a wide range of sources. Most valued of these are the many human rights activists, journalists, editors and political figures around the world who keep us informed of the human rights situation in their countries. Throughout the year, Freedom House personnel regularly conduct fact-finding missions to gain more in-depth knowledge of the vast political transformations affecting our world. During these week-to-month-long investigations, we make every effort to meet a cross-section of political parties and associations, human rights

monitors, religious figures, representatives of both the private sector and trade union movement, academics and journalists. During the past year. Freedom House staff traveled to numerous countries throughout most of the world's geographical and political regions. The Survey project team also consults a vast array of published source materials, ranging from the reports of other human rights organizations to often rare, regional newspapers and magazines. This year's Survey team includes: Adrian Karatnycky, Martin Edwin Anderson, Kristen Guida, Marshall Freeman Harris, Thomas R. Lansner, Arch Puddington, Leonard R. Sussman, and George Zarycky. The general editor of Freedom in the World is Roger Kaplan; the managing editor is Tara Kelly. This year's research coordinator was Charles Graybow.

*How Greek Science Passed On To The Arabs* - Delacy O'Leary  
2015-12-22

First published in 2002. The history of science is one of

knowledge being passed from community to community over thousands of years, and this is the classic account of the most influential of these movements -how Hellenistic science passed to the Arabs where it took on a new life and led to the development of Arab astronomy and medicine which flourished in the courts of the Muslim world, later passing on to medieval Europe. Starting with the rise of Hellenism in Asia in the wake of the campaigns of Alexander the Great, O'Leary deals with the Greek legacy of science, philosophy, mathematics and medicine and follows it as it travels across the Near East propelled by religion, trade and conquest. Dealing in depth with Christianity as a Hellenizing force, the influence of the Nestorians and the Monophysites; Indian influences by land and sea and the rise of Buddhism, O'Leary then focuses on the development of science during the Baghdad Khalifate, the translation of Greek scientific material into Arabic, and the

effect for all those interested in the history of medicine and science, and of historical geography as well as the history of the Arab world.

*Low-intensity Conflict in the Third World* - Stephen Blank  
1988

A common thread ties together the five case studies of this book: the persistence with which the bilateral relationship between the United States and the Soviet Union continues to dominate American foreign and regional policies. These essays analyze the LIC environment in Central Asia, the Middle East, Southeast Asia, Latin America, and sub-Saharan Africa.

*Regional Equity* - Victor Rubin  
2017-10-02

Regional equity as a field of scholarship, as an arena of policy change, and as a social movement has grown, diversified, and matured in important ways over the past decade. The fruits of that growth and development can be seen in recent federal and state policies, in the practices of many regional planning organizations, and in the

agendas and approaches of countless community-based organizations and issue advocacy groups. As the field has expanded, a growing number of researchers have been tracking these phenomena: explaining how and why concepts of metropolitan development are being reframed; documenting the efforts to shape policies and diversify leadership; assessing where and how equity and social justice concerns have been brought into regional planning for transportation, land use, housing, public finances, environmental quality, smart growth, sustainable development, public health and other issue areas. This volume brings together analyses and commentary by some of the leading scholarly observers these timely developments. This book was published as a special issue of *Community Development*.

**History of the Persian Empire** - A. T. Olmstead  
2022-08-29

Out of a lifetime of study of the

ancient Near East, Professor Olmstead has gathered previously unknown material into the story of the life, times, and thought of the Persians, told for the first time from the Persian rather than the traditional Greek point of view. "The fullest and most reliable presentation of the history of the Persian Empire in existence."—M. Rostovtzeff *Races and Immigrants in America* - John Rogers Commons 1907

[This Could Be the Start of Something Big](#) - Manuel Pastor Jr. 2015-10-27

For nearly two decades, progressives have been dismayed by the steady rise of the right in U.S. politics. Often lost in the gloom and doom about American politics is a striking and sometimes underanalyzed phenomenon: the resurgence of progressive politics and movements at a local level. Across the country, urban coalitions, including labor, faith groups, and community-based organizations, have come

together to support living wage laws and fight for transit policies that can move the needle on issues of working poverty. Just as striking as the rise of this progressive resurgence has been its reception among unlikely allies. In places as diverse as Chicago, Atlanta, and San Jose, the usual business resistance to pro-equity policies has changed, particularly when it comes to issues like affordable housing and more efficient transportation systems. To see this change and its possibilities requires that we recognize a new thread running through many local efforts: a perspective and politics that emphasizes "regional equity." Manuel Pastor Jr., Chris Benner, and Martha Matsuoka offer their analysis with an eye toward evaluating what has and has not worked in various campaigns to achieve regional equity. The authors show how momentum is building as new policies addressing regional infrastructure, housing, and workforce development bring together business and

community groups who share a common desire to see their city and region succeed. Drawing on a wealth of case studies as well as their own experience in the field, Pastor, Benner, and Matsuoka point out the promise and pitfalls of this new approach, concluding that what they term social movement regionalism might offer an important contribution to the revitalization of progressive politics in America.

