*The Long Honduran Night* - Dana Frank 2018-11-27

This powerful narrative recounts the tumultuous time in Honduras that witnessed then-President Manuel Zelaya deposed by a coup in June 2009, told through first-person experiences and layered with deeper political analysis. It weaves together two perspectives; first, the broad picture of Honduras since the coup, including the coup itself, its continuation in two repressive regimes, and secondly, the evolving Honduran resistance movement, and a new, broad solidarity movement in the United States. Although it is full of terrible things, this not a horror story: this narrative directly counters mainstream media coverage that portrays Honduras as a pit of unrelenting awfulness, in which powerless sobbing mothers cry over bodies in the morgue. Rather, it's about sobering challenges and the inspiring collective strength with which people face them. Dana Frank is a professor of history at the University of California, Santa Cruz. She is

the author of *Baneras: Women Transforming the Banana Unions of Latin America* from Haymarket Books. Since the 2009 military coup her articles about human rights and U.S. policy in Honduras have appeared in *The Nation*, *New York Times*, *Politico Magazine*, *Foreign Affairs.com*, *The Baffler*, *Los Angeles Times*, *Miami Herald*, and many other publications, and she has testified in both the US Congress and Canadian Parliament.

[Who Killed Berta Cáceres?](#) - Nina Lakhani 2020-06-02

A deeply affecting—and infuriating—portrait of the life and death of a courageous indigenous leader The first time Honduran indigenous leader Berta Cáceres met the journalist Nina Lakhani, Cáceres said, ‘The army has an assassination list with my name at the top. I want to live, but in this country there is total impunity. When they want to kill me, they will do it.’ In 2015, Cáceres won the Goldman Prize, the world’s most prestigious environmental award, for leading a campaign to stop construction of an internationally funded hydroelectric dam on a river sacred to her Lenca people. Less than a year later she was dead. Lakhani tracked Cáceres remarkable career, in which the defender doggedly pursued her work in the face of years of threats and while friends and colleagues in Honduras were exiled and killed defending basic rights. Lakhani herself endured intimidation and harassment as she investigated

the murder. She was the only foreign journalist to attend the 2018 trial of Cáceres's killers, where state security officials, employees of the dam company and hired hitmen were found guilty of murder. Many questions about who ordered and paid for the killing remain unanswered. Drawing on more than a hundred interviews, confidential legal filings, and corporate documents unearthed after years of reporting in Honduras, Lakhani paints an intimate portrait of an extraordinary woman in a state beholden to corporate powers, organised crime, and the United States.

**The Dangerous God** - Dominic Erdozain 2017-10-02

Indigenous Cultures and Sustainable Development in Latin America - Timothy MacNeill 2020-10-09

This open access book outlines development theory and practice over time as well as critically interrogates the "cultural turn" in development policy in Latin American indigenous communities, specifically, in Guatemala, Honduras, Ecuador, and Bolivia. It becomes apparent that culturally sustainable development is both a new and old idea, which is simultaneously traditional and modern, and that it is a necessary iteration in thinking on development. This new strain of thought could inform not only the work of development practitioners, graduate students, and theorists working in the Global South, but in the Global North as well. This work was published by Saint Philip Street Press pursuant to a Creative Commons license permitting commercial use. Liquid Borders - Mabel Moraña 2021-03-15

Liquid Borders provides a timely and critical analysis of the large-scale migration of people across borders, which has sent shockwaves through the global world order in recent years. In this book, internationally recognized scholars and activists from a variety of fields analyze key issues related to diasporic movements, displacements, exiles, "illegal" migrants, border crossings, deportations, maritime ventures, and the militarization of borders from political, economic, and cultural perspectives. Ambitious in scope, with cases stretching from the Mediterranean to Australia, the US/Mexico border, Venezuela, and deterritorialized sectors in Colombia and Central America, the various contributions are unified around the notion of freedom of movement, and the recognition of the need to think differently about ideas of citizenship and sovereignty around the world. Liquid Borders will be of interest to policy makers, and to researchers across the humanities, sociology, area studies, politics, international relations, geography, and of course migration and border studies.

