Palliative Care for Advanced Alzheimer's and Dementia - Jennifer V. Long, CRNA, CRNP, MS 2010-07-23

2010 AJN Book of the Year Award Winner in both Gerontologic Nursing and Hospice and Palliative Care! "This book...provides important information on best practices and appropriate ways to care for a person with Alzheimer's and advanced dementia. Drs. Martin and Sabbagh have assembled a team of experts to help craft recommendations that should ultimately become standards that all professional caregivers adopt." - Michael Reagan Son of former President Ronald Reagan President, Reagan Legacy Foundation This book testifies that caregivers can have a monumental impact on the lives of persons with advanced dementia. Through specialized programming and a renewed effort toward patient-centered care, caregivers can profoundly enrich the quality of life for these persons. Providing guidelines for health care professionals, caregivers, and family members, this book introduces palliative care programs and protocols for the treatment of people with advanced dementia. The book is designed to guide professional caregivers in meeting the needs of patients and their families, providing insight into the philosophy, assessment, planning, implementation, and evaluation measures involved in interdisciplinary palliative care. The chapter authors offer guidelines and standards of care based on contributions from nurses, physical therapists, social workers, dietitians, psychologists, family caregivers and pastors. An exhibit at the end of every chapter clearly articulates the standards of care appropriate for all advanced dementia facilities and health care staff. This book helps caregivers: Enhance the physiological, psychological, social, and spiritual well-being of the patient and the patient's family Anticipate and meet the patient's basic human needs: hunger, thirst, body positioning, hygiene, continence, and management of any pain Ensure that the patient's surroundings are safe, comfortable, and homelike Address health care decisions that will support the patient's right to self-determination until the end of life

Multilingual Interaction and Dementia - Charlotta Plejert 2017-04-12 This book brings together international, linguistic research with a focus on interaction in multilingual encounters involving people with dementia in care and healthcare settings. The methodologies used (Conversation Analysis, Ethnography and Discursive Constructionism) capture practices on the micro-level, revealing how very subtle details may be of critical importance for the everyday well-being of participants with dementia,

particularly in settings and contexts where there is a lack of a common verbal language of interlocutors, or where language abilities have been lost as a result of dementia. Chapters analyse the practices and actions employed by interlocutors to facilitate mutual understanding, enhance high-quality social relations and assure optimal care and treatment, in spite of language and cognitive difficulties, with an emphasis put on the participants' remaining capacities, and what can be achieved between people with dementia and their interlocutors in a collaborative fashion. This book goes beyond the study of two-party communication to address multiparty and group interactions which are common in residential care and other healthcare settings and will be of interest to professionals and policy makers as well as to medical sciences and linguistics researchers and students.

Nursing Homes - John E. Dicken 2011-08

The Centers for Medicare & Medicaid Services (CMS) contracts with state survey agencies to investigate complaints about nursing homes from residents, family members, and others. CMS helps assure the adequacy of state complaint processes by issuing guidance, monitoring data that state survey agencies enter into CMS's database, and annually assessing performance against specific standards. Concerns have been raised about complaint investigations and CMS's oversight. This report examined: (1) complaints received and investigated by state survey agencies; (2) whether those agencies were meeting CMS performance standards and other requirements; and (3) the effectiveness of CMS's oversight. Illus. A print on demand report.

Making the Golden Years Golden - Eva Mor 2008-07

If you are going to read one book on health care and retirement it should be; Making the Golden Years Golden. Author Dr. Eva Mor, an expert with three decades of experience in the health industry, explains health care, economic and legal issues and offers solutions in layman terms. In today's economy, and with the current short comings of the health system, Making the Golden Years Golden is a rich source of essential information to anyone planning ahead to his or her retirement. Reading this book will help you to establish a step-by-step plan to protect yourself from costly errors and scams, keeping you well, safe, and providing you with the knowledge to carefully invest for the years ahead. This book also covers the multitude of choices for you or your loved one when picking the appropriate residential situations from nursing homes to home health care to assisted living facilities. Making the Golden Years Golden provides the reader with guidelines to navigate federal and state programs, such as Medicare, Medicaid and Social Security. It walks you through legal aspects that will touch all our lives in our later years. There are lifelines out there to help you, and this book is intended to be your guide and compass to point you in the right direction. If there is one thing that you should come away with after reading this book, it should be the fact that our society, although very complex and far from perfect, still offers a very rich life for us as we age. By making the right choices, we all can make the "golden years" truly golden.

