Monitoring Environmental Change with Color Slides - Arthur W. Magill 1989

Monitoring human impact on outdoor recreation sites and view landscapes is necessary to evaluate influences which may require corrective action and to determine if management is achieving desired goals. An inexpensive method to monitor environmental change is to establish camera points and use repeat color slides. Successful monitoring from slides requires the observer to determine if there are increases or decreases of trees, shrubs, or herbaceous plants; bare ground or duff; screening by trees; and soil erosion. Illustrated guidelines are given for land managers who must monitor human impact on recreation sites and view landscapes. Slides taken at various intervals demonstrate how to detect differences in views of timber harvesting, disturbed sites, and recreation sites, and suggests what to look for in scenes with subjects viewed from various distances. By using the process, visual sensitivity for detecting and evaluating environmental change, using repeat color photography, should be increased.

Manual for Radiation Oncology Nursing Practice and Education - Maurene McQuestion 2021

"Advances in technology, research, and evidence-based practice have led to improvements in the care of patients receiving radiation therapy. The

knowledge and expertise required by nurses must focus on the needs of patients who come into their care at any point across the trajectory of the cancer journey. Nurses may work with patients at varying stages of the radiation therapy process and in a wide range of settings.

Regardless, however, the need to be knowledgeable about the symptoms and side effects associated with this treatment is essential for nurses caring for this patient population. The Oncology Nursing Society has published the fifth edition of Manual for Radiation Oncology Nursing Practice and Education to support nurses who care for patients who will receive, are receiving, or have received radiation therapy. The fifth edition features significant updates and changes to the content to reflect advances in technology, treatment options, and symptom management. New sections have been added based on input from radiation oncology nurses or as a result of changes in treatment options, the needs of specific patient populations, and observations from clinical practice. New topics include patients with cognitive changes and dementia; general distress and coping; patients with mental illness; special populations, such as women who are pregnant, ado-lescents, and young adults; special needs related to late effects of treatment and cardiac toxicities; and treatment modalities, including cobalt therapy and immunotherapy. This manual serves as an essential resource for individual nurses new to working in a radiation therapy setting as well as to nurses wanting to advance their knowledge in radiation biology and protection, diverse radiation therapy modalities, combination treatments, site- or disease-specific concerns, symptom management, special populations, and care during transition points. Additionally, this manual can be a resource to advanced practice clinicians, educators, and administrators, with a focus on support for nursing staff seeking the education and skills required to care for patients receiving radiation therapy and their families"--

Writing Superheroes - Anne Haas Dyson

Based on an ethnographic study in an urban classroom of 7- to 9-year olds, *Writing Superheroes* examines how young school children use popular culture, especially superhero stories, in the unofficial peer social world and in the official school literacy curriculum. In one sense, the book is about children "writing superheroes"-about children appropriating superhero stories in their fiction writing and dramatic play on the playground and in the classroom. These stories offer children identities as powerful people who do battle against evil and win. The stories, however, also reveal limiting ideological assumptions about relations between people-boys and girls, adults and children, people of varied heritages, physical demeanors, and social classes. The book, then, is also about children as "writing superheroes." With the assistance of their teacher, the observed children became superheroes of another sort, able to take on powerful cultural storylines. In this book, Anne Dyson examines how the children's interest in and conflicts about commercial culture give rise to both literacy and social learning, including learning how to participate in a community of differences.

Working Side by Side - Shoshanna Sumka 2015-07-23

This book constitutes a guide for student and staff leaders in alternative break (and other community engagement, both domestic and international) programs, offering practical advice, outlining effective program components and practices, and presenting the underlying community engagement and global learning theory. Readers will gain practical skills for implementing each of the eight components of a quality alternative break program developed by Break Away, the national alternative break organization. The book advances the field of student-led alternative breaks by identifying the core components of successful

programs that develop active citizens. It demonstrates how to address complex social issues, encourage structural analysis of societal inequities, foster volunteer transformation, and identify methods of work in mutually beneficial partnerships. It emphasizes the importance of integrating a justice-centered foundation throughout alternative break programs to complement direct service activities, and promotes long-term work for justice and student transformation by offering strategies for post-travel reorientation and continuing engagement. The authors address student leadership development, issue-focused education, questions of power, privilege, and diversity, and the challenges of working in reciprocal partnerships with community organizations. They offer guidance on fundraising, budget management, student recruitment, program structures, the nuts and bolts of planning a trip, risk management, health and safety, and assessment and evaluation. They address the complexities of international service-learning and developing partnerships with grassroots community groups, non-governmental and nonprofit organizations, and intermediary organizations. For new programs, this book provides a starting point and resource to return to with each stage of development. For established programs, it offers a theoretical framework to reflect on and renew practices for creating active citizens and working for justice.

Methods for Real-Time Measurement of THMs and HAAs in Distribution Systems - Part 2 - Gary L. Emmert 2007

In this project researchers developed a practical, low-cost chemical analyzer for real-time monitoring of trihalomethanes (THMs) and haloacetic acids (HAAs) in drinking water distribution systems. THMs and HAAs are possibly harmful to humans if ingested. For this reason the US Environmental Protection Agency established maximum contaminant levels. Future regulations might lower the MCL of these substances. Real-time monitoring of THMs and HAAs will become necessary for future regulatory compliance.
