Aircraft Design Projects - Lloyd R. Jenkinson

2003-04-28

Written with students of aerospace or aeronautical engineering firmly in mind, this is a practical and wide-ranging book that draws together the various theoretical elements of aircraft design - structures, aerodynamics, propulsion, control and others - and guides the reader in applying them in practice. Based on a range of detailed real-life aircraft design projects, including military training, commercial and concept aircraft, the experienced UK and US based authors present engineering students with an essential toolkit and reference to support their own project work. All aircraft

projects are unique and it is impossible to provide a template for the work involved in the design process. However, with the knowledge of the steps in the initial design process and of previous experience from similar projects, students will be freer to concentrate on the innovative and analytical aspects of their course project. The authors bring a unique combination of perspectives and experience to this text. It reflects both British and American academic practices in teaching aircraft design. Lloyd Jenkinson has taught aircraft design at both Loughborough and Southampton universities in the UK and Jim Marchman has taught both aircraft and spacecraft design at Virginia Tech in the US. * Demonstrates how basic aircraft design processes can be successfully applied in reality * Case studies allow both student and instructor to examine particular design challenges * Covers commercial and successful student design projects, and includes over 200 high quality illustrations

Freedom Flight - Ricky De Agrela 2013-11-14 Freedom Flight is the story of two ordinary men on an extraordinary adventure. In celebration of the centenary of powered flight and a decade of South African independence, SA pilots Alan Honeyborne and Ricky De Agrela took off, completely unsupported, from Cape Town on 16 December 2003. Their aim - to touch down on each continent of the world on the longest expedition ever flown in microlights. The expedition achieved several firsts for private aviation including flying through Yemen and Nepal and completing an unsupported microlight flight from South Africa to Australia. However, tragedy struck, first in China where Alan went down and later in Belize, when Alan's replacement, Martin Walker, also sustained a fatal accident. Ricky overcame personal trauma and debilitating fear to fly alone from England through Europe, over the Mediterranean Sea, the Sahara Desert and the wildernesses of East and Southern Africa to make it back to Cape Town. His accomplishment embodies the expedition's vision of encouraging others to reach for the sky. The story of Ricky's remarkable achievement is told in website updates and e-mail correspondence with maps detailing the 64 000-kilometre route.

Flight to Freedom - Colin Townsend

2022-05-31

The planning was complete, and the three girls started their once in a lifetime journey. It had taken a lot of planning, but not as much as was needed later. It all started off so well but left Deb in a filthy cell with nothing to do but count the cockroaches, which there were many, the fetid water she was given gave her stomach cramps. Then Dad arrived... but how? He grabbed her quickly and pulled her near the door to unlock the hand and ankle cuffs that secured her. She sighed so he did not need to check her pulse. He managed to lift her onto his shoulder, noticing how light she was - a bonus in a way - as he managed to move quickly across the road. He quickly retrieved his bow and disappeared into the bushes, managing to trip only twice and never enough to floor him. Can they get away for good?