Abuse of Older Men - Jordan I. Kosberg 2014-01-02

Learn the causes of—and consequences from—elder abuse of men. For the most part, often only women are considered the victims of elder abuse. However, men are also subject to this disturbing social problem. *Abuse of Older Men* examines the diverse aspects of this surprisingly widespread issue that includes sexual abuse, abuse by intimates, and benign neglect in the health care field, as well as effective treatment strategies. This unique resource provides the latest research and crucial discussions of why the problem is often invisible, under-studied, and under-treated. Detailed explorations include risk assessment, differential detection of abuse of one gender over the other, the risk of abandonment, economic exploitation, and the issues of older men who had been abused in childhood. In the past, elder abuse literature has—quite correctly—mainly focused on the abuse of women, who represent the majority of older persons. *Abuse of Older Men* expands the discussion of this distressing social challenge to include the other gender, reviewing the different types of abuse and the reasons why it is not readily apparent in today's society. This compelling text examines in detail the causes and consequences of elder abuse of men. The under-reporting of abuse is addressed, along with suggestions on ways to better approach various problems. This insightful resource is extensively referenced and provides tables to clearly present data. Issues discussed in *Abuse of Older Men* include: intimate partner abuse perpetrated against older men, sexual abuse of older men in nursing homes, the impact of gender on the reporting of elder abuse, neglectful aspects of osteoporosis in older men, past relationships that increase the risk of the neglect of older fathers, news accounts that report the frequency and types of abuse against men, identifying and treating victims, societal forces that affect older men's risk of mistreatment, recommendations for structuring services to better meet victim's needs, the social construction of manhood as an important factor in understanding the abuse of older men. *Abuse of Older Men* provides crucial information for practitioners, educators, researchers, and students in social work, nursing, medicine, law, gerontology, adult protective services, criminal justice, sociology, psychology, domestic violence, counseling, ethics, public policy, and aging networks.

Nursing Home Federal Requirements - James Elmore Allen 2006
Designated a Doody's Core Title!. Accessible and user-friendly, this updated edition of *Nursing Home Federal Requirements* contains information that is essential for nursing home administrators as well as educators and professionals preparing for licensure. It presents the latest federal guidelines and the procedures used by federal surveyors in certifying facilities for participation in Medicare and Medicaid. It is the only text that provides a comprehensive index to nursing home federal requirements. The volume spans every aspect and service of a nursing home, from telephone access and comfortable lighting to urinary incontinence treatment and proper drug storage. Administrators who implement these regulations will ensure that outstanding quality assurance and risk management programs are in place.

Nursing Home Administration, Seventh Edition - James E. Allen, PhD, MSPH, NHA, IP 2015-11-04

Sixth Edition Named a 2013 Doody's Essential Purchase! A detailed road map of essential knowledge for obtaining licensure and employment as a nursing home administrator, the Seventh Edition of this classic text is updated to reflect the 2014 National Association of Boards of Examiners of Nursing Home Administrators (NAB) Domains of Practice. With more than 50 new topics, it comprehensively addresses all new regulations for managing a nursing facility along with a detailed overview of the skills and knowledge required to be a successful administrator. The Seventh Edition responds to the many changes that have recently occurred in the long-term care field. It provides a completely new Minimum Data Set 3.0 (MDS), 2015 Federal Requirements for Electronic Records, the new International Classification of Diseases, Tenth Revision, Clinical Modification (ICD-10-CM), new Quality Measures, updated Instructions for Making Data as per the Centers for Medicare and Medicaid, the impacts of the Affordable Care Act (ACA), and several new federal regulations. The Seventh Edition clearly describes what nursing home managers do, how they think, and how they lead. It breaks down the art of management into its basic tasks—forecasting, planning, organizing, staffing, directing, controlling quality, innovating, and marketing—and examines them in depth. The text pinpoints all of the separate components of nursing home administration—management, human resources, team dynamics, conflict resolution, finance and business, industry laws and regulations, and patient care—and describes how they fit together to form the coordinated activity set required of a successful

