*The Virtual Public Servant* - Stephen Jeffares 2020-11-30

With recent advances and investment in artificial intelligence, are we on the verge of introducing virtual public servants? Governments around the world are rapidly deploying robots and virtual agents in healthcare, education, local government, social care, and criminal justice. These advances not only promise unprecedented levels of control and convenience at a reduced cost but also claim to connect, to empathise, and to build trust. This book documents how—after decades of designing out costly face to face transactions, investment in call centres, and incentivising citizens to self-service—the tech industry is promising to re-humanise our frontline public services. It breaks out of disciplinary silos and moves us on from the polarised hype vs. fear discussion on the future of work. It does so through in-depth Q-methodology interviews with a wide range of frontline public servants, from doctors to librarians, from social workers to school receptionists, and from police officers to call handlers. The first of its kind, this book should be of interest across the social sciences and to anyone concerned with how recent measures to digitise and automate our services are paving the way for the development of full-blown AI in frontline work.

In a Queer Time and Place - J. Jack Halberstam 2005

The first full-length study of transgender representations in art, fiction, film, video, and music In her first book since the critically acclaimed *Female Masculinity*, Judith Halberstam examines the significance of the

transgender body in a provocative collection of essays on queer time and space. She presents a series of case studies focused on the meanings of masculinity in its dominant and alternative forms’ especially female and trans-masculinities as they exist within subcultures, and are appropriated within mainstream culture. In *Queer Time and Place* opens with a probing analysis of the life and death of Brandon Teena, a young transgender man who was brutally murdered in small-town Nebraska. After looking at mainstream representations of the transgender body as exhibited in the media frenzy surrounding this highly visible case and the Oscar-winning film based on Brandon's story, *Boys Don’t Cry*, Halberstam turns her attention to the cultural and artistic production of queers themselves. She examines the “transgender gaze,” as rendered in small art-house films like *By Hook or By Crook*, as well as figurations of ambiguous embodiment in the art of Del LaGrace Volcano, Jenny Saville, Eva Hesse, Shirin Neshat, and others. She then exposes the influence of lesbian drag king cultures upon hetero-male comic films, such as *Austin Powers* and *The Full Monty*, and, finally, points to dyke subcultures as one site for the development of queer counterpublics and queer temporalities. Considering the sudden visibility of the transgender body in the early twenty-first century against the backdrop of changing conceptions of space and time, *In a Queer Time and Place* is the first full-length study of transgender representations in art, fiction, film, video, and music. This pioneering book offers both a jumping off point for future analysis of transgenderism and an important new way to understand cultural constructions of time and place.

*One Million Years AD* - Samantha Faulkner 2019-02-18

A disastrous experiment sends Sally Shagwell spiralling through time, though whether into the past or the future is not immediately clear. A dinosaur attack places her firmly in the Jurassic period, but there are primitive people running around here too, in rather revealing loincloths, and if Sally knows one thing it is that humans and dinosaurs never co-existed. Perhaps she has slipped sideways in time, into an alternative reality. Or perhaps she is on a different planet altogether. Only one thing is certain: the dinosaurs are the least of her problems!

**Final Girls, Feminism and Popular Culture** - Katarzyna Paszkiewicz 2020-05-05

This volume examines contemporary reformulations of the 'Final Girl' in

film, TV, literature and comic, expanding the discussion of the trope beyond the slasher subgenre. Focusing specifically on popular texts that emerged in the 21st century, the volume asks: What is the sociocultural context that facilitated the remarkable proliferation of the Final Girls? What kinds of stories are told in these narratives and can they help us make sense of feminism? What are the roles of literature and media in the reconsiderations of Carol J. Clover's term of thirty years ago and how does this term continue to inform our understanding of popular culture? The contributors to this collection take up these concerns from diverse perspectives and with different answers, notably spanning theories of genre, posthumanism, gender, sexuality and race, as well as audience reception and spectatorship.

*Smoke* - Meili Cady 2015-03-24

Combining the excess of *The Bling Ring* with the intimacy of *Blow* and the charm of *Catch Me If You Can*, an outrageous, entertaining and true story of an aspiring young actress' ill-fated friendship and unwitting alliance with a drug smuggling "heiress." Aspiring actress Meili Cady left small-town Washington State for the glamorous lure of Los Angeles. Young and alone, she was struggling to make her big break. Then she met Lisette Lee. Calling herself the "Korean Paris Hilton," Lisette claimed she was a model and a Korean pop star, lived in a \$1.2 million dollar apartment in West Hollywood, owned a fleet of luxury cars, and flitted from one red-carpet event to the next. The connection was instant. Meili was enchanted by her friend's extravagant lifestyle, while Lee claimed Meili was the real thing in a town full of phonies. Soon, the financially strapped Meili became her friend's personal assistant—and found herself sucked into an audacious criminal enterprise. But when Meili finally realized what she was a part of it was too late—she was in too deep, caught in a terrifying relationship with a manipulative and abrasive con artist smuggling millions of dollars of pot into the Midwest. Trapped in a precarious criminal world of money, drugs, and dangerous secrets, Meili struggled to understand the line between truth and lie. A once naive girl who fell down the rabbit hole, she could only watch helplessly as it all came crashing down around her. *Smoke* is her story—an electrifying tale of vice, corruption, hubris, and lost innocence as shocking and entertaining as *The Wolf of Wall Street* and *Bringing Down the House*.

**Schroder** - Amity Gaige 2013-02-05

A lyrical and deeply affecting novel recounting the seven days a father spends on the road with his daughter after kidnapping her during a parental visit. Attending a New England summer camp, young Eric Schroder—a first-generation East German immigrant—adopts the last name Kennedy to more easily fit in, a fateful white lie that will set him on an

improbable and ultimately tragic course. SCHRODER relates the story of Eric's urgent escape years later to Lake Champlain, Vermont, with his six-year-old daughter, Meadow, in an attempt to outrun the authorities amid a heated custody battle with his wife, who will soon discover that her husband is not who he says he is. From a correctional facility, Eric surveys the course of his life to understand—and maybe even explain—his behavior: the painful separation from his mother in childhood; a harrowing escape to America with his taciturn father; a romance that withered under a shadow of lies; and his proudest moments and greatest regrets as a flawed but loving father. Alternately lovesick and ecstatic, Amity Gaige's deftly imagined novel offers a profound meditation on history and fatherhood, and the many identities we take on in our lives—those we are born with and those we construct for ourselves.

Machine Medical Ethics - Simon Peter van Rysewyk 2014-09-05

The essays in this book, written by researchers from both humanities and science, describe various theoretical and experimental approaches to adding medical ethics to a machine, what design features are necessary in order to achieve this, philosophical and practical questions concerning justice, rights, decision-making and responsibility in medical contexts, and accurately modeling essential physician-machine-patient relationships. In medical settings, machines are in close proximity with human beings: with patients who are in vulnerable states of health, who have disabilities of various kinds, with the very young or very old and with medical professionals. Machines in these contexts are undertaking important medical tasks that require emotional sensitivity, knowledge of medical codes, human dignity and privacy. As machine technology advances, ethical concerns become more urgent: should medical machines be programmed to follow a code of medical ethics? What theory or theories should constrain medical machine conduct? What design features are required? Should machines share responsibility with humans for the ethical consequences of medical actions? How ought clinical relationships involving machines to be modeled? Is a capacity for empathy and emotion detection necessary? What about consciousness? This collection is the first book that addresses these 21st-century

concerns.
