Beyond Vision - Pavel Florensky 2006-08-15

Beyond Vision is the first English-language collection of essays on art by Pavel Florensky (1882–1937), Russian philosopher, priest, linguist, scientist, mathematician – and art historian. In addition to seven essays by Florensky, the book includes a biographical introduction and an examination of Florensky's contribution as an art historian by Nicoletta Misler. *Beyond Vision* reveals Florensky's fundamental attitudes to the vital questions of construction, composition, chronology, function and destination in the fields of painting, sculpture and design. His reputation as a theologian and philosopher is already established in the English-speaking world, but

this first collection in English of his art essays (translated by Wendy Salmond) will be a revelation to those in the field. Pavel Florensky was a true polymath: trained in mathematics and philosophy at Moscow University, he rejected a scholarship in advanced mathematics in order to study theology at the Moscow Theological Academy. He was also an expert linguist, scientist and art historian. A victim of the Soviet government's animosity towards religion, he was condemned to a Siberian labor camp in 1933 where he continued his work under increasingly difficult circumstances. He was executed in 1937.

Biological Waste Treatment

- W. W. Eckenfelder

2013-09-11

Biological Waste Treatment is the outgrowth of a course entitled "Bio-oxidation of Organic Wastes—Theory and Design" initiated at Manhattan College in 1955. The objective of the course was to present the fundamentals of bio-oxidation which would serve as a framework for the analysis, design, and operation of biological waste treatment facilities. This book reflects the authors' approach to the solution of waste treatment problems. It is intended as an engineering text that applies the principles of physics, chemistry, and biology of waste treatment to the design and operation of waste treatment facilities. The book begins with discussions of the pollutional characteristics of waste waters, the strength and flow of waste, waste treatment processes, and biochemical oxygen demand. Subsequent chapters cover the

principles of biological oxidation, the theory and practice of aeration, stream and estuary analysis, and solid-liquid separation. The final chapters deal with aerobic and anaerobic biological treatment processes and sludge handling and disposal. Although this text is primarily intended to serve as a guide for the practicing engineer, it should also serve as a useful reference for graduate students in sanitary engineering.

Enchiridion - Epictetus the
Stoic 2014-10-21

Whenever there will be a talk about Stoic Philosophy we wouldn't keep away Epictetus from the discussions. The school of stoic philosophy was founded in 3rd century B.C in Athens, the then Greek cultural and strategic capital, by Zeno of Citium. Citium is actually today's Cyprus which has its capital in Nicosia. It is located to the east of Greece in the Mediterranean Sea. And it is the third largest Mediterranean Island both in land size and population. The

need of mentioning Zeno here or anywhere else is lies in the fact that the "Core" of teachings of Stoicism is propagated first by him and then further developed and disseminated by others. Stoicism is essentially based on moral ideas of cynics and it greatly emphasizes on goodness and peace of mind. The success of School of Stoicism can be acknowledged in light of evidences furnished by modern researches which clears that it (Stoicism) not only flourished from Hellenistic period through the Roman era but also played a vital role in everyday lives of Greek population/society. The earliest ideas of Stoicism were based on three key components or drivers, namely, Logic composed of Rhetoric and Grammar, and theories of Perception and thought, Physics, which had its extent from then available knowledge of physical nature of universe to the divine and godly beings and the Ethics which had its end goals to cater eternal happiness through adopting

ways of righteousness in way of living. The Life of Epictetus: In light of modern researches and knowledge gained by deciphering of the Greek anecdotes of ancient times, the date of birth of Epictetus is estimated to be around 55 A.D. His place of birth is contemplated as Hierapolis, Phrygia (Now a part of Turkey). The birth name of Epictetus is still unknown and his known name "Epictetus" simply means "acquired" in Greek. Possibly this name was christened or rechristened upon him by his master Epaphroditos. Epaphroditos was a wealthy freedman and a secretary to Nero (Nero Claudius Caesar Augustus Germanicus was a Roman Emperor between 54-68 A.D; Nero was an infamous emperor who according to the Greek people was responsible for lighting Great Fire of Rome that remained 18 July-19 July, 64 A.D. He committed suicide in 68 A.D to escape assassination). His Interest in Philosophy and His Freedom: In early phases of life Epictetus acquired great interest/passion