nursing home administrator. Abundant real-life case studies, chapter objectives, and critical thinking questions greatly enhance learning. Mastering this text will prepare students to take—and pass with a depth of understanding—the nationally required NAB examination. New to the Seventh Edition: 2014 updated NAB Domains of Practice: Management, Human Resources, Finance, Environment, and Resident Care. Introduces over 50 new topics including team dynamics, conflict resolution, and basic principles of nursing and social work. Vast changes wrought by new technology and patient data. Gilbert Guide, America's premier source of information for senior care and housing needs, provides helpful and comprehensive information about: *How to evaluate housing needs *Each available housing option, including services, contacts, and financing *Subsidized housing *Moving and settling in *How to get the best services *Government agencies and other resources

The Activity Year Book - Anni Bowden 2009-03-15

Engagement in meaningful activity is an important aspect of human existence, regardless of one's cognitive abilities. Even in the later stages of dementia, people can still be engaged in activities at a level that allows them to be successful. In fact in these later stages, where cognitive abilities may be waning, the need for activity becomes greater, as cognitive stimulation helps preserve what skills remain. For care staff looking after older people, many of whom may have some degree of dementia, coming up with ideas for activities of a suitable level to keep their residents engaged and stimulated can be challenging. The Activity Year Book solves this problem, offering week by week themed activities. From Valentine's Day quizzes to Bonfire Night word searches, it has activities relating to every important date in the calendar, and also encourages reminiscence and discussion around these events. This book will be invaluable to care staff looking for a simple way of improving the lives of their residents, week by week, all year round.

Live and Laugh with Dementia - Lee-Fay Low 2014-10-09

Worldwide, over 45 million people suffer with dementia. That number is expected to increase to 75 million by 2030; 135 million by 2050. For every person with dementia, their family and carers are faced with the decision of how best to care for them. *Live and Laugh with Dementia* is

all about how to make life with dementia as positive as possible — to maximize quality of life for all concerned. Just as we need to exercise our body's muscles to keep them strong, flexible and working well, so too do we need to exercise our mental muscles (our brain) in order to strengthen and maintain our neural capabilities. By tailoring activities to suit the needs and abilities of dementia patients, we can help them to: maintain their relationships with others; maintain their self-identity; slow the decline of mental function by providing physical and mental stimulation; stave off boredom; and, experience happiness and pleasure. Live and Laugh with Dementia also addresses our attitude towards dementia and caring for people with dementia. It supports and inspires carers to build their relationship with the person with dementia and provide meaningful engaging activities. As well as suggestions for activities and how to tailor them, tips for people with mild dementia are included in order to empower them to be active and keep control of their lives as much as possible.

Roskey's Guide to Smart Housing Choices - Carol B. Roskey 2012-02-22
For generations, it has been an axiom that the purchase of a home is the greatest single investment the average person makes. The corollary has always been that if you take good care of that home it will inevitably be a good investment, permitting you to sell your home at a profit or allowing you to take out a large loan on the equity you've built up. While the axiom is still true, the corollary is no longer true. Many Americans have lost their homes due to the Great Recession and still more owe more on their homes than the homes are worth. People once made a lot of money on flipping homes; now many wonder if they should buy homes at all. There are unmistakable signs that we are headed into an even worse recession, making any housing decisions more important than ever. An acknowledged expert, Dr. Carol Roskey has spent a lifetime in studying all aspects of the housing field from financing to the best kinds of insulation. With her help, you can make well informed decisions.

