The Routledge Companion to Remix Studies

- Eduardo Navas 2014-11-27

The Routledge Companion to Remix Studies comprises contemporary texts by key authors and artists who are active in the emerging field of remix studies. As an organic international movement, remix culture originated in the popular music culture of the 1970s, and has since grown into a rich cultural activity encompassing numerous forms of media. The act of recombining pre-existing material brings up pressing questions of authenticity, reception, authorship, copyright, and the techno-politics of

media activism. This book approaches remix studies from various angles, including sections on history, aesthetics, ethics, politics, and practice, and presents theoretical chapters alongside case studies of remix projects. The Routledge Companion to Remix Studies is a valuable resource for both researchers and remix practitioners, as well as a teaching tool for instructors using remix practices in the classroom.

The Turing Test - James H. Moor 2012-12-06

This book gives the most comprehensive, in depth and contemporary assessment of this classic topic in artificial intelligence. It is the first to elaborate in such detail the numerous conflicting points of view on many aspects of this multifaceted, controversial subject. It offers new insights into Turing's own interpretation and is essential reading for research on the Turing test and for teaching undergraduate and graduate students in philosophy, computer science, and cognitive science.

[Cave Minerals of the World](#) - Carol A. Hill 1997

Mathematical Logic - R.O. Gandy 2001-12-05

Mathematical Logic is a collection of the works of one of the leading figures in 20th-century science. This collection of A.M. Turing's works is

intended to include all his mature scientific writing, including a substantial quantity of unpublished material. His work in pure mathematics and mathematical logic extended considerably further; the work of his last years, on morphogenesis in plants, is also of the greatest originality and of permanent importance. This book is divided into three parts. The first part focuses on computability and ordinal logics and covers Turing's work between 1937 and 1938. The second part covers type theory; it provides a general introduction to Turing's work on type theory and covers his published and unpublished works between 1941 and 1948. Finally, the third part focuses on enigmas, mysteries, and loose ends. This concluding section of the book discusses Turing's Treatise on the Enigma, with excerpts from the Enigma Paper. It also delves into Turing's papers on programming and on minimum cost sequential analysis, featuring an excerpt from the unpublished manuscript. This

book will be of interest to mathematicians, logicians, and computer scientists.

The Munda Languages - Gregory D.S. Anderson 2015-04-08

The Munda group of languages of the Austroasiatic family are spoken within central and eastern India by almost ten million people. To date, they are the least well-known and least documented languages of the Indian subcontinent. This unprecedented and original work draws together a distinguished group of international experts in the field of Munda language research and presents current assessments of a wide range of typological and comparative-historical issues, providing agendas for future research. Representing the current state of Munda Linguistics, this volume provides detailed descriptions of almost all of the languages in the family, in addition to a brief chapter discussing the enigmatic Nihali language.

England and the Jews - Geraldine Heng

2018-11-29

For three centuries, a mixture of religion, violence, and economic conditions created a fertile matrix in Western Europe that racialized an entire diasporic population who lived in the urban centers of the Latin West: Jews. This Element explores how religion and violence, visited on Jewish bodies and Jewish lives, coalesced to create the first racial state in the history of the West. It is an example of how the methods and conceptual frames of postcolonial and race studies, when applied to the study of religion, can be productive of scholarship that rewrites the foundational history of the past. *A History of Baptists in New Jersey* - Thomas Sharp Griffiths 1904

Joseph Dent, a weaver, and Isabella Noddle, both originally of Garsdale. Both the Shaws and the Noddles had lived in Garsdale for generations. The earliest known Shaw was Robert Shaw (d.1744), great-grandfather of Benjamin. In 1793 Benjamin married Betty Leeming (1773-1828). They were the parents of eight children and eventually had thirty-six grand-children. Early in career Benjamin moved his family to Preston where he was a mechanic. Descendants live in England.

Habsburg Lemberg - Markian Prokopovych

2009

When Austria annexed Galicia during the first partition of Poland in 1772, the province's capital, Lemberg, was a decaying Baroque town. By the outbreak of the First World War in 1914, Lemberg had become a booming city with a modern urban and, at the same time, distinctly Habsburg flavor. In the process of the "long" nineteenth century, both Lemberg's appearance and the use of public space changed remarkably. The city center was transformed into a showcase of modernity and a site of conflicting symbolic representations, while other areas were left decrepit, overcrowded, and neglected. Habsburg Lemberg: Architecture, Public Space, and Politics in the Galician Capital, 1772-1914 reveals that behind a variety of national and positivist historical narratives of Lemberg and of its architecture, there always existed a city that was labeled cosmopolitan yet provincial; and a Vienna, but still of the East. Buildings, streets, parks, and monuments became part and parcel

of a complex set of culturally driven politics.

The Government of the Philippine Islands -

George A. Malcolm 2017-10-20

Excerpt from The Government of the Philippine Islands: Its Development and Fundamentals First named the Islands Of St. Lazarus by Magellan, they were later christened Felipinas by one of the later Spanish voyagers, Ruy Lopez de Villalobos, in honor of our fortunate Prince - Prince of Austria, later King Philip II. This was soon used in the ordinary way, as by Urdaneta and Legaspi in 1567, las islas Filipinas - the Philippine Islands. Travertine - Allan Pentecost 2005-07-22
uring the spring of 1960, an uncle showed me a

‘petrifying spring’ near Plaxtol in Kent Dwhere twigs had been encased in a calcareous jacket. A twig was collected and having - cently been given I. Evan’s Observer’s Book of Geology by my parents, I found a photograph of another petrifying spring and an explanation of its origin. In those days, Derbyshire was too far for a holiday destination, and I took little further interest until a research studentship with Professor G. E. Fogg became available in 1971. Tony Fogg had recently moved to the University College of North Wales, Bangor and the research was to be into cyanobacterium mats, with fieldwork along the Red Sea coast. The fieldwork never materialised but my interest in algal mats had been aroused. A chance stroll along the Bangor shore revealed beautifully calcified cyanobacterium mats, and Tony generously allowed me to investigate these instead. The old Plaxtol collection was retrieved and yielded abundant cyanobacteria. It became apparent that here was a wealth of information about a rock whose

formation was so rapid, that the process could be studied in days rather than years - an exceptional state of affairs. A search of the literature also revealed that the rock, a form of travertine, had other unusual features.