**Honduras in Dangerous Times** - James J. Phillips 2015-10-16

Honduras in Dangerous Times is a historical and ethnographic study of the evolution of popular resistance in modern Honduras. This book contributes to understanding societal change in dangerous contexts, connecting everyday lives to broad societal movements, and emphasizing popular resistance as both critical and creative.

Extracting Honduras - James J. Phillips 2022-01-04

This book explores the deeper causes of recent massive emigrations from Honduras, tracing the roots to the neoliberal extractive development model that has created conditions of poverty, corruption, and violence for over a generation in the context of the colonial (or imperial) relationship of Honduras to the United States.

**The Fourth Industrial Revolution** - Klaus Schwab 2017-01-03

World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an

opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

**Trust in Government Agencies in the Time of COVID-19** - Scott E. Robinson 2021-10-31

As the US faced its lowest levels of reported trust in government, the COVID-19 crisis revealed the essential service that various federal agencies provide as sources of information. This Element explores variations in trust across various levels of government and government agencies based on a nationally-representative survey conducted in March of 2020. First, it examines trust in agencies including the Department of Health and Human Services, state health departments, and local health

care providers. This includes variation across key characteristics including party identification, age, and race. Second, the Element explores the evolution of trust in health-related organizations throughout 2020 as the pandemic continued. The Element concludes with a discussion of the implications for agency-specific assessments of trust and their importance as we address historically low levels of trust in government. This title is also available as Open Access on Cambridge Core.

**Thieves of State: Why Corruption Threatens Global Security** - Sarah Chayes 2015-01-19

Winner of the 2015 Los Angeles Times Book Prize for Current Interest. "I can't imagine a more important book for our time." —Sebastian Junger  
The world is blowing up. Every day a new blaze seems to ignite: the bloody implosion of Iraq and Syria; the East-West standoff in Ukraine; abducted schoolgirls in Nigeria. Is there some thread tying these frightening international security crises together? In a riveting account that weaves history with fast-moving reportage and insider accounts from the Afghanistan war, Sarah Chayes identifies the unexpected link: corruption. Since the late 1990s, corruption has reached such an extent that some governments resemble glorified criminal gangs, bent solely on their own enrichment. These kleptocrats drive indignant populations to extremes—ranging from revolution to militant puritanical religion. Chayes plunges readers into some of the most venal environments on earth and examines what emerges: Afghans returning to the Taliban, Egyptians overthrowing the Mubarak government (but also redesigning Al-Qaeda), and Nigerians embracing both radical evangelical Christianity and the Islamist terror group Boko Haram. In many such places, rigid moral codes are put forth as an antidote to the collapse of public integrity. The pattern, moreover, pervades history. Through deep archival research, Chayes reveals that canonical political thinkers such as John Locke and Machiavelli, as well as the great medieval Islamic statesman Nizam al-Mulk, all named corruption as a threat to the realm. In a thrilling argument connecting the Protestant Reformation to the Arab Spring, Thieves of State presents a powerful new way to

understand global extremism. And it makes a compelling case that we must confront corruption, for it is a cause—not a result—of global instability.

World Social Report 2020 - Department of Economic and Social Affairs 2020-02-14

This report examines the links between inequality and other major global trends (or megatrends), with a focus on technological change, climate change, urbanization and international migration. The analysis pays particular attention to poverty and labour market trends, as they mediate the distributional impacts of the major trends selected. It also provides policy recommendations to manage these megatrends in an equitable manner and considers the policy implications, so as to reduce inequalities and support their implementation.

**Organizing Equality** - Alison Hearn 2022-08-15  
Struggles for equality happen in all corners of the world. While social and economic justice movements are specific to their different national contexts, identities, and forms of oppression, collaboration and coalition building are required if we are to attain sustainable equality and healing justice. Organizing Equality engages activist and scholarly debates about the organization of social and economic equality movements around the globe. The collection covers a myriad of issues, approaches, and experiences, forging a link between critical scholarly studies and

journalistic and artistic works that offer more personal and hands-on perspectives. Moving from a broad discussion of resistance and solidarity, contributors examine case studies in their specific national contexts, such as movement building in Greece, caste politics in India, land struggles in Guatemala, student debt resistance movements in the United States, and the fight to indigenize higher education in Canada. Organizing Equality encourages understanding and collaboration between opposing views as a means of discovering new practices of seeing, learning, organizing, and being together in our movements for equality.

