Pests and Pathogens: Management

Strategies - Vudem D. Reddy 2011-07-12

The need and demand to feed the ever-increasing global population pose major challenges for increasing crop productivity in an eco-friendly manner. The cultivation of crops under input-intensive conditions has however resulted in an enhanced vulnerability of high-yielding cultivars to a multitude of pests and pathogens at all phenological stages. The disease spectrum and intensity are continuously changing because of the dynamic nature of crop systems, pests and pathogens. Disease management has therefore become the major functional component of the crop production systems. This reference volume and manual covers the complete spectrum of current issues in pest and pathogen disease management: Insect pests: pathogens of rice, sorghum, chickpea and castor and their management; Molecular marker-assisted breeding and transgenic crops for disease management; Management of forest insect pests; Effect of climate change on insects, pathogens, plants and pesticide usage; Botanicals & microbial pesticides and insect resistance to synthetic pesticides, and Integrated pest management and bioinformatics' solutions. The text is supported

by a full color photograph section. Most chapters represent studies down in India and South East Asia. Scientists and practitioners working in other subtropical and tropical areas will also benefit from the information and strategies provided in this volume. Edited by three experienced specialists, this volume will benefit researchers and professionals in crop science, plant diseases and bioinformatics.

In Mortal Combat - John Toland 2016-05-31

A history of the Korean War with soldier's-eye views from both sides, by the Pulitzer Prize-winning author of *The Rising Sun* and *Infamy*. Pulitzer Prize-winning author John Toland reports on the Korean War in a revolutionary way in this thoroughly researched and riveting book. Toland pored over military archives and was the first person to gain access to previously undisclosed Chinese records, which allowed him to investigate Chairman Mao's direct involvement in the conflict. Toland supplements his captivating history with in-depth interviews with more than two hundred American soldiers, as well as North Korean, South Korean, and Chinese combatants, plus dozens of poignant photographs, bringing those who fought to vivid life and honoring the memory of those lost. *In Mortal Combat* is comprehensive in its discussion of events deemed controversial, such as American brutality against Korean civilians and allegations of American use of biological warfare. Toland tells the dramatic account of the Korean War from start to finish, from the appalling experience of its POWs to Mao's prediction of MacArthur's Inchon invasion. Toland's account of the "forgotten war" is a must-read for any history aficionado.

Rice Genetics V - Bill Hardy 2007

Rice is now the model plant for genetic research on crop plants; and those who work on rice do so not only to help grow and eat it, but also to advance the frontiers of genetics and molecular biology. This volume is a collection of the papers presented at the Fifth IRGS in 2005. It reports the latest developments

in the field and includes research on breeding, mapping of genes and quantitative trait loci, identification and cloning of candidate genes for biotic and abiotic stresses, gene expression, as well as genomic databases and mutant induction

for functional genomics.
