Contract Law - Neil Andrews 2015-05-14
Significantly streamlined and updated, the

second edition of Andrews' Contract Law now provides a clear and succinct examination of all of the topics in the contract law curriculum. Chapters direct students to the most important decisions in case law and employ a two-level structure to integrate short judicial excerpts into detailed discussion and analysis. Exploration of the law's 'loose ends' strengthens students' ability to effectively analyse case law, and new end-of-chapter questions, which focus on both core aspects of the law and interesting legal loopholes, assist students in preparing for exams. Students are guided through chapter material by concise chapter overviews and a two-colour text design that highlights important chapter elements. Suggestions for further reading and a rich bibliography, which point readers to important pieces of contemporary literature and provide a springboard for deeper investigation of particular topics, lend further support for student learning.

Contract Law Minimalism - Jonathan Morgan

2013-11-07

Commercial contract law is in every sense optional given the choice between legal systems and law and arbitration. Its 'doctrines' are in fact virtually all default rules. Contract Law Minimalism advances the thesis that commercial parties prefer a minimalist law that sets out to enforce what they have decided - but does nothing else. The limited capacity of the legal process is the key to this 'minimalist' stance. This book considers evidence that such minimalism is indeed what commercial parties choose to govern their transactions. It critically engages with alternative schools of thought, that call for active regulation of contracts to promote either economic efficiency or the trust and co-operation necessary for 'relational contracting'. The book also necessarily argues against the view that private law should be understood non-instrumentally (whether through promissory morality, corrective justice, taxonomic rationality, or otherwise). It sketches a

restatement of English contract law in line with the thesis.

Understanding and Negotiating Book Publication Contracts - Brianna Schofield 2018

"Copyright law and contract language are complex, even for attorneys and experts. Authors may be tempted to sign the first version of a publication contract that they receive, especially if negotiating seems complicated, intimidating, or risky. But there is a lot at stake for authors in a book deal, and it is well worth the effort to read the contract, understand its contents, and negotiate for favorable terms. To

Law Books in Action - Angela Fernandez
2012-04-02

'*Law Books in Action: Essays on the Anglo-American Legal Treatise*' explores the history of the legal treatise in the common law world. Rather than looking at treatises as shortcuts from 'law in books' to 'law in action', the essays in this collection ask what treatises can tell us about what troubled legal professionals at a given time, what motivated them to write what they did, and what they hoped to achieve. This book, then, is the first study of the legal treatise as a 'law book in action', an active text produced by individuals with ideas about what they wanted the law to be, not a mere stepping-stone

to codes and other forms of legal writing, but a multifaceted genre of legal literature in its own right, practical and fanciful, dogmatic and ornamental in turn. This book will be of interest to legal scholars, lawyers and judges, as well as to anyone else with a scholarly interest in law in general, and legal history in particular.

Government Contract Law - Charles Tiefer 2004 This new book revises, and adds new foci, to the authors' predecessor casebook Government Contract Law: Cases and Materials (2d ed. 2004). It retains the core chapters for a syllabus on the basics of government contracting law. The authors update the core chapters with short, student-friendly, tightly-edited cases. Many cases date from the 2000s, with most of the rest from the 1990s. These present current understandings of issues and doctrines in this

rapidly evolving field. As new foci, the authors have greatly expanded the number of specialized chapters treating increasingly important topics. New chapters cover such fast-changing specialties as commercial and IDIQ contracting, intellectual property, health care, construction, government and contractor workforce, false claims and defective pricing, and government takings. Also, the book treats new procedures including protests of task order awards and claims for government breaches of contract. Dozens of fresh notes by the authors cover recent developments such as government acquisition of property rights in software, and contracting in the Afghan and Iraq wars. Tiefer and Shook bring academic and practitioner experience and expertise to their treatment of government contract law.