God's Stories - Sharon Lynn Davy 2012-08-07

I know that all of us have God Stories to share. If we are still, we can see the hand of God daily. God is always there watching over us and directing our paths. These stories of God's intervention will show you His faithfulness and abundant love that He pours out on His children. It is my hope that these stories will touch the hearts of many. Over the last 11 years as I was experiencing the various storms of life I would see that God was ever present. I would spend time in prayer and reading His Word. He would comfort me and speak to me. When the storms were calmed, I would sit down and write the story. I can take no credit for this book. This is not about me but all about God. I give Him all the glory.

Choosing a Good Nursing Home - Sherri L. Mitchell 2009-08-27

Are you and your family faced with the decision of placing your loved one in a nursing home? The choice may be one of the most important decisions that you will ever make. In *Choosing a Good Nursing Home*, Sherri L. Mitchell offers valuable insight in understanding the questions to ask to properly explore which nursing home can best meet the needs of your loved one. *Choosing a Good Nursing Home* enables you to see the facility from a different vantage point. It moves beyond the surface appearance of the home and looks at the areas that will aid you in making a knowledgeable decision. The book covers topics from what to look for in the initial tour of the facility, to knowing what questions to ask if your loved one has dementia, is in need of therapy, has weight loss problems or has pressure ulcers (bedsores). *Choosing a Good Nursing Home* allows you to make a more informed decision as to where to place your loved one, whether the stay will be for short-term rehabilitation or permanent placement. Sherri L. Mitchell began her career in nursing home administration after her grandmother received poor care in a nursing home. She subsequently became a Licensed Nursing Home Administrator (L.N.H.A.) in the state of Illinois. She couples her previous

experience as a granddaughter (of a nursing home resident) with her experience as an administrator to give you the needed perspective to assist you in selecting a good nursing home. Mitchell resides in Chicago, Illinois with her husband of eleven years.

Nursing Home Federal Requirements - James E. Allen MSPH, PhD, CNHA 2010-11-24

"[The book] lists all the federal requirements that are evaluated by state surveyors during the annual survey visit to nursing homes and for complaint visits. The exhibit section contains forms used by surveyors to gather data during the survey visit. Visually, the format makes the regulations easy to read. If nursing home staff used the book to prepare for a survey, they would be well prepared." Marcia Flesner, PhD, RN, MHCA University of Missouri-Columbia
From Doody's Review The Federal government, together with more than 50 advocacy groups, has spent the past 40 years writing and refining the rules and guidelines in this manual. This book presents the latest federal guidelines and protocols used by federal surveyors in certifying facilities for participation in Medicare and Medicaid funding. It is an essential resource for long-term care facilities to have on hand to be ready for a survey at any time. It provides information straight from CMS's Internet-Only Manual-in print and at your fingertips for easy access. Divided into four accessible and user-friendly parts, this manual includes: Federal requirements and interpretive guidelines Rules for conducting the survey Summary of the requirements for long-term care facilities and surveyors CMS forms commonly used by surveyors This newly updated and revised edition spans every aspect and service of a nursing home and represents the latest requirements to ensure that outstanding quality assurance and risk management programs are in place. New to This Edition: Section on how to use manual Summarization of federal requirements Updated definitions of Medicare and Medicaid Compliance requirements with Title VI of the Civil Rights Act of 1964 SNF/Hospice requirements when SNF serves hospice patients SNF-based home health agencies Life safety code requirements Changes in SNF provider status Surveyor qualifications standards Management of complaints and incidents New medical director guidelines

Television in the Nursing Home - Wendy J Hajjar 2013-04-03

Television in the Nursing Home: A Case Study of the Media Consumption Routines and Strategies of Nursing Home Residents is a three-stage ethnographic study of media use by the elderly in long-term care facilities. This research concludes that watching television is the most prevalent and pervasive activity for patients. Activity directors can now learn how television and media can offer diversion, enhancement of personality, awareness, and sociability to their patients and offers suggestions on roommate coordination, selection of appropriate media, and communication resources. Containing the latest knowledge involving communication and gerontology, *Television in the Nursing Home* will help you offer programs that will meet the demands of an expanding elderly population. Developed as a perspective for examining patterns of social interaction, *Television in the Nursing Home* gives suggestions on how you can use the media to create new activities for patients, maximizing the television as a resource for the elderly. You will gain valuable insight on: proof to dispel the myth that television in long-term patient care causes withdrawal and depression a breakthrough in the treatment of media and aging, enhancing media-based activities and the use and purchase of electronic equipment for care facilities studies on how and why television is the most accessible medium of communication information for the development of new media designed specifically for use by the elderly creation of media-centered activities that recognize the potential for therapeutic use of communication technologies in the nursing home The research presented in *Television in the Nursing Home* establishes the fact that television consumption, once thought to be problematic, should be seen as desirable and necessary. This important book also proves how television is a resource that provides comfort, self-expression, and sociality. This first-ever study will convince you that television and media use in long-term care is beneficial and essential to the wellness of your patients.

