*You're Not Listening* - Kate Murphy 2020-01-07

When was the last time you listened to someone, or someone really listened to you? "If you're like most people, you don't listen as often or as well as you'd like. There's no one better qualified than a talented journalist to introduce you to the right mindset and skillset—and this book does it with science and humor." -Adam Grant, #1 New York Times bestselling author of *Originals* and *Give and Take* \*\*Hand picked by Malcolm Gladwell, Adam Grant, Susan Cain, and Daniel Pink for Next Big Ideas Club\*\* "An essential book for our times." -Lori Gottlieb, New York Times bestselling author of *Maybe You Should Talk to Someone* At work, we're taught to lead the conversation. On social media, we shape our personal narratives. At parties, we talk over one another. So do our politicians. We're not listening. And no one is listening to us. Despite living in a world where technology allows constant digital communication and opportunities to connect, it seems no one is really listening or even knows how. And it's making us lonelier, more isolated, and less tolerant than ever before. A listener by trade, New York Times contributor Kate Murphy wanted to know how we got here. In this always illuminating and often humorous deep dive, Murphy explains why we're not listening, what it's doing to us, and how we can reverse the trend. She makes accessible the psychology, neuroscience, and sociology of listening while also introducing us to some of the best listeners out there (including a CIA agent, focus group

moderator, bartender, radio producer, and top furniture salesman). Equal parts cultural observation, scientific exploration, and rousing call to action that's full of practical advice, *You're Not Listening* is to listening what Susan Cain's *Quiet* was to introversion. It's time to stop talking and start listening.

**Good Guys** - David G. Smith 2020-10-13

What's missing from gender equality efforts?

Men. Women are at a disadvantage in the workplace, where they deal with unequal pay, sexual harassment, lack of credit for their contributions, and more. And while organizations are looking to address these issues, too many gender-inclusion initiatives focus exclusively on how women should respond, leaving men out of the equation. Such efforts reinforce the perception that these are "women's issues" and that men--often the most powerful stakeholders in an organization--don't need to be involved. As gender-in-the-workplace experts David G. Smith and W. Brad Johnson show in this important book, men have a crucial opportunity to promote gender equality at work. Research shows that when men are deliberately engaged in gender-inclusion programs, 96 percent of women in those organizations perceive real progress in gender equality, compared with only 30 percent of women in organizations without strong male engagement. *Good Guys* is the first book to provide a practical, research-based guide for how to be a male ally to women in the workplace. Filled with firsthand accounts from both men and women, as well as tips for getting started, the book shows how men can partner with their female colleagues to advance women's leadership and equality by breaking ingrained gender stereotypes, overcoming unconscious biases, developing and supporting the talented women around them, and creating productive and respectful working relationships with women--especially in a post-#MeToo world.

*The Startup Community Way* - Brad Feld

2020-08-03

*The Way Forward for Entrepreneurship Around the World* We are in the midst of a startup revolution. The growth and proliferation of innovation-driven startup activity is profound, unprecedented, and global in scope. Today, it is understood that communities of support and knowledge-sharing go along with other resources. The importance of collaboration and a long-term commitment has gained wider acceptance. These principles are adopted in many startup communities throughout the world. And yet, much more work is needed. Startup activity is highly concentrated in large cities. Governments and other actors such as large corporations and universities are not collaborating with each other nor with entrepreneurs as well as they could. Too often, these actors try to control activity or impose their view from the top-down, rather than supporting an environment that is led from the bottom-up. We continue to see a disconnect between an entrepreneurial mindset and that of many actors who wish to engage with and support entrepreneurship. There are structural reasons for this, but we can overcome many of these obstacles with appropriate focus and sustained practice. No one tells this story better than Brad Feld and Ian Hathaway. *The Startup Community Way: Evolving an Entrepreneurial Ecosystem* explores what makes startup communities thrive and how to improve collaboration in these rapidly evolving, complex environments. *The Startup Community Way* is an explanatory guide for startup communities. Rooted in the theory of complex systems, this book establishes the systemic properties of entrepreneurial ecosystems and explains why their complex nature leads people to make