Revisiting the Contracts Scholarship of Stewart Macaulay - Jean Braucher 2013-01-14

This book contains the papers prepared for a conference held at the Wisconsin Law School in

2011 to honour the work of Stewart Macaulay, one of the most famous contracts scholars of his generation. Macaulay has been writing about contracts and contract law for over 50 years; the 1960s were particularly productive years for him, when he introduced many novel ideas into the scholarly world. Macaulay's foundational work for what is now called relational contract theory was published during this period. Macaulay is also known for his use of empirical research and interdisciplinary theories to illuminate our knowledge of contracting practices. The papers in this volume reflect, in diverse ways, on the subsequent influence and the contemporary relevance of Macaulay's work. All the contributors are important contracts scholars in their own right: David Campbell and John Wightman from the UK, Brian Bix, Jay Feinman, Robert Gordon, Claire Hill, Charles Knapp, Ethan Leib, Deborah Post, Edward Rubin, Carol Sanger, Robert Scott, Gordon Smith, Josh Whitford (with Li-Wen Lin) and

William Woodward from the USA. The volume also reproduces Macaulay's most cited paper, 'Non-Contractual Relations in Business', and excerpts from two other important papers of his, 'Private Legislation and the Duty to Read-Business Run by IBM Machine, the Law of Contracts and Credit Cards', and 'The Real and The Paper Deal: Empirical Pictures of Relationships, Complexity and the Urge for Transparent Simple Rules'.

The Curious Incident of the Dog in the Night-Time - Mark Haddon 2009-02-24

A bestselling modern classic—both poignant and funny—narrated by a fifteen year old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions. Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. Although gifted with a superbly logical brain, Christopher is autistic. Everyday interactions and admonishments have little meaning for him. At fifteen, Christopher's carefully constructed world falls apart when he finds his neighbour's dog Wellington impaled on a garden fork, and he is initially blamed for the killing. Christopher decides that he will track

down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents' marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher's mind. And herein lies the key to the brilliance of Mark Haddon's choice of narrator: The most wrenching of emotional moments are chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in years: a comedy, a tearjerker, a mystery story, a novel of exceptional literary merit that is great fun to read.

Sports Law - Patrick K. Thornton 2010-02-04 Sports Law looks at major court cases, statutes, and regulations that explore a variety of legal issues in the sports industry. The early chapters provide an overview of sports law in general terms and explore its impact on race, politics, religion, and everyday affairs. Later chapters address hot button issues such as gender equity, drug testing, and discrimination. Written from a sport management perspective, rather than from a lawyer's, this text covers all the major areas presented in sports law today including: cases relating to torts, contracts, intellectual property, and agents. Factual scenarios throughout the text allow students to critically examine and

apply sport management principles to legal issues facing the sports executive. Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition.

A Casebook on the Roman Law of Contracts - Bruce W. Frier 2021-05-26

Roman contract law has profoundly influenced subsequent legal systems throughout the world, but is inarguably an important subject in its own right. This casebook introduces students to the rich body of Roman law concerning contracts between private individuals. In order to bring out the intricacy of Roman contract law, the casebook employs the case-law method--actual Roman texts, drawn from Justinian's Digest and other sources, are presented both in Latin and English, along with introductions and discussions that fill out the background of the

cases and explore related legal issues. This method reflects the casuistic practices of the jurists themselves: concentrating on the fact-rich environment in which contracts are made and enforced, while never losing sight of the broader principles upon which the jurists constructed the law. The casebook concentrates especially on stipulation and sale, which are particularly well represented in surviving sources. Beyond these and other standard contracts, the book also has chapters on the capacity to contract, the creation of third-party rights and duties, and the main forms of unjustified enrichment. What students can hope to learn from this casebook is not only the general outlines and details of Roman contract law, but also how the jurists developed such law out of rudimentary civil procedures. An online teacher's manual is available for instructors; to access it, see page xxi of the Casebook.

