This first complete history of the runs (including the predecessor Gilmore Economy Runs) follows each year’s competitors day by day, covers some aspects not reported at the time and features a wealth of photographs. It includes coverage of the related Mobil Mileage Rally, held for imported cars from 1958 through 1961. Complete results for all of the competitions are provided in an

**Ford FE Engines** - Barry Rabotnick 2018-06-15  
Ford FE engines, which were manufactured from the late 1950s all the way through the mid-1970s, were designated as the large-displacement engines in the Ford lineup. FE means Ford Edsel, and reflects an era when Ford sought to promote the Edsel name. The design of these engines was implemented to increase displacement over its predecessor, the Y-Block engines of the previous decade. Early models were fairly modest in displacement, as were most big-blocks of the era, but they grew quickly to fill the needs of rapidly changing chassis requirements and consumer demand for larger vehicles. As it grew, the FE engine performed admirably as a heavy passenger car and light truck engine. It also became quite accomplished in performance circles, winning the 24 Hours of Le Mans, as well as powering Ford’s muscle car and drag racing programs in

the mid- to late 1960s. In this book, you will learn everything you need to know to rebuild one of these legendary engines. CarTech's unique Workbench series format takes you step-by-step through the entire rebuilding process. Covered are engine identification and selection, disassembly, cleaning, parts analysis and assessment, machine shop processes, replacement parts selection, re-assembly and start-up/break-in techniques. Along the way you find helpful tips on performance upgrades, trouble spots to look for, special tools required, and professional builder's tips. FE master, owner of Survival Motorsports, and veteran author Barry Rabotnick shares all of his tricks and secrets on building a durable and reliable FE engine. Whether you are simply rebuilding an old truck for reliable service use, restoring a 100-point show car, or building the foundation for a high-performance street and strip machine, this book will be an irreplaceable resource for all your future FE engine

projects.

**Straddling Class in the Academy** - Sonja Ardoin  
2019-05-31

Why do we feel uncomfortable talking about class? Why is it taboo? Why do people often address class through coded terminology like trashy, classy, and snobby? How does discriminatory language, or how do conscious or unconscious derogatory attitudes, or the anticipation of such behaviors, impact those from poor and working class backgrounds when they straddle class? Through 26 narratives of individuals from poor and working class backgrounds - ranging from students, to multiple levels of administrators and faculty, both tenured and non-tenured - this book provides a vivid understanding of how people can experience and straddle class in the middle, upper, or even elitist class contexts of the academy. Through the powerful stories of individuals who hold many different

identities--and naming a range of ways they identify in terms of race, ethnicity, gender, sexuality, age, ability, and religion, among others--this book shows how social class identity and classism impact people's experience in higher education and why we should focus more attention on this dimension of identity. The book opens by setting the foundation by examining definitions of class, discussing its impact on identity, and summarizing the literature on class and what it can tell us about the complexities of class identity, its fluidity, sometimes performative nature, and the sense of dissonance it can provoke. This book brings social class identity to the forefront of our consciousness, conversations, and behaviors and compels those in the academy to recognize classism and reimagine higher education to welcome and support those from poor and working class backgrounds. Its concluding chapter proposes means for both increasing social class consciousness and

social class inclusivity in the academy. It is a compelling read for everyone in the academy, not least for those from poor or working class backgrounds who will find validation and recognition and draw strength from its vivid stories.
