The Internet Is Not the Answer
- Andrew Keen 2015-01-06

The renowned Internet commentator and author of *How to Fix the Future* "expos[es] the greed, egotism and narcissism that fuels the tech world" (Chicago Tribune). The digital revolution has contributed to the world in many positive ways, but we are less aware of the Internet's deeply negative effects. *The Internet Is Not the Answer*, by longtime Internet skeptic Andrew Keen, offers a comprehensive look at what the Internet is doing to our lives. The book traces the technological and economic history of the Internet, from its

founding in the 1960s through the rise of big data companies to the increasing attempts to monetize almost every human activity. In this sharp, witty narrative, informed by the work of other writers, reporters, and academics, as well as his own research and interviews, Keen shows us the tech world, warts and all. Startling and important, *The Internet Is Not the Answer* is a big-picture look at what the Internet is doing to our society and an investigation of what we can do to try to make sure the decisions we are making about the reconfiguring of our world do not lead to unpleasant, unforeseen aftershocks. "Andrew Keen has written a very powerful and daring manifesto questioning whether the Internet lives up to its own espoused values. He is not an opponent of Internet culture, he is its conscience, and must be heard." —Po Bronson, #1 New York Times–bestselling author

When it comes to advertising on the web, you just can't argue with the numbers. A \$7 billion market today is expected to grow to \$18.9 billion by 2010. Jupiter Research also estimates that search advertising will be a larger share of the market than display advertising by 2010. These phenomenal numbers are due largely to Google, which has changed the way the world publishes content - and advertises. Google Advertising

Tools from O'Reilly examines the business and technology behind making money with content and advertising on the web. This focused, easy-to-read guide shows you how to use Google's advertising services to make it happen. You'll find all the background information you need to work with Google AdSense, which automatically delivers text and image ads that are precisely targeted to your site, and Google AdWords, which lets you generate text ads that accompany specific search term results. This book has specific and detailed sections on: Turning your web site into a profit center with AdSense Making sense of AdSense metrics Driving traffic to your site Optimizing sites for search engine placement Working with AdWords campaigns, auctions, and reports Managing campaigns dynamically using the AdWords APIs Once you've read all four parts, you'll have a comprehensive picture of how advertising works on the web and how you can use the Google advertising programs to
