Terrace VII - Sarah L Johnson 2019-11-05

Welcome to the Seventh Terrace of Dante's tower of Purgatory. Here, in darkness lit only by a wall of flame, we find souls enslaved by the sin of lust. Lust is a great and terrible thing, and this collection of dark tales follows a mere handful of the many paths leading to the wall of fire.

The Proliferation Puzzle - Zachary S. Davis 2020-12-01

Originally published in 1993, this volume was unique in its scope and approach: Unlike most literature on nuclear weapons proliferation at the time, the essays in this volume offer theoretical discussions and suggest testable hypotheses about the causes and effects of nuclear weapons proliferation. The proliferation of nuclear weapons is an ideal subject for social science scholarship, and such scholarship is especially timely now. Among the topics discussed in *The Proliferation Puzzle* are: The building of nuclear weapons is a complex task touching upon many of the subjects of study at the core of social science and international relations. Nuclear weapons may be acquired as a hedge against external threat, for reasons of national prestige, or as a result of pressures by domestic coalitions among scientists, bureaucrats, and the military. They may be sought for defensive purposes or to support hegemonic aspirations. Nuclear weapons also raise questions about civilian command and control, especially in crisis situations. During the last two decades the acquisition of nuclear weapons has been proscribed by the non-proliferation regime. The decisions countries made about acquiring these weapons and the manner they chose to build them serve as a test of the efficacy of this particular regime, and of international regimes more generally. Nuclear weapons were introduced at the time bipolarity became the international order. As the world moves away from bipolarity, there is a need to answer questions such as: What would be the effect of nuclear weapons in a multipolar order? How will the spread of nuclear weapons affect the distribution of capabilities among states? If nuclear weapons spread to additional countries, will they enhance stability or exacerbate instability? Can the spread of these weapons be managed or controlled? This book brings together scholars from different schools within international relations and the social sciences to address the question of why nuclear weapons spread. A disciplined, rigorous examination of proliferation is important not only for scholarship but also for informed policymaking. The purpose of social science is to formulate hypotheses and devise theories that advance our understanding of society and aid in the fashioning of enlightened policy. The essays in this volume show how explicit hypotheses about the causes and consequences of nuclear weapons proliferation provide a deeper understanding of the problem and suggest specific, theory-informed policy recommendations.

[Cognition, Metacognition, and Culture in STEM Education](#) - Yehudit Judy Dori 2017-12-01

This book addresses the point of intersection between cognition, metacognition, and culture in learning and teaching Science, Technology, Engineering, and Mathematics (STEM). We explore theoretical background and cutting-edge research about how various forms of cognitive and metacognitive instruction may enhance learning and thinking in STEM classrooms from K-12 to university and in different cultures and countries. Over the past several years, STEM education research has witnessed rapid growth, attracting considerable interest among scholars and educators. The book provides an updated collection of studies about cognition, metacognition and culture in the four STEM domains. The field of research, cognition and metacognition in STEM education still suffers from ambiguity in meanings of key concepts that various researchers use. This book is organized according to a unique manner: Each chapter features one of the four STEM domains and one of the three themes—cognition, metacognition, and culture—and defines key concepts. This matrix-type organization opens a new path to knowledge in STEM education and facilitates its understanding. The discussion at the end of the book integrates these definitions for analyzing and mapping the STEM education research. Chapter 4 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com

Social Assistance in Albania - Harold Alderman 1998-01-01

Albania provides a small amount of social assistance to nearly 20% of its population through a system which allows a degree of community discretion in determining distribution. This study investigates the poverty targeting of this program. It indicates that relative to other safety net programs in low income countries, social assistance in Albania is fairly well targeted to the poor.

Bash the Lion My First Numbers - GMSL Creative 2021-03-31

ROAR!!! Meet Bash the Lion - a playful Lion who loves to learn. Your toddler will enjoy going on learning hunts with Bash as they explore their first numbers. All Bash the Lion My First books are wonderfully put together along with activities that will help your child expand their recognition of items, as well as their vocabulary and pronunciation. Unlike typical picture books (that only display pictures with the names of the objects), Bash the Lion My First books include the 7 different learning concepts (visual, kinesthetic/physical, aural/auditory, social, solitary, verbal and logical) to foster a curiosity in your toddler that will plant the seeds for further reading and learning. We are self-publishers, literally a "mom and pop", so we hope you enjoy our labor of love as we did with our little one.

Republic of Latvia - International Monetary Fund. European Dept. 2018-09-05

This Selected Issues paper analyzes labor market challenges in Latvia. In the boom period leading up to the global financial crisis, the economy experienced widespread labor shortages and soaring wage growth. The bursting of the bubble led to a deep recession, high unemployment, and a sharp contraction in wages. With the economy now in its eighth year of recovery, Latvia is once again experiencing a tightening labor market—a situation exacerbated by unfavorable demographic trends. Latvia's future prosperity will depend critically on whether it is able to address its labor market challenges. Employment protection legislation (EPL) is relatively restrictive. EPL refers to the procedures and costs associated with hiring and dismissing workers. Theory suggests that overly restrictive EPL reduces both job creation and job destruction and may slow productivity growth by raising labor adjustment costs for firms. Latvia's tightening labor market calls for reforms that make the most of the country's human resources. Reforms should aim to tackle barriers to employment, encourage more labor market participation, help Latvia's citizens build new skills, and stem the decline in the working-age population.

Chemistry and Technology of Lubricants - R. M. Mortier 2011-09-23

The use of lubricants began in ancient times and has developed into a major international business through the need to lubricate machines of increasing complexity. The impetus for lubricant development has arisen from need, so lubricating practice has preceded an understanding of the scientific principles. This is not surprising as the scientific basis of the technology is, by nature, highly complex and interdisciplinary. However, we believe that the understanding of lubricant phenomena will continue to be developed at a molecular level to meet future challenges. These challenges will include the control of emissions from internal combustion engines, the reduction of friction and wear in machinery, and continuing improvements to lubricant performance and life-time. More recently, there has been an increased understanding of the chemical aspects of lubrication, which has complemented the knowledge and understanding gained through studies dealing with physics and engineering. This book aims to bring together this chemical information and present it in a practical way. It is written by chemists who are authorities in the various specialisations within the lubricating industry, and is intended to be of interest to chemists who may already be working in the lubricating industry or in academia, and who are seeking a chemist's view of lubrication. It will also be of benefit to engineers and technologists familiar with the industry who require a more fundamental understanding of lubricants.