*Political Handbook of the World 2016-2017* - Tom Lansford 2017-03-31

Published since 1928, the Political Handbook of the World provides timely, thorough, and accurate political information with more in-depth coverage of current political controversies and political parties than any other reference guide. The updated 2016-2017 Edition continues this legacy as the most authoritative source for finding complete facts and analysis on each country's governmental and political makeup. Political science and international relations scholars have revised this edition, and made understanding complex foreign affairs and political situations easy and accessible. With more than 200 entries on countries and territories throughout the world, housed in one place, these volumes are renowned for their extensive coverage of all major and minor political parties and groups in each political system. They also provide names of key ambassadors and international memberships of each country, plus detailed profiles of more than 30 intergovernmental organizations and United Nations agencies. This comprehensive update will include coverage of current events, issues, crises, and controversies from the course of the last two years, including: The closely-watched U.S. presidential election The effect of the Brexit referendum and installment of a new British prime minister The extensive investigation and subsequent impeachment of Brazil's president The far-reaching impact of the "Panama Papers" scandal Changes in U.S.-Cuba diplomatic relations and the reopening of their embassies The unconstitutional declaration of Gambia as an Islamic State Sentiments about the migrant and refugee

crisis across Europe and the influence on policy Also, the new "For Further Reference" feature included for every country entry directs readers to additional resources to continue their research.

At Risk - Piers Blaikie 2014-01-21

The term 'natural disaster' is often used to refer to natural events such as earthquakes, hurricanes or floods. However, the phrase 'natural disaster' suggests an uncritical acceptance of a deeply engrained ideological and cultural myth. At Risk questions this myth and argues that extreme natural events are not disasters until a vulnerable group of people is exposed. The updated new edition confronts a further ten years of ever more expensive and deadly disasters and discusses disaster not as an aberration, but as a signal failure of mainstream 'development'. Two analytical models are provided as tools for understanding vulnerability. One links remote and distant 'root causes' to 'unsafe conditions' in a 'progression of vulnerability'. The other uses the concepts of 'access' and 'livelihood' to understand why some households are more vulnerable than others. Examining key natural events and

incorporating strategies to create a safer world, this revised edition is an important resource for those involved in the fields of environment and development studies.

**Putting Progress at Risk?** - Matthew Martin 2013

**The Social Life of Economic Inequalities in Contemporary Latin America** - Margit Ystanes 2017-10-25

This book is open access under a CC BY 4.0 license. This edited volume examines how economic processes have worked upon social lives and social realities in Latin America during the past decades. Through tracing the effects of the neoliberal epoch into the era of the so-called pink tide, the book seeks to understand to what extent the turn to the left at the start of the millennium managed to challenge historically constituted configurations of inequality. A central argument in the book is that in spite of economic reforms and social advances on a range of arenas, the fundamental tenants of socio-economic inequalities have not been challenged substantially. As several countries are now experiencing a return to right-wing politics, this collection helps us better understand why inequalities are so entrenched in the Latin American continent, but also the complex and creative ways that it is continuously contested. The book directs itself to students, scholars and anyone interested in Latin America, economic anthropology, political anthropology, left-wing politics, poverty and socio-economic inequalities.

Open Borders - Reece Jones 2019-02-01

Border control continues to be a highly contested and politically charged subject around the world. This collection of essays challenges reactionary nationalism by making the positive case for the benefits of free movement for countries on both ends of the exchange. Open Borders counters the knee-jerk reaction to build walls and close borders by arguing that there is not a moral, legal, philosophical, or economic case for limiting the movement of human beings at borders. The volume brings together essays by theorists in anthropology, geography, international relations, and other fields who argue for open borders with writings by activists who are working to make safe passage a reality on

the ground. It puts forward a clear, concise, and convincing case for a world without movement restrictions at borders. The essays in the first part of the volume make a theoretical case for free movement by analyzing philosophical, legal, and moral arguments for opening borders. In doing so, they articulate a sustained critique of the dominant idea that states should favor the rights of their own citizens over the rights of all human beings. The second part sketches out the current situation in the European Union, in states that have erected border walls, in states that have adopted a policy of inclusion such as Germany and Uganda, and elsewhere in the world to demonstrate the consequences of the current regime of movement restrictions at borders. The third part creates a dialogue between theorists and activists, examining the work of Calais Migrant Solidarity, No Borders Morocco, activists in sanctuary cities, and others who contest border restrictions on the ground.

