*Prosecuting Corporations for Genocide* - Michael J. Kelly 2016-02-17

Modern corporations are key participants in the new globalized economy. As such, they have been accorded tremendous latitude and granted extensive rights. However, accompanying obligations have not been similarly forthcoming. Chief among them is the obligation not to commit atrocities or human rights abuses in the pursuit of profit. Multinational corporations are increasingly complicit in genocides that occur in the developing world. While they benefit enormously from the crime, they are immune from prosecution at the international level. Prosecuting Corporations for Genocide proposes new legal pathways to ensure such companies are held criminally liable for their conduct by creating a framework for international criminal jurisdiction. If a state or a person commits genocide, they are punished, and international law demands such. Nevertheless, corporate actors have successfully avoided this through an array of legal arguments which Professor Kelly challenges. He demonstrates how international criminal jurisdiction should be extended over corporations for complicity in genocide and makes the case that it should be done promptly.

**Comparative Company Law** - Carsten Gerner-Beuerle 2019-05-06

Comparative Company Law provides a systematic and coherent exposition of company law across jurisdictions, augmented by extracts taken from key judgments, legislation, and scholarly works. It provides an overview of the legal framework of company law in the US, the UK, Germany, and France, as well as the legislative measures adopted by the EU and the relevant case law of the Court of Justice. The comparative analysis of legal frameworks is firmly grounded in legal history and legal and economic theory and bolstered by numerous extracts (including extracts in translation) that offer the reader an invaluable insight into how the law operates in context. The book is an essential guide to how company law cuts across borders, and how different jurisdictions shape the corporate lifespan from its formation by way of incorporation to its demise (corporate insolvency) and eventual dissolution. In addition, it offers an introduction to the nature of the corporation, the framework of EU company law, incorporation and corporate representation, agency problems in the firm, rights of stakeholders and shareholders, neutrality and defensive measures in corporate control transactions, legal capital, piercing the corporate veil, and corporate insolvency and restructuring law.

**Good to Great** - Jim Collins 2011-07-19

The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing

characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. "Some of the key concepts discerned in the study," comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings?

*The Anatomy of Corporate Law* - Reinier Kraakman 2009-07-23

This is the long-awaited second edition of this highly regarded comparative overview of corporate law. This edition has been comprehensively updated to reflect profound changes in corporate law. It now includes consideration of additional matters such as the highly topical issue of enforcement in corporate law, and explores the continued convergence of corporate law across jurisdictions. The authors start from the premise that corporate (or company) law across jurisdictions addresses the same three basic agency problems: (1) the opportunism of managers vis-à-vis shareholders; (2) the opportunism of controlling shareholders vis-à-vis minority shareholders; and (3) the opportunism of shareholders as a class vis-à-vis other corporate constituencies, such as corporate creditors and employees. Every jurisdiction must address these problems in a variety of contexts, framed by the corporation's internal dynamics and its interactions with the product, labor, capital, and takeover markets. The authors' central claim, however, is that corporate (or company) forms are fundamentally similar and that, to a surprising degree, jurisdictions pick from among the same handful of legal strategies to address the three basic agency issues. This book explains in detail how (and why) the principal European jurisdictions, Japan, and the United States sometimes select identical legal strategies to address a given corporate law problem, and sometimes make divergent choices. After an introductory discussion of agency issues and legal strategies, the book addresses the basic governance structure of the corporation, including the powers of the board of directors and the shareholders meeting. It proceeds to creditor protection measures, related-party transactions, and fundamental corporate actions such as mergers and charter amendments. Finally, it concludes with an examination of friendly acquisitions, hostile takeovers, and the regulation of the capital markets.

The chapter on limited liability companies, which already has the most innovative treatment among major casebooks of how these entities are different from the corporate form, now includes expanded coverage of the back and forth between the Delaware courts and the Delaware legislature as to what should be the default rule as to fiduciary duty in LLCs. A significant 2013 Court of Chancery opinion in the MFW Shareholders Litigation case, and a related 2012 Delaware Supreme Court case, *Americas Mining Corp. v. Theriault*, are highlighted in expansive notes following the Cox Communications opinion. The MFW Shareholder Litigation decision is on appeal to the Delaware Supreme Court, and the new material is designed to anticipate that decision and prepare the way for teachers to present up-to-date coverage of this important decision.