Nursing Homes Explained - Delia Marie Franklin 2013

In "Nursing Homes Explained," an RN specializing in Gerontology shares her knowledge to help prepare readers for the inevitable decisions that have to be made as we and our loved ones age, and it provides a useful overview of the industry for nursing students and others thinking of entering the field. The book educates readers about the long-term care industry and the field of gerontology, with a discussion on death and dying, Alzheimer units, rehabilitation processes, elder abuse, the physician/COs role, and how corporations, middle management and direct care providers operate within the elder-care/medical profession."

Person-Centered Memory and Communication Interventions for Dementia - Ellen M. Hickey 2021-03-19

Person-Centered Memory and Communication Interventions for Dementia: A Case Study Approach is the third volume in the "Medical Speech-Language Pathology" book series. It is a practical, peer-reviewed resource for speech-language pathologists (SLPs) working with people with dementia. In this unique text, the authors cover a variety of evidence-based clinical procedures for the memory, communication, and behavioral challenges of people with dementia. The aim is to empower SLPs and other clinicians to implement practices that elevate the personhood of people living with various dementia syndromes. Throughout this clinician-friendly text, the authors cover three main areas of focus: elevating personhood, the "how tos" of clinical procedures, and the organizational-level barriers and facilitators to implementation. After an introductory chapter, the next eight chapters describe a detailed case study that explains specific person-centered assessment and treatment methods. The cases depict a diverse group of people providing insights into the range of concerns and joys involved in supporting memory and communication in a manner that is culturally responsive and equitable. Key Features: * The only dementia text that incorporates a culturally responsive approach to cases that reflect the

increasing diversity of the aging population * Specific examples of the “how tos” of person-centered, evidence-based care * Detailed personal, assessment, and treatment histories for each case, with a table of goals and intervention procedures, as well as illustrations of memory and communication strategies * Each chapter starts with an “At-A-Glance” section to highlight the person and ends with a summary of key points of the treatment and implementation factors * Uses a highly readable writing style with boxes, tables, and figures to support the text

Nursing Home Administration - Michael Mileski, DC, MPH, MHA, MSHEd, LNFA, FACHCA 2022-09-15

Now in its eighth edition, *Nursing Home Administration* remains the authoritative textbook detailing the nursing facility administrator role, what they do, how they think, and how they lead. By breaking down the art of administration into its basic, need-to-know tasks—forecasting, planning, organizing, staffing, directing, controlling quality, innovating, and marketing—this text provides the essential context to managing and leading nursing homes and skilled nursing facilities. Thoroughly updated to include the four domains of practice as put forth by the National Association of Long-Term Care Administrator Boards (NAB) for 2022 licensure examination and beyond, this textbook is complete with essential context for the domains and associated competencies to better prepare students for the required NAB examination. With revised sections addressing new federal regulations and laws affecting the field, best practices in residential care, and refreshed examples and cases, this text continues to set students up for success in working as a nursing facility administrator. Updated sections address changes within the

residential care continuum, provide further information on patient-driven payment models and value-based care, and inform current practices for marketing and controlling quality within the long-term care facility. Chapter boxes reflect common pitfalls in practice while real-life case studies and critical thinking exercises, including a “What Do I Do Now?” section that concludes all chapters, encourage students to consider challenges they may experience in the field. In addition to updated domains of practice—care, services, and supports; operations; environmental and quality; and leadership and strategy—the book describes how core components fit together.