**Honduras** - Lauren Wehner 2018-12-15

Honduras is a developing country plagued by political unrest and wealth disparity, with a rich and tumultuous history. Most of the population lives in the mountains, where they maintain a more isolated lifestyle than in other Central American countries. Due to its tropical climate and varying geography, Honduras has a high level of biodiversity, in both plants and animals alike, allowing the nation to be a major exporter of fruit and the second-largest exporter of coffee in Central America. Readers will be able to explore this complex nation in this informative text through engaging sidebars, interesting facts, and vibrant photographs.

*Resilience* - Steven Southwick 2018-04-30

Most of us at some point in our lives will be struck by major traumas such as the sudden death of a loved one, a debilitating disease, assault, or a natural disaster. Resilience refers to the ability to 'bounce back' after encountering difficulty. This book provides a guide to building emotional, mental and physical resilience by presenting ten factors to help anyone become more resilient to life's challenges. Specific resilience factors such as facing fear, optimism, and social support are described through the experiences and personal reflections of highly resilient survivors. These survivors also describe real-life methods for

practicing and benefiting from the resilience factors. As resilience is the complex product of genetic, psychological, biological, social, and spiritual factors, the authors investigate resilience from multiple scientific perspectives. They synthesize the latest literature on the topic, describe their own research on resilience, and quote from their interviews with highly resilient people.

*The Matrix of Race* - Rodney D. Coates 2021-10-30

Topically organized and drawing on the most up-to-date theories and perspectives in the field, *The Matrix of Race*, Second Edition examines the intersecting, multilayered identities of contemporary society, and the powerful social institutions that shape our understanding of race.

Leading scholars Rodney D. Coates, Abby L. Ferber, and David L. Brunson use a storytelling approach to illustrate how racial inequality has produced drastically different opportunities, experiences, and outcomes within all aspects of life, from schools, housing, medicine, and workplaces to our criminal justice and political systems. Readers are equipped with a historical perspective, theoretical framework, and diverse view of race and racial ideologies so that they can confidently participate and contribute to dialogues and practices that will ultimately dismantle race and racial structures. **Resilience, Adaptive Peacebuilding and Transitional Justice** -

Janine Natalya Clark 2021-10-07

Processes of post-war reconstruction, peacebuilding and reconciliation are partly about fostering stability and adaptive capacity across different social systems. Nevertheless, these processes have seldom been expressly discussed within a resilience framework. Similarly, although the goals of transitional justice - among them (re)establishing the rule of law, delivering justice and aiding reconciliation - implicitly encompass a resilience element, transitional justice has not been explicitly theorised as a process for building resilience in communities and societies that have suffered large-scale violence and human rights violations. The chapters in this unique volume theoretically and empirically explore the concept of resilience in diverse societies that have experienced mass violence and human rights abuses. They analyse the extent to which transitional justice processes have - and can - contribute to resilience and how, in so doing, they can foster adaptive peacebuilding. This book is available as Open Access.

**Deported to Death** - Jeremy Slack 2019-07-30

What happens to migrants after they are deported from the United States and dropped off at the Mexican border, often hundreds if not thousands of miles from their hometowns? In this eye-opening work, Jeremy Slack foregrounds the voices and experiences of Mexican deportees, who frequently become targets of extreme forms of violence, including migrant massacres, upon their return to Mexico. Navigating the complex world of the border, Slack investigates how the high-profile drug war has led to more than two hundred thousand deaths in Mexico, and how many deportees, stranded and vulnerable in unfamiliar cities, have become fodder for drug cartel struggles. Like no other book before it, *Deported to Death* reshapes debates on the long-term impact of border enforcement and illustrates the complex decisions migrants must make about whether to attempt the return to an often dangerous life in Mexico or face increasingly harsh punishment in the United States.