predictable mistakes. As complex systems, value creation occurs in startup communities primarily through the interaction of the "parts" - the people, organizations, resources, and conditions involved - not the parts themselves. This continual process of bottom-up interactions unfolds naturally, producing value in novel and unexpected ways. Through these complex, emergent processes, the whole becomes greater and substantially different than what the parts alone could produce. Because of this, participants must take a fundamentally different approach than is common in much of our civic and professional lives. Participants must take a whole-system view, rather than simply trying to optimize their individual part. They must prioritize experimentation and learning over planning and execution. Complex systems are uncertain and unpredictable. They cannot be controlled, only guided and influenced. Each startup community is unique. Replication is enticing but impossible. The race to become "The Next Silicon Valley" is futile - even Silicon Valley couldn't recreate itself. This book: Offers practical advice for entrepreneurs, community builders, government officials, and other stakeholders who want to harness the power of entrepreneurship in their city Describes the core components of startup communities and entrepreneurial ecosystems, as well as an explanation of the differences between these two related, but distinct concepts Advances a new framework for effective startup community building based on the theory of complex systems and insights from systems thinking Includes contributions from leading entrepreneurial voices Is a must-have resource for entrepreneurs, venture capitalists, executives, business and community leaders, economic development authorities, policymakers, university officials, and anyone wishing to understand how startup communities work anywhere in the world

*Prepared* - Diane Tavenner 2021-09-14

A blueprint for how parents can stop worrying about their children's future and start helping them prepare for it, from the cofounder and CEO of one of America's most innovative public-school networks "A treasure trove of deeply practical wisdom that accords with everything I know about how children thrive."—Angela

Duckworth, New York Times bestselling author of *Grit* In 2003, Diane Tavenner cofounded the first school in what would soon become one of America's most innovative public-school networks. Summit Public Schools has since won national recognition for its exceptional outcomes: Ninety-nine percent of students are accepted to a four-year college, and they graduate from college at twice the national average. But in a radical departure from the environments created by the college admissions arms race, Summit students aren't focused on competing with their classmates for rankings or test scores. Instead, students spend their days solving real-world problems and developing the skills of self-direction, collaboration, and reflection, all of which prepare them to succeed in college, thrive in today's workplace, and lead a secure and fulfilled life. Through personal stories and hard-earned lessons from Summit's exceptional team of educators and diverse students, Tavenner shares the learning philosophies underlying the Summit model and offers a blueprint for any parent who wants to stop worrying about their children's future—and start helping them prepare for it. At a time when many students are struggling to regain educational and developmental ground lost to the disruptions of the pandemic, *Prepared* is more urgent and necessary than ever.

**No Rules Rules** - Reed Hastings 2020-09-08  
The New York Times bestseller Shortlisted for the 2020 Financial Times & McKinsey Business Book of the Year Netflix cofounder Reed Hastings reveals for the first time the unorthodox culture behind one of the world's most innovative, imaginative, and successful companies There has never before been a company like Netflix. It has led nothing short of a revolution in the entertainment industries, generating billions of dollars in annual revenue while capturing the imaginations of hundreds of millions of people in over 190 countries. But to reach these great heights, Netflix, which launched in 1998 as an online DVD rental service, has had to reinvent itself over and over again. This type of unprecedented flexibility would have been impossible without the counterintuitive and radical management principles that cofounder Reed Hastings established from the very beginning. Hastings

rejected the conventional wisdom under which other companies operate and defied tradition to instead build a culture focused on freedom and responsibility, one that has allowed Netflix to adapt and innovate as the needs of its members and the world have simultaneously transformed. Hastings set new standards, valuing people over process, emphasizing innovation over efficiency, and giving employees context, not controls. At Netflix, there are no vacation or expense policies. At Netflix, adequate performance gets a generous severance, and hard work is irrelevant. At Netflix, you don't try to please your boss, you give candid feedback instead. At Netflix, employees don't need approval, and the company pays top of market. When Hastings and his team first devised these unorthodox principles, the implications were unknown and untested. But in just a short period, their methods led to unparalleled speed and boldness, as Netflix quickly became one of the most loved brands in the world. Here for the first time, Hastings and Erin Meyer, bestselling author of *The Culture Map* and one of the world's most influential business thinkers, dive deep into the controversial ideologies at the heart of the Netflix psyche, which have generated results that are the envy of the business world. Drawing on hundreds of interviews with current and past Netflix employees from around the globe and never-before-told stories of trial and error from Hastings's own career, *No Rules Rules* is the fascinating and untold account of the philosophy behind one of the world's most innovative, imaginative, and successful companies.