Obligations in Roman Law - Thomas McGinn
2013-01-23

Long a major element of classical studies, the examination of the laws of the ancient Romans has gained momentum in recent years as interdisciplinary work in legal studies has spread. Two resulting issues have arisen, on one hand concerning Roman laws as intellectual achievements and historical artifacts, and on the other about how we should consequently conceptualize Roman law. Drawn from a conference convened by the volume's editor at the American Academy in Rome addressing these concerns and others, this volume investigates in detail the Roman law of obligations—a subset of private law—together with its subordinate fields, contracts and delicts (torts). A centuries-old and highly influential discipline, Roman law has traditionally been studied in the context of law schools, rather than humanities faculties. This book opens a window on that world. Roman law, despite intense interest in the United States and elsewhere in the English-speaking world, remains largely a

continental European enterprise in terms of scholarly publications and access to such publications. This volume offers a collection of specialist essays by leading scholars Nikolaus Benke, Cosimo Cascione, Maria Floriana Cursi, Paul du Plessis, Roberto Fiori, Dennis Kehoe, Carla Masi Doria, Ernest Metzger, Federico Procchi, J. Michael Rainer, Salvo Randazzo, and Bernard Stolte, many of whom have not published before in English, as well as opening and concluding chapters by editor Thomas A. J. McGinn.

governing international arbitration and labor arbitration. The last few decades have witnessed the growth of a large body of legal doctrine--from statutes, judicial decisions, and other sources--focused on arbitration. This Concise Hornbook summarizes that body of law, so should be useful to lawyers and scholars researching arbitration law and to students learning about arbitration. This Concise Hornbook is designed to be used as the primary or secondary text in a law school course. Many teachers of arbitration design their courses to develop a wide array of practice skills, generally through the use of role-playing exercises. Because this book is clear and concise, students reading it can quickly gain a solid understanding of arbitration's central concepts and legal doctrines. This efficient use of time enables the teacher to devote many class sessions to role-playing exercises, and discussion of them. This Concise Hornbook can also serve as the primary text for arbitration seminars. Before venturing

into a field of scholarship, students generally need a solid foundation in the field's central concepts and legal doctrines. This book provides that foundation with only a limited amount of reading, thus enabling students to devote substantial time to the seminar's more-advanced work of reading scholarly articles and writing original papers.

Vulnerable Adults and the Law - Jonathan Herring 2016-01-21

We are used to thinking that most people have the capacity to make their own decisions; that they should be free to decide how to live their lives; and that it is a good thing to be self-sufficient. However, in an examination of the legal position of vulnerable adults, understood as those who have capacity under the Mental Capacity Act 2005 but are deemed impaired through vulnerability in their exercise of decision making powers, Jonathan Herring challenges that assumption. Drawing on feminist and disability perspectives he argues that we are

all in fact, 'vulnerable' and we need to replace the competent, able-bodied, independent person as the norm which the law is based on and instead fashion which recognises our interdependence and mutuality. At the heart of the law is a distinction between those who have capacity and those who do not. Those who have capacity are given the full rights of the law; they are entitled to enter contracts, dispose of their property, are able to marry. Those who are deemed to lack capacity are unable to make these decisions. Their decisions are made on their behalf based on an assessment of what is in their best interests. This approach is underpinned by the principle of autonomy, and is problematic for those who are deemed 'vulnerable'. The Court of Protection and the Court of Appeal have developed a jurisdiction to deal with cases involving vulnerable adults which has been used in a wide range of cases from those involving people with early stage dementia to cases of forced marriage. This

development of law has proved controversial and the courts have struggled to draw its limits and explain the justification for it. Jonathan Herring welcomes the courts willingness to protect vulnerable adults through the inherent jurisdiction, but argues that we need to go much further. It is not just particular groups such as 'the elderly' or 'the disabled' who are vulnerable, but rather vulnerability is part of the human condition. This means that caring relationships are of central significance to our society and should be at the heart of the legal system.

