Winter in the Wilderness - Dave Hall 2015-11-18

Camping or backpacking in winter is appealing for many who enjoy the serenity of wilderness settings without the crowds and bustle of the summer season. But as rewarding as they can be, these outings require

special preparation and a different set of skills than are necessary at other times of the year. Snowfall can quickly cover one's tracks and make orientation difficult. Hypothermia is insidious, and rapidly changing weather conditions can become treacherous, even life-threatening. In addition to those who are exploring the outdoors recreationally, there are also those who find themselves in unexpected winter survival situations. Each year, people become stranded in wilderness areas, and in most cases they are not equipped to face the challenge of spending an indefinite amount of time outside. Without sufficient gear or knowledge of how to improvise without it, injury or death is often the result. The development of some basic skills, however, can help avert such unfortunate outcomes. As the founder of the renowned nature awareness program Primitive Pursuits, Dave Hall has been practicing survival skills for more than twenty years and has amassed a comprehensive understanding of winter survival. By refining these skills, Dave has reached a point of understanding that is without peer. Through detailed explanations, illustrations, and personal anecdotes, *Winter in the Wilderness* imparts Dave's knowledge to readers, who will learn to meet their most basic needs: making fire, creating shelter, obtaining safe drinking water, navigating terrain, and procuring sustenance. *Winter in the Wilderness* is a handbook for those who want to explore cold-weather camping and those who might find themselves in need of this critical information during an unexpected winter's night out. Whether used for pleasure or for survival, *Winter in the Wilderness* emphasizes the benefits of enriching and deepening our connection with the outdoors.

The Defence of Tradition in Brazilian Popular Music - Sean Stroud 2008-01-01

Sean Stroud examines how and why *Musica Popular Brasileira* (MPB) has come to have such a high status, and why the musical tradition (including MPB) within Brazil has been defended with such vigour for so long. He emphasizes the importance of musical nationalism as an underlying ideology to discussions about Brazilian popular music since the 1920s, and the key debate on so-called 'cultural invasion' in Brazil. The roles of those responsible for the construction of the idea of MPB are examined in detail. Stroud analyses the increasingly close relationship that has developed between television and popular music in Brazil with particular reference to the post-1972 televised song festivals. He goes on to consider the impact of the Brazilian record industry in the light of theories of cultural imperialism and globalization and also evaluates governmental intervention relating to popular music in the 1970s. The importance of folklore and tradition in popular music that is present in both Mario de Andrade and Marcus Pereira's efforts to 'musically map' Brazil is clearly emphasized. Stroud contrasts these two projects with Hermano Vianna and Itau Cultural's similar ventures at the end of the twentieth century that took a totally different view of musical 'authenticity' and tradition. Stroud concludes that the defence of musical traditions in Brazil is inextricably bound up with nationalistic sentiments and a desire to protect and preserve. MPB is the musical expression of the Brazilian middle class and has traditionally acted as a cultural icon because it is associated with notions of 'quality' by certain sectors of the media.

Mobilising Design - Justin Spinney 2017-02-24

This book brings together research working at the boundary between design knowledges and mobilities, offering a novel collection for both theorists and practitioners. Drawing upon detailed case studies, it demonstrates the diverse roles of design in shaping mobility at different spaces and scales: across cities; within different types of buildings and infrastructures; and through commuting, work and leisure activities. A range of international scholars illustrate the designed mobilities of car parks, traffic lights, street benches, pedestrian wayfinding systems and accessible design in the urban environment; they examine spaces within hospitals, airports and train stations and investigate design practices for bicycles, future urban vehicles and MotoGP motorcycle racing. Other contributions explore overlooked mobile artefacts such as television and video game remote controls, 3D printing and the types of packaging which enable objects themselves to move around. This book demonstrates how the tools, assumptions and processes of design shape spaces of mobility, and also illuminates how shifts in the fluidity and

circulation of people, practices and materials in turn reconfigure practices of design. Mobilising Design develops multi-disciplinary understandings of design, drawing upon diverse literatures including design history, product design, architecture and cultural geography. By highlighting often invisible artefacts and associated knowledges and controversies, the book foregrounds the taken-for-granted ways in which everyday mobility is designed. It will be of interest to scholars in geography, sociology, economic history, architecture, design and urban theory.