**SUMMARY - The Culture Map: Breaking Through The Invisible Boundaries Of Global Business By Erin Meyer** - Shortcut Edition 2021-06-08

\* Our summary is short, simple and pragmatic. It allows you to have the essential ideas of a big book in less than 30 minutes. By reading this summary, you will learn to recognize the professional and relational codes ordering work in the world, codes that every expatriate manager must master even if the different cultural references encountered are sometimes far removed from their own original pattern. You will also discover that : each invisible frontier that draws the world map protects a cultural identity, a characteristic expression, an art of communication; depending on the history of the country, verbal and non-verbal language are shaped by millenary traditions or are the result of population movements and ethnic mixes from waves of immigration ; in the professional context, the most frequent relational difficulties are conditioned by the cultural environment of the country; to manage intercultural misunderstandings and gain acceptance, the manager must possess qualities of listening, humility and diplomacy. Erin Meyer was born in a small town in Minnesota and her only big trip was moving to Minneapolis where she grew up. As an adult, she travels the world as a cross-cultural management consultant. Her missions consist in preparing managers destined for expatriation in their wish to adapt to a team with cultural references far from those they are used to. Today, Erin Meyer teaches intercultural management at INSEAD, an institution in the Paris region, where 93% of students are foreigners. She transforms this place of diversity, a veritable breeding ground for disparities, into a laboratory for experiments. Her observations have led her to draw up a list of eight areas identifying cultural differences. These axes revolve around communication, evaluation, persuasion, leadership, decision making, trust, disagreement and time

management. Erin Meyer develops and illustrates her theory based on her personal experiences and numerous anecdotes from expatriate managers. \*Buy now the summary of this book for the modest price of a cup of coffee!

How national culture impacts organizational culture—and business success Using extensive case studies of successful global corporations, this book explores the impact of national culture on the corporate strategy and its execution, and through this ultimately business success—or failure. It does not argue that different cultures lead to different business results, but that all cultures impact organizations in ways both positive and negative, depending on the business cycle, the particular business, and the particular strategies being pursued. Depending on all of these factors, cultural dynamics can either enable or derail performance. But recognizing those cultural factors is difficult for business leaders; like everyone else, they too can be blind to the culture of which they are a part. The book offers managers and leaders eight recommendations for recognizing those cultural factors that negatively impact performance, as well as those that can be harnessed to encourage superior performance. With real case studies from companies in Asia, Europe, and the United States, this book offers a truly global approach to organizational culture. Offers a fresh approach to the effects of national culture on organizational culture that is applicable to any country in any region Based on case studies of such companies as Toyota, Samsung, General Motors, Nokia, Walmart, Kone and British Leyland It describes the origins and nature of the most common corporate crisis and how culture impacts the response to such a crisis Ideal for managers, business leaders, and board members, as well as business school students A welcome response to the flat-Earth fad that argues we're all alike, this book offers a nuanced and practical view of cultural differentiators and how they can enable or derail business performance.

*The Art of Doing Business Across Cultures* -  
Craig Storti 2017-01-24

People in other cultures don't always think and act the way you do. If you try to do business your

way in their culture, you will make mistakes. And mistakes have consequences. Some will be merely embarrassing, others will be deeply frustrating, and still others will cost you dearly. This book describes 50 common cultural mistakes made in business settings in the form of short (8-10 line) conversations and shows you, 1) that there's always a reason why people do the strange things they do, 2) the reason is almost never to upset you, and 3) there's always a way forward - The Fix. Craig Storti, a nationally known figure in the field of intercultural communications, and author of 7 books, presents and deconstructs conversations between Americans and citizens of 10 of the world's largest economies, the Arab Middle East, Brazil, China, England, France, Germany, India, Japan, Mexico, and Russia. He also provides five easily applicable steps to cultural competence - a framework readers can apply to identify cultural differences and communicate and act more effectively and appropriately. If you are an American doing business in any of the ten locations featured, if you come from one of these countries and work with Americans, or if you do business with any of these folks, this book will save you a great deal of confusion and frustration.