**The Autobiography of Malcolm X** - Malcolm X  
2015-11-26

The Autobiography of Malcolm X was intended to be a true autobiography, with the name of Alex Haley appearing not at all or as a ghost writer or as a mere contributor or assistant. However, with the assassination of Malcolm X having occurred in Harlem in New York City on February 21, 1965 just before this book could be published, it became necessary to reveal the important role of Alex Haley in creating this book.

Lost Towers - Gregory Butler  
2006-08

September 11th, 2001 changed the face of New York City forever. 7 towers lay in ruins- and 2,900 people were lost. New York's construction workers reacted by rushing to the scene-using their special skills to rescue the living and recover the remains of the dead. The city's real estate developers, contractors and public officials had private profit and restoring business as usual as their first priorities. Greater Gotham - Mike Wallace  
2017-09-04

In this utterly immersive volume, Mike Wallace captures the swings of prosperity and downturn, from the 1898 skyscraper-driven boom to the Bankers' Panic of 1907, the labor upheaval, and violent repression during and after the First World War. Here is New York on a whole new scale, moving from national to global prominence -- an urban dynamo driven by restless ambition, boundless energy, immigrant dreams, and Wall Street greed. Within the first two decades of the twentieth century, a newly consolidated

New York grew exponentially. The city exploded into the air, with skyscrapers jostling for prominence, and dove deep into the bedrock where massive underground networks of subways, water pipes, and electrical conduits sprawled beneath the city to serve a surging population of New Yorkers from all walks of life. New York was transformed in these two decades as the world's second-largest city and now its financial capital, thriving and sustained by the city's seemingly unlimited potential. Wallace's new book matches its predecessor in pure page-turning appeal and takes America's greatest city to new heights.

**A Little History of the World**  
- E. H. Gombrich 2014-10-01  
E. H. Gombrich's Little History

of the World, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time, and his text suggests illustrations on every page. This illustrated edition of the Little History brings together the pellucid humanity of his narrative with the images that may well have been in his mind's eye as he wrote the book. The two hundred illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. The book incorporates

freshly drawn maps, a revised preface, and a new index. Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an enhanced edition of a timeless account of human history.

*Abe* - David S. Reynolds

2021-09-28

Now an Apple TV+ documentary, *Lincoln's Dilemma*. One of the Wall Street Journal's Ten Best Books of the Year | A Washington Post Notable Book | A Christian Science Monitor and Kirkus Reviews Best Book of 2020 Winner of the Gilder Lehrman Abraham Lincoln Prize and the Abraham Lincoln Institute Book Award "A marvelous cultural biography that captures Lincoln in all his historical fullness. . . . using popular culture in this way, to fill out the context surrounding Lincoln, is what makes Mr. Reynolds's biography so different and so compelling . . . Where did the sympathy and compassion expressed in [Lincoln's] Second Inaugural—'With malice toward

none; with charity for all'—come from? This big, wonderful book provides the richest cultural context to explain that, and everything else, about Lincoln." —Gordon Wood, Wall Street Journal From one of the great historians of nineteenth-century America, a revelatory and enthralling new biography of Lincoln, many years in the making, that brings him to life within his turbulent age David S. Reynolds, author of the Bancroft Prize-winning cultural biography of Walt Whitman and many other iconic works of nineteenth century American history, understands the currents in which Abraham Lincoln swam as well as anyone alive. His magisterial biography *Abe* is the product of full-body immersion into the riotous tumult of American life in the decades before the Civil War. It was a country growing up and being pulled apart at the same time, with a democratic popular culture that reflected the country's contradictions. Lincoln's lineage was considered

auspicious by Emerson, Whitman, and others who prophesied that a new man from the West would emerge to balance North and South. From New England Puritan stock on his father's side and Virginia Cavalier gentry on his mother's, Lincoln was linked by blood to the central conflict of the age. And an enduring theme of his life, Reynolds shows, was his genius for striking a balance between opposing forces. Lacking formal schooling but with an unquenchable thirst for self-improvement, Lincoln had a talent for wrestling and bawdy jokes that made him popular with his peers, even as his appetite for poetry and prodigious gifts for memorization set him apart from them through his childhood, his years as a lawyer, and his entrance into politics. No one can transcend the limitations of their time, and Lincoln was no exception. But what emerges from Reynolds's masterful reckoning is a man who at each stage in his life managed to arrive at a

broader view of things than all but his most enlightened peers. As a politician, he moved too slowly for some and too swiftly for many, but he always pushed toward justice while keeping the whole nation in mind. Abe culminates, of course, in the Civil War, the defining test of Lincoln and his beloved country. Reynolds shows us the extraordinary range of cultural knowledge Lincoln drew from as he shaped a vision of true union, transforming, in Martin Luther King Jr.'s words, "the jangling discords of our nation into a beautiful symphony of brotherhood." Abraham Lincoln did not come out of nowhere. But if he was shaped by his times, he also managed at his life's fateful hour to shape them to an extent few could have foreseen. Ultimately, this is the great drama that astonishes us still, and that Abe brings to fresh and vivid life. The measure of that life will always be part of our American education.