in philosophy, and with the permission of his affluent master he studied stoic philosophy under the guidance of Musonius Rufus. This allowed him to gain education, and respect in the society. Later on, after the death of Nero in 64 A.D he acquired his freedom and started teaching stoic philosophy in Rome. His School in Nicopolis, Epirus: When Domitian came to power and become Emperor of Rome in 93 A.D he banished all philosophers from the city. Titus Flavius Caesar Domitianus Augustus or Domitian was a believer of chief deity Jupiter and emphasized on enhanced connections with it and patronized its priests and temples at Capitoline Hill. He was also a great devotee of Goddess Minerva. So when Domitian or Titus Flavius Caesar Domitianus Augustus banished philosophers from Rome Epictetus escaped to Nicopolis, Epirus and laid base of his school of thought/philosophy. His Discourses and the

Enchiridion: His most famous pupil Arrian of Nicomedia who was a historian, military commander, public servant and philosopher of 2nd century, studied under him in his youth and claimed to have written his famous Discourses. Arrian describes his teacher Epictetus as a powerful and magnetic speaker who had the ability to make the listeners feel things that he desired. He tells that many eminent figures of that time often sought conversation with Epictetus. He further exclaims that Roman emperor Publius Aelius Hadrianus Augustus had friendly relationships with Epictetus. It is noteworthy that Roman Emperor Publius Aelius Hadrianus Augustus was a successor of Domitian or Titus Flavius Caesar D. Augustus. The Encheiridion Or Manual - Epictetus 2019-04-16 The Enchiridion of Epictetus is a short manual of Stoic ethical advice compiled by Arrian, a 2nd-century disciple of the Greek philosopher Epictetus. Common English translations of the title are Manual or

Handbook.

The First Hundred Years of the Bureau of Labor Statistics -

Joseph P. Goldberg 1985

The Bureau of Labor Statistics' early work included studies of depressions, tariffs, immigrants, and alcoholism and many assignments to investigate and mediate disputes between labor and management. The Bureau of Labor in the Department of the Interior was created on June 26, 1884 as the culmination of almost two decades of advocacy by labor organizations that wanted government help in publicizing and improving the status of the growing industrial labor force.

Practitioner's Guide to Empirically Based Measures of Social Skills - Douglas W.

Nangle 2009-12-16

Social skills are at the core of mental health, so much so that deficits in this area are a criterion of clinical disorders, across both the developmental spectrum and the DSM. The Practitioner's Guide to Empirically-Based Measures of Social Skills gives clinicians

and researchers an authoritative resource reflecting the ever growing interest in social skills assessment and its clinical applications. This one-of-a-kind reference approaches social skills from a social learning perspective, combining conceptual background with practical considerations, and organized for easy access to material relevant to assessment of children, adolescents, and adults. The contributors' expert guidance covers developmental and diversity issues, and includes suggestions for the full range of assessment methods, so readers can be confident of reliable, valid testing leading to appropriate interventions. Key features of the Guide: An official publication of the Association for Behavioral and Cognitive Therapies Describes empirically-based assessment across the lifespan. Provides in-depth reviews of nearly 100 measures, their administration and scoring, psychometric properties, and references. Highlights specific clinical

problems, including substance abuse, aggression, schizophrenia, intellectual disabilities, autism spectrum disorders, and social anxiety. Includes at-a-glance summaries of all reviewed measures. Offers full reproduction of more than a dozen measures for children, adolescents, and adults, e.g. the Interpersonal Competence Questionnaire and the Teenage Inventory of Social Skills. As social skills assessment and training becomes more crucial to current practice and research, the Practitioner's Guide to Empirically-Based Measures of Social Skills is a steady resource that clinicians, researchers, and graduate students will want close at hand.