In *The Culture Map*, INSEAD professor Erin Meyer is your guide through this subtle, sometimes treacherous terrain in which people from starkly different backgrounds are expected to work harmoniously together. She provides a field-tested model for decoding how cultural differences impact international business, and combines a smart analytical framework with practical, actionable advice.

**Criticism and Feedback Talks Using Meyer's Culture Map and Hofstede's Value Dimensions. How to Ideally Criticize Individual Employees and Teams in Japan and the USA** - Anonym 2021-01-21

Seminar paper from the year 2020 in the subject Leadership and Human Resource Management - Miscellaneous, grade: 1,3, Aachen University of Applied Sciences, language: English, abstract: This paper uses the theoretical foundations of Hofstede's Cultural Dimensions and Meyer's Cultures Map to develop feedback guidelines for a Dutch manager in Japan and a French manager in the USA. For this purpose, the countries concerned are first classified and compared using Meyer's and Hofstede's cultural classification methods. Based on the theoretical foundation, feedback guidelines are developed for the respective managers. With regard to the Dutch manager in Japan, it is particularly evident that he should be careful to use a

language that is not too direct and that he needs to adapt to the Japanese high-context culture in both speech and behavior. The French manager in the USA is advised mainly to use diplomacy and understand flatter hierarchies and greater willingness to take risks. In a further step, the developed guidelines are compared with feedback rules of the Dutch company Philips and the French company WEKA. In both theory and practice, great importance is attached to an efficient discussion structure. At Philips, importance is also attached to a conversation at eye level and the employee's point of view, which corresponds with the theoretical findings. In the French example, less emphasis is placed on preparation, which is surprising in terms of the theoretical classification of France. Instead, a calm and "non-violent" communication is called for, which to a certain extent is also addressed in the theoretically based guideline. The results of the term paper provide assistance for managers in Japan and the USA. However, it must be remembered that cultures are a very complex construct and that, due to the scope of this term paper, it was not possible to include all components. Managers are advised to deal intensively with the host country's culture in order to ensure

*What You Do Is Who You Are* - Ben Horowitz 2019-10-29

Ben Horowitz, a leading venture capitalist, modern management expert, and New York Times bestselling author, combines lessons both from history and from modern organizational practice with practical and often surprising advice to help executives build cultures that can weather both good and bad times. Ben Horowitz has long been fascinated by history, and

particularly by how people behave differently than you'd expect. The time and circumstances in which they were raised often shapes them—yet a few leaders have managed to shape their times. In *What You Do Is Who You Are*, he turns his attention to a question crucial to every organization: how do you create and sustain the culture you want? To Horowitz, culture is how a company makes decisions. It is the set of assumptions employees use to resolve everyday problems: should I stay at the Red Roof Inn, or the Four Seasons? Should we discuss the color of this product for five minutes or thirty hours? If culture is not purposeful, it will be an accident or a mistake. *What You Do Is Who You Are* explains how to make your culture purposeful by spotlighting four models of leadership and culture-building—the leader of the only successful slave revolt, Haiti's Toussaint Louverture; the Samurai, who ruled Japan for seven hundred years and shaped modern Japanese culture; Genghis Khan, who built the world's largest empire; and Shaka Senghor, a man convicted of murder who ran the most formidable prison gang in the yard and ultimately transformed prison culture. Horowitz connects these leadership examples to modern case-studies, including how Louverture's cultural techniques were applied (or should have been) by Reed Hastings at Netflix, Travis Kalanick at Uber, and Hillary Clinton, and how Genghis Khan's vision of cultural inclusiveness has parallels in the work of Don Thompson, the first African-American CEO of McDonalds, and of Maggie Wilderotter, the CEO who led Frontier Communications. Horowitz then offers guidance to help any company understand its own strategy and build a successful culture. *What You Do Is Who You Are* is a journey through culture, from ancient to modern. Along the way, it answers a question fundamental to any organization: who are we? How do people talk about us when we're not around? How do we treat our customers? Are we there for people in a pinch? Can we be trusted? Who you are is not the values you list on the wall. It's not what you say in company-wide meeting. It's not your marketing campaign. It's not even what you believe. Who you are is what you do. This book aims to help you do the things you need to become the kind of leader you want to be—and

others want to follow.