Essential Principles of Contract and Sales Law in the Northern Pacific - Daniel Ryan 2005

Taking an anthropological approach, Essential Principles of Contract and Sales Law in the Northern Pacific highlights how regional customary and traditional law interact with Anglo-American concepts of contract and sales law to produce a unique amalgam of substantive law in this Pacific region. Author and law professor Daniel P. Ryan compiles and discusses the current contract and sales law applicable in the Pacific region, including the Republics of Palau and the Marshall Islands, Hawaii, Guam, Northern Mariana Islands, American Samoa, and the Federated States of Micronesia. Ryan compares and contrasts this regional law to international standards, including the UN Sale of Goods Convention, the UNIDROIT Principles of

Casebook of Exemplary Evidence-Informed Programs that Foster Community Participation After Acquired Brain Injury -
Richard Volpe 2013-06-01

Acquired brain injury (ABI) describes damage to the brain that occurs after birth, caused by traumatic injury such as an accident or fall, or by non-traumatic cause such as substance abuse, stroke, or disease. Today's medical techniques are improving the survival rate for people of all ages diagnosed with ABI, and current trends in rehabilitation are supporting these individuals returning to live, attend school, and work in their communities. Yet strategies on the best way of providing community participation vary among rehabilitation experts. Because many of survivors of ABI do not and will not return to the status quo of their former lives

it is important to examine what constitutes best and promising practices in this area. This casebook is the world's first compilation of evidence-informed programs that foster community participation for people of all ages with brain injury. With this review, we elicited and carefully examined existing programmatic efforts that combine emphasis on the individual, the social, and the service systems in a way that captures community participation as a complex process of interactive change in the person-environment relationship - programs that do not divorce ABI survivors from their contexts, and where participation efforts facilitate positive change in the social and political context. We considered community-based programs to be programs where individuals and families actively participate in their own therapy (rehabilitation) and take responsibility for their own health or that of a family/community member. Each case study chapter depicts a program chosen on its extraordinary merits to provide community

participation to its clients. The chapters are cowritten by the stakeholder and a researcher, giving a complete perspective of how the program was established and continues to operate, and provides evidence of excellence. *Philosophical Foundations of Contract Law* - Gregory Klass 2014-12-18

In recent years there has been a revival of interest in the philosophical study of contract law. In 1981 Charles Fried claimed that contract law is based on the philosophy of promise and this has generated what is today known as 'the contract and promise debate'. Cutting to the heart of contemporary discussions, this volume brings together leading philosophers, legal theorists, and contract lawyers to debate the philosophical foundations of this area of law. Divided into two parts, the first explores general themes in the contract theory literature, including the philosophy of promising, the nature of contractual obligation, economic accounts of contract law, and the relationship

between contract law and moral values such as personal autonomy and distributive justice. The second part uses these philosophical ideas to make progress in doctrinal debates, relating for example to contract interpretation, unfair terms, good faith, vitiating factors, and remedies. Together, the essays provide a picture of the current state of research in this revitalized area of law, and pave the way for future study and debate.

Aspiration and Reality in Legal Education -

David Sandomierski 2020-02-24

Contrary to conventional narratives about legal education, *Aspiration and Reality in Legal*

Education reveals a widespread desire among law teachers to integrate both theory and practice into the education of versatile and civic-minded lawyers. Despite this stated desire, however, this aspiration is largely unrealized due to a host of intellectual and institutional factors that produce a profound gap between what professors believe about law and the ideas they communicate through their teaching. Drawing on interviews with over sixty law professors in Canada, David Sandomierski makes two important empirical discoveries in this book. First, he establishes that, contrary to a dominant narrative in legal education that conceives of theory and practice as oppositional, the vast majority of law professors consider theory to be vitally important in preparing "better lawyers." Second, he uncovers a significant gap between the realist theoretical commitments held by a majority of professors and the formalist theories they almost uniformly convey through their teaching and conceptions

of legal reasoning. Understanding the intellectual and institutional factors that account for these tensions, Sandomierski argues, is essential for any meaningful project of legal education reform.
