The Year of Magical Thinking - Joan Didion

2007-02-13

NEW YORK TIMES BESTSELLER • NATIONAL BOOK AWARD WINNER • From one of

America's iconic writers, a stunning book of electric honesty and passion that explores an intensely personal yet universal experience: a portrait of a marriage—and a life, in good times and bad—that will speak to anyone who has ever loved a husband or wife or child. Several days before Christmas 2003, John Gregory Dunne and Joan Didion saw their only daughter, Quintana, fall ill with what seemed at first flu, then pneumonia, then complete septic shock. She was put into an induced coma and placed on life support. Days later—the night before New Year's Eve—the Dunes were just sitting down to dinner after visiting the hospital when John Gregory Dunne suffered a massive and fatal coronary. In a second, this close, symbiotic partnership of forty years was over. Four weeks later, their daughter pulled through. Two months after that, arriving at LAX, she collapsed and underwent six hours of brain surgery at UCLA Medical Center to relieve a massive hematoma. This powerful book is Didion's

attempt to make sense of the “weeks and then months that cut loose any fixed idea I ever had about death, about illness ... about marriage and children and memory ... about the shallowness of sanity, about life itself.

Black Like Me - John Howard Griffin 2006-04-01
This American classic has been corrected from the original manuscripts and indexed, featuring historic photographs and an extensive biographical afterword.

The Historian - Elizabeth Kostova 2005-06-01
The record-breaking phenomenon from Elizabeth Kostova is a celebrated masterpiece that "refashioned the vampire myth into a compelling contemporary novel, a late-night page-turner" (San Francisco Chronicle). Breathtakingly suspenseful and beautifully written, *The Historian* is the story of a young woman plunged into a labyrinth where the secrets of her family's past connect to an inconceivable evil: the dark fifteenth-century reign of Vlad the Impaler and a time-defying

fact that may have kept his awful work alive through the ages. The search for the truth becomes an adventure of monumental proportions, taking us from monasteries and dusty libraries to the capitals of Eastern Europe—in a feat of storytelling so rich, so hypnotic, so exciting that it has enthralled readers around the world. “Part thriller, part history, part romance...Kostova has a keen sense of storytelling and she has a marvelous tale to tell.” —Baltimore Sun

The Recognitions - William Gaddis 2012-02-07
The book Jonathan Franzen dubbed the "ur-text of postwar fiction" and the "first great cultural critique, which, even if Heller and Pynchon hadn't read it while composing *Catch-22* and *V.*, managed to anticipate the spirit of both"—The *Recognitions* is a masterwork about art and forgery, and the increasingly thin line between the counterfeit and the fake. Gaddis anticipates by almost half a century the crisis of reality that

we currently face, where the real and the virtual are combining in alarming ways, and the sources of legitimacy and power are often obscure to us.

Mesklin is a vast, inhospitable, disc-shaped planet, so cold that its oceans are liquid methane and its snows are frozen ammonia. It is a world spinning dizzily, a world where gravity can be a crushing 700 times greater than Earth's, a world too hostile for human explorers. But the planet holds secrets of inestimable value, and an unmanned probe that has crashed close to one of its poles must be recovered. Only the Mesklinites, the small creatures so bizarrely adapted to their harsh environment, can help. And so Barlennan, the resourceful and courageous captain of the Mesklinite ship Bree, sets out on an heroic and appalling journey into the terrible unknown. For him and his people, the prize to be gained is as great as that for mankind... Hal Clement's MISSION OF GRAVITY

is universally regarded as one of the most important and best loved novels in the genre. The remarkable and sympathetic depiction of an alien species and the plausible and scientifically based realisation of the strange world they inhabit make it a major landmark in the history of hard SF.

The Case against Education - Bryan Caplan
2019-08-20

Why we need to stop wasting public funds on education Despite being immensely popular—and immensely lucrative—education is grossly overrated. Now with a new afterword by Bryan Caplan, this explosive book argues that the primary function of education is not to enhance students' skills but to signal the qualities of a good employee. Learn why students hunt for easy As only to forget most of what they learn after the final exam, why

decades of growing access to education have not resulted in better jobs for average workers, how employers reward workers for costly schooling they rarely ever use, and why cutting education spending is the best remedy. Romantic notions about education being "good for the soul" must yield to careful research and common sense—The Case against Education points the way.

The Intuitionist - Colson Whitehead 2012-05-23

This debut novel by the two time Pulitzer Prize-winning author of *The Underground Railroad* and *The Nickel Boys* wowed critics and readers everywhere and marked the debut of an important American writer. Nominated as one of

America's best-loved novels by PBS's The Great American Read It is a time of calamity in a major metropolitan city's Department of Elevator Inspectors, and Lila Mae Watson, the first black female elevator inspector in the history of the department, is at the center of it. There are two warring factions within the department: the Empiricists, who work by the book and dutifully check for striations on the winch cable and such; and the Intuitionists, who are simply able to enter the elevator cab in question, meditate, and intuit any defects. Lila Mae is an Intuitionist and, it just so happens, has the highest accuracy rate in the entire department. But when an elevator in a new city building goes into total freefall on Lila Mae's watch, chaos ensues. It's an election year in the Elevator Guild, and the good-old-boy Empiricists would love nothing more than to assign the blame to an Intuitionist. But Lila Mae is never wrong. The sudden appearance of excerpts from the lost notebooks of Intuitionism's founder, James Fulton, has also

caused quite a stir. The notebooks describe Fulton's work on the "black box," a perfect elevator that could reinvent the city as radically as the first passenger elevator did when patented by Elisha Otis in the nineteenth century. When Lila Mae goes underground to investigate the crash, she becomes involved in the search for the portions of the notebooks that are still missing and uncovers a secret that will change her life forever. Look for Colson Whitehead's bestselling new novel, Harlem Shuffle!

The Fingerprint - U.s. Department of Justice
2014-08-02

The idea of The Fingerprint Sourcebook originated during a meeting in April 2002. Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the

International Association for Identification (IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international scientific community.

The third edition of this book is an updated and expanded presentation of the widely used Integrative Developmental Model of Supervision. In contrast to other volumes on clinical supervision, Stoltenberg and McNeill present a comprehensive, time-tested, and empirically

investigated model of supervision, rather than a broad summary of other existing or historical approaches. In addition to presenting a model of therapist development that spans beginning through advanced training, the book integrates theory and research from numerous perspectives, including learning, cognition, and emotion, as well as an up-to-date treatment of research directly addressing the supervision process. The model also examines the role of clinical supervision from an evidence-based practice perspective and addresses issues of common factors in therapy. The impact of cultural issues in supervision and training, as well as recent work in a competencies approach to supervision and trainee development, are also examined.