**52 Activities for Improving Cross-Cultural Communication** - Donna M. Stringer

2009-06-16

Exercises to facilitate effective communication across a wide range of cultural differences  
Communication styles and patterns differ vastly among people from different cultures. Every culture has a "communication style norm" and when that style mixes with another, stereotypes and misperceptions arise. 52 Activities for Improving Cross-Cultural Communication explores cross-cultural communication issues with an eye toward increasing understanding and effectiveness. 52 Activities for Improving Cross-Cultural Communication is a practical trainer's manual that includes applications from many sectors, such as business, diversity, cross-cultural fields, and from many trainers in the U.S., Europe, Asia, the Middle East and Latin America. Exercises are organized according to audience, time required to perform and the risk level for participants, a unique feature created by the authors, and are easily adaptable to the user's particular need and situation. Many of the exercises are written with instructions that address requirements for a specific audience (e.g., gender or generation). There is something for everyone: those who like hands-on, practical activities; those who prefer experiential exercises; and those who learn best through reflection.

[Managing Global Innovation](#) - Yves L. Doz  
2012-10-30

The key to bridging your global innovation gap  
In today's global economy, it would be short-

sighted to rely solely on local resources for new-product innovations. Instead, knowledge and activity critical to innovation most likely lie outside your company's home territories—sometimes far outside. And this distance makes it harder than ever to obtain and integrate these resources, eating away at your competitive edge. How to tackle this challenge? In *Managing Global Innovation*, INSEAD's Yves L. Doz and Keeley Wilson show you how to build and leverage a global innovation network. Drawing on extensive research and real-life company examples, they walk you through a set of practical frameworks for acquiring and integrating innovation-critical knowledge from multiple sources. You'll learn to optimize your innovation footprint, improve communication and receptivity, and enhance collaboration in order to succeed on a global scale. Based on in-depth research within more than three dozen corporations—including Citibank, Essilor, GE, GlaxoSmithKline, HP Labs, HP Singapore, Nokia, Novartis, Shiseido, Siemens, Snecma, Synopsys, and Xerox—this book bridges theory and practice. *Managing Global Innovation* gives you the tools to harness critical expertise from around the globe—and channel it into your innovation programs.

**Global Dexterity** - Andy Molinsky 2013-02-19

"I wrote this book because I believe that there is a serious gap in what has been written and communicated about cross-cultural management and what people actually struggle with on the ground."—From the Introduction  
What does it mean to be a global worker and a true "citizen of the world" today? It goes beyond merely acknowledging cultural differences. In reality, it means you are able to adapt your behavior to conform to new cultural contexts without losing your authentic self in the process. Not only is this difficult, it's a frightening prospect for most people and something completely outside their comfort zone. But managing and communicating with people from other cultures is an essential skill today. Most of us collaborate with teams across borders and cultures on a regular basis, whether we spend our time in the office or out on the road. What's needed now is a critical new skill, something author Andy Molinsky calls global dexterity. In this book Molinsky offers the tools needed to simultaneously adapt behavior to

new cultural contexts while staying authentic and grounded in your own natural style. Based on more than a decade of research, teaching, and consulting with managers and executives around the world, this book reveals an approach to adapting while feeling comfortable—an essential skill that enables you to switch behaviors and overcome the emotional and psychological challenges of doing so. From identifying and overcoming challenges to integrating what you learn into your everyday environment, Molinsky provides a guidebook—and mentoring—to raise your confidence and your profile. Practical, engaging, and refreshing, *Global Dexterity* will help you reach across cultures—and succeed in today's global business environment.
