Revised Light - Sharon J. Ackerman 2021

""For what is faith but hickory smoke/and continuity, one of these hills running/into the next, never-ending?" Sharon Ackerman asks in her gorgeous new collection, centered on the Appalachian Mountain

community of her grandparents. Novelist Pat Conroy contends our history is our geography, and Ackerman maps her childhood here in these lyrics, recording every detail of that world. It's the ground of her making, despite where she has lived for most of her life. "The ground has final say," she says, and so it does, and it "...calls out names to the verge/where stars disappear/and return young again." No matter where you call home, these poems call you there, with a longing like no other. ~ Rita Sims Quillen, author of *Wayland* and *Some Notes You Hold*--

Calculus - Earl William
Swokowski 1996-03-31

This is a simple,
straightforward, direct calculus
text. Historical strengths rest
in the broad use of
applications, the easy-to-
understand writing style, and
the wealth of examples and
exercises to reinforce
conceptualization of the
subject matter. The inclusion of
two (new) co-authors should
pique interest in a book that in
its heyday was the #1 best-
seller. With Olinick's handle on
applications (he has written a
successful modeling book) and
Pence's keen sense of
technology (he is a guru on the
HP and TI graphing
calculators), we feel we have

put together an unparalleled
team of experts.

High Temperature Superconductor Cable Concepts for Fusion

Magnets - Christian Barth
2014-07-20

Three concepts of high
temperature superconductor
cables carrying kA currents
(RACC, CORC and TSTC) are
investigated, optimized and
evaluated in the scope of their
applicability as conductor in
fusion magnets. The magnetic
field and temperature
dependence of the cables is
measured; the thermal
expansion and conductivity of
structure, insulation and filling
materials are investigated.
High temperature
superconductor winding packs
for fusion magnets are
calculated and compared with
corresponding low temperature
superconductor cases.

Visual Thinking - Colin Ware
2010-07-27

Visual Thinking brings the science of perception to the art of design. Designers increasingly need to present information in ways that aid

their audience's thinking process. Fortunately, results from the relatively new science of human visual perception provide valuable guidance. In this book, Colin Ware takes what we now know about perception, cognition, and attention and transforms it into concrete advice that designers can directly apply. He demonstrates how designs can be considered as tools for cognition - extensions of the viewer's brain in much the same way that a hammer is an extension of the user's hand. The book includes hundreds of examples, many in the form of integrated text and full-color diagrams. Experienced professional designers and students alike will learn how to maximize the power of the information tools they design for the people who use them. Presents visual thinking as a complex process that can be supported in every stage using specific design techniques. Provides practical, task-oriented information for designers and software developers charged with

design responsibilities. Includes hundreds of examples, many in the form of integrated text and full-color diagrams. Steeped in the principles of "active vision," which views graphic designs as cognitive tools.

into formulas. This skill prepares readers to encounter real life problems that do not always fit into standard formulas. The book begins with the analysis of particle dynamics, before considering the motion of rigid-bodies. The book discusses in detail the three fundamental methods of problem solution: force-mass-acceleration, work-energy, and impulse-momentum, including the use of numerical methods. Race Tech's Motorcycle Suspension Bible - Paul Thede
2010-06-19

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step

guide shows anyone how to make their bike, or their kid's, handle like a pro's. The book gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.