This book fills a gap in lexical morphology, especially with reference to analogy in English word-formation. Many studies have focused their interest on the role played by analogy within English inflectional morphology. However, the analogical mechanism also deserves investigation on account of its relevance to neology in English. This volume provides in-depth qualitative analyses and stimulating quantitative findings in this realm.

The Wine Bible - Karen MacNeil 2015-10-13
Announcing the completely revised and updated edition of The Wine Bible, the perennial bestselling wine book praised as “The most informative and entertaining book I’ve ever seen on the subject” (Danny Meyer), “A guide that has all the answers” (Bobby Flay), “Astounding” (Thomas Keller), and “A magnificent

masterpiece of wine writing” (Kevin Zraly). Like a lively course from an expert teacher, The Wine Bible grounds the reader deeply in the fundamentals while layering on informative asides, tips, amusing anecdotes, definitions, glossaries, photos (all new for this edition), maps, labels, and recommended bottles. Karen MacNeil’s information comes directly through primary research; for this second edition she has tasted more than 10,000 wines and visited dozens of wine regions around the world. New to the book are wines of China, Japan, Mexico, and Slovenia. And through it all the reader becomes ever more informed—and, because of the author’s unique voice, always entertained: “In great years Pétrus is ravishing, elegant, and rich—Ingrid Bergman in red satin.” Or, describing a Riesling: “A laser beam. A sheet of ice. A great crackling bolt of lightning.”

Serving Athena - Julia L. Shear 2021-02-28

In ancient Athens, the Panathenaia was the most important festival and was celebrated in honour of Athena from the middle of the sixth century BC until the end of the fourth century AD. This in-depth study examines how this all-Athenian celebration was an occasion for constructing identities and how it affected those identities. Since not everyone took part in the same way, this differential participation articulated individuals' relationships both to the goddess and to the city so that the festival played an important role in negotiating what it meant to be Athenian (and non-Athenian). Julia Shear applies theories of identity formation which were

developed in the social sciences to the ancient Greek material and brings together historical, epigraphical, and archaeological evidence to provide a better understanding both of this important occasion and of Athenian identities over the festival's long history.

princely states of Travancore, Mysore, Coorg and Pudukkottai published by British museologist Edgar Thurston and K. Rangachari in 1909. The seven-volume work was one of several such publications resulting from the Ethnographic Survey of India project which was formally instituted by the Government of British India in 1901. The Survey was intended to record details of the manners, customs and physical features of Indian castes and tribes using in part the anthropometric methods that had first been used in India by Herbert Hope Risley for his survey of the tribes and castes of Bengal. Eight years of funding was allotted for the purpose. Edgar Thurston was the son of Charles Bosworth Thurston of Kew, London. Schooled at Eton College, he then studied medicine at King's College, London, qualifying as LRCP in 1877. He worked as a medical officer in Kent County Lunatic Asylum and became a curator of the museum at King's College before joining the Madras Museum in 1885 as

a superintendent. The British government in India appointed a Superintendent of Ethnography for each province. Thurston, who had been Superintendent of the Madras Government Museum since 1885, had already conducted some ethnographic work in his studies of the hill tribes of Nilgiris District, published in 1894, and elsewhere. He was appointed Superintendent for Madras Presidency, while L. K. Ananthakrishna Iyer and N. Subramania Iyer were respectively appointed Superintendents for the princely states of Cochin and Travancore. The reports for the two princely states were later integrated with Thurston's work to form the Castes and Tribes of Southern India, as were the results of Thurston's earlier researches into the hill tribes.[citation needed] The state of Mysore was allocated to Thurston for an anthropometric survey but excluded for the ethnographic survey. In his investigations in the Madras Presidency, Thurston was assisted by K.

Rangachari of the Government Museum. Nature magazine, in its September 1910 issue, described the work as "a monumental record of the varied phases of south Indian tribal life, the traditions, manners and customs of people. Though in some respects it may be corrected or supplemented by future research it will long retain its value as an example of outdoor investigation, and will remain a veritable mine of information, which will be of value."