*Civil Resistance and Violent Conflict in Latin America* - Cécile Mouly

2019-01-21

This book explores distinct forms of civil resistance in situations of violent conflict in cases across Latin America, drawing important lessons learned for nonviolent struggles in the region and beyond. The authors analyse campaigns against armed actors in situations of internal armed conflict, against private sector companies that seek to exploit natural resources, and against the state in defence of housing rights, to cite only some scenarios of violent conflict in which people in Latin America have organized to resist imposition by powerful actors and/or confront violence and oppression. Each of the nine cases studied looks at the violent context in which civil resistance took place, its modality, its results and the factors that influenced these, as well as the challenges faced, offering useful insights for scholars and practitioners alike.

*Coping with Global Environmental Change, Disasters and Security* - Hans Günter Brauch 2011-02-03

*Coping with Global Environmental Change, Disasters and Security - Threats, Challenges, Vulnerabilities and Risks* reviews conceptual debates and case studies focusing on disasters and security threats, challenges, vulnerabilities and risks in Europe, the Mediterranean and other regions. It discusses social science concepts of vulnerability and risks, global, regional and national security challenges, global warming, floods, desertification and drought as environmental security challenges, water and food security challenges and vulnerabilities, vulnerability mapping of environmental security challenges and risks, contributions of remote sensing to the recognition of security risks, mainstreaming early warning of conflicts and hazards and provides conceptual and policy conclusions.

*The Vulnerability of Cities* - Mark Pelling 2012-06-25

When disaster strikes in cities the effects can be catastrophic compared to other environments. But what factors actually determine the vulnerability or resilience of cities? *The Vulnerability of Cities* fills a vital gap in disaster studies by examining the too-often overlooked impact of disasters on cities, the conditions leading to high losses from urban disasters and why some households and communities withstand disaster

more effectively than others. Mark Pelling takes a fresh look at the literature on disasters and urbanization in light of recent catastrophes. He presents three detailed studies of cities in the global South, drawn from countries with contrasting political and developmental contexts: Bridgetown, Barbados - a liberal democracy; Georgetown, Guyana - a post socialist-state; and Santo Domingo, Dominican Republic - an authoritarian state in democratic transition. This book demonstrates that strengthening local capacity - through appropriate housing, disaster-preparedness, infrastructure and livelihoods - is crucial to improving civic resilience to disasters. Equally important are strong partnerships between local community-based organizations, external non-governmental and governmental organizations, public and private sectors and between city and national government. The author highlights and discusses these best practices for handling urban disasters. With rapid urbanization across the globe, this book is a must-read for professionals, policy-makers, students and researchers in disaster management, urban development and planning, transport planning, architecture, social studies and earth sciences.

**World Economic Situation and Prospects 2020** - United Nations 2020-01-16

This is the United Nations definitive report on the state of the world economy, providing global and regional economic outlook for 2020 and 2021. Produced by the Department of Economic and Social Affairs, the five United Nations regional commissions, the United Nations Conference on Trade and Development, with contributions from the UN World Tourism Organization and other intergovernmental agencies.

**State of the World's Indigenous Peoples** - United Nations. Department of Economic and Social Affairs 2009

While indigenous peoples make up around 370 million of the world's population - some 5 per cent - they constitute around one-third of the world's 900 million extremely poor rural people. Every day, indigenous communities all over the world face issues of violence and brutality. Indigenous peoples are stewards of some of the most biologically diverse areas of the globe, and their biological and cultural wealth has allowed

indigenous peoples to gather a wealth of traditional knowledge which is of immense value to all humankind. The publication discusses many of the issues addressed by the Declaration on the Rights of Indigenous Peoples and is a cooperative effort of independent experts working with the Secretariat of the Permanent Forum on Indigenous Issues. It covers poverty and well-being, culture, environment, contemporary education, health, human rights, and includes a chapter on emerging issues.

**Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation** - Christopher B. Field 2012-05-28

This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable

human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

**The Nation** - 2010