Climb to Conquer - Peter Shelton 2014-08-05

Few stories from the "greatest generation" are as unforgettable -- or as little known -- as that of the 10th Mountain Division. Today a versatile light infantry unit deployed around the world, the 10th began in 1941 as a crew of civilian athletes with a passion for mountains and snow. In this vivid history, adventure writer Peter Shelton follows the unique division from its conception on a Vermont ski hill, through its dramatic World

War II coming-of-age, to the ultimate revolution it inspired in American outdoor life. In the late-1930s United States, rock climbing and downhill skiing were relatively new sports. But World War II brought a need for men who could handle extreme mountainous conditions -- and the elite 10th Mountain Division was born. Everything about it was unprecedented: It was the sole U.S. Army division trained on snow and rock, the only division ever to grow out of a sport. It had an un-matched number of professional athletes, college scholars, and potential officer candidates, and as the last U.S. division to enter the war in Europe, it suffered the highest number of casualties per combat day. This is the 10th's surprising, suspenseful, and often touching story. Drawing on years of interviews and research, Shelton re-creates the ski troops' lively, extensive, and sometimes experimental training and their journey from boot camp to the Italian Apennines. There, scaling a 1,500-foot "unclimbable" cliff face in the dead of night, they stunned their enemy and began the eventual rout of the German armies from northern Italy. It was a self-selecting elite, a brotherhood in sport and spirit. And those who survived (including the Sierra Club's David Brower, Aspen Skiing Corporation founder Friedl Pfeifer, and Nike cofounder Bill Bowerman, who developed the waffle-sole running shoe) turned their love of mountains into the thriving outdoor industry that has transformed the way Americans see (and play in) the natural world.

There is something extraordinarily special about sliding on snow that has excited generations of snow sports enthusiasts. Add to this the dimension of travelling through the mountains and the result is a recipe for some of the best outdoor activity days you could ever imagine. through mountain terrain, in a logical, easy to read format. Adapting ski technique for various off piste conditions is an essential skill that makes all the difference between surviving and savouring adventures off piste. The book also covers the fundamental mountaineering knowledge including navigation, weather and avalanches that are essential before venturing beyond the confines of a ski area. Equipment and planning a tour are covered, whether it is in an Alpine or Nordic environment. All in all this is a very comprehensive and valuable resource for anyone aspiring to venture into the mountains on skis. Bob Kinnaird Principal Glenmore Lodge National Outdoor Training Centre

It's about Skiing and Not the Skis - Jay Eacker 2010

People have been skiing—and no doubt teaching others to do the same—for thousands of years. The earliest evidence for it is a picture on the wall of a cave in Norway that was drawn sometime around 4500 BC. Skiing is something that we do. It is a behavior. Teaching others to ski is also something that we do. It, too, is a behavior. Pavlov and his dog helped to demonstrate that behavior is lawful and orderly. Various forms of conditioning as well as reinforcement, generalization, discrimination, punishment, and extinction change behavior. But why do we ski and teach others to do the same? These behaviors can also be accounted for, but no one has done it—until now. Develop a better understanding of

why we ski and become a better skier or ski instructor in the process. You'll gain a greater appreciation of the sport once you discover *It's About Skiing and Not the Skis*.

Designed by Adventure - Topher Donahue 2012-02-01

Thirty years ago a frustrated physicist from Seattle named Ron Gregg was retreating from an aborted attempt at a new alpine style route on Denali. His partner had been evacuated by helicopter, but Ron chose to ski back to the highway solo. In the process, Ron found a new direction in life. At that time, outdoor gear left much to be desired. Many of the best climbers and alpinists designed their own equipment out of necessity. They fashioned climbing harnesses, backpacks and entire kits in basements and garages. Nobody cared what the gear looked like. For a mountaineer with a penchant for design, the 70s and 80s were an era of extreme entrepreneurial opportunity and epic adventure. *Designed by Adventure: 30 Years of Outdoor Research* follows Ron Gregg's seminal early years as he bootstraps what would become an iconic company known for relentless commitment to functionality and durability. His intense passion for making better products in his own factory establishes Outdoor Research as an outdoor industry leader, yet Ron's devotion to his Seattle factory eventually imperils the company as globalization changes the game. His sudden and tragic death in the mountains of British Columbia creates a crisis as his family and the management team struggle to find a solution to keep the company going. Ultimately a new team comes together to build on Ron's legacy and principles, building Outdoor Research into one of the fastest growing companies in its industry.
