Journal of Economic Literature - 1997

Handbook of Management Accounting Research - Christopher S. Chapman 2011-09-14

Volume two of the Handbooks of Management Accounting Research consists of two groups of chapters. The first draw together research that has focussed on particular management accounting practices. The second set synthesise contributions to the literature that have been focussed within particular organisational contexts. Volume two concludes with a review of research on how management accounting practice and research varies around the world. Special pricing available if purchased as a set with Volume 1. Documents the scholarly management accounting literature Publishing both in print, and online through Science Direct International in scope

Accounting Control and Controlling Accounting - Jane Broadbent 2013-05-21

This book critically analyses the extensive forms of societal regulatory requirements using forms of Accounting Control, particularly those that are exerted over public sector organisations and the strategies of Controlling Accounting that are used by these organisations to minimise the effects of these requirements.

Cost Management - K. P. Gupta 2009

Innovation and cost management are the key requirements for companies to survive the current global economic crisis. Cost management not only leads to incremental performance improvement bur also to transformational change across the value chain. Cost management is viewed as part of a larger business process to influence decisions on pricing and profitability across several dimensions: product, customer, region, and distribution channel. In this book you can learn how your costing process aligns with industry best practices, and be on the leading edge of emerging practices such as value chain costing, shared services costing and outsourcing. This book also tells us how cost management and accounting are being put into practice.

Journal of Accounting & Economics - 1999-11

Fundamentals of Cost Accounting - William N. Lanen 2011

The authors have kept the text concise by focusing on the key concepts students need to master. Opening vignettes & 'in action' boxes show realistic applications of these concepts throughout. Comprehensive end-of-chapter problems provide students with all the practice they need to fully learn each concept.

The Use of Cost Information in Pricing Decisions and Cost Management Strategies - Sylvia Hsingwen Hsu 2006

Quantitative Methods in Economics and Finance - Tomas Kliestik 2021-04-08

The purpose of the Special Issue "Quantitative Methods in Economics and Finance" of the journal Risks was

to provide a collection of papers that reflect the latest research and problems of pricing complex derivatives, simulation pricing, analysis of financial markets, and volatility of exchange rates in the international context. This book can be used as a reference for academicians and researchers who would like to discuss and introduce new developments in the field of quantitative methods in economics and finance and explore applications of quantitative methods in other business areas.

Handbook of Cost Management - Roman L. Weil 2005-05-31

Handbook of Cost Management, Second Edition covers all of the essential topics in cost management and accounting. It includes conventional topics, such as job costing and cost allocation, as well as such current topics as balanced scorecard, economic value added, logistics and marketing cost, theory of constraints, inter-organizational costing, and the cost of quality.

Financial Accounting - Jerry J. Weygandt 2009-12-31

In the new sixth edition, readers will be able to clearly see the relevance of accounting in their everyday lives. The authors introduce challenging accounting concepts with examples that are familiar to everyone, which helps build motivation to learn the material. Accounting issues are also placed within the context of marketing, management, IT, and finance.

Handbook of Management Accounting Research - Christopher S. Chapman 2006-12-08

Volume one of the Handbooks of Management Accounting Research sets the context for both Handbooks, with three chapters outlining the historical development of management accounting as a discipline and as a practice in three broad geographic settings. The bulk of the first volume then draws together a series of contributions that analyse the scholarly literature in terms of distinct intellectual and theoretical social science perspectives. The volume includes a chapter which looks at work informed by psychology as a base discipline. The volume also includes a set of chapters that seek to evaluate and explain issues of research method for the different approaches to research found within management accounting. Special pricing available if purchased as a set with Volume 2. Documents the scholarly management accounting literature Publishing both in print, and online through Science Direct International in scope

Cornerstones of Cost Management - Don R. Hansen 2017-01-27

Hansen/Mowen's CORNERSTONES OF COST MANAGEMENT, 4E demonstrates the dynamic nature of cost accounting in today's changing business environment. The book covers functional-based cost and control, and then activity-based cost systems, giving students the skills to manage any cost management system.

Developed using extensive research on student learning behavior, this book presents concepts in a unique format that speaks to how students learn. Cornerstones examples in each chapter emphasize the How, Why, and What-Ifs of basic cost management concepts, while delving into the conceptual nature of each equation or topic. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Volume Three features contributions from some of the most influential researchers in various areas of management accounting research, consolidates the content of volumes one and two, and concludes with examples of management accounting research from around the world. Volumes 1, 2 and 3 are also available as individual product. * ISBN Volume 1: 978-0-08-044564-9 * ISBN Volume 2: 978-0-08-044754-4 * ISBN Volume 3: 978-0-08-055450-1 * Three volumes of the popular Handbooks of Management Accounting Research series now available in one complete set * Examines particular management accounting practices and specific organizational contexts * Adopts a global perspective of management accounting practices Award: "Winner of the Management Accounting section of the American Accounting Association notable contribution to Management Accounting Literature Award."

Cost Management - Marc Wouters 2012

This book is an adaptation of the successful US text "Cost Management" by Hilton, Maher and Selto, written specifically for an international audience. Major improvements include: Diverse and truly international examples of organizations - Examples used throughout the book are from all over the world and represent manufacturing, retail, not-for-profit, and service firms in many different countries. Completely restructured and rewritten text - The book has been rewritten, restructured and also shortened significantly to align content closer with international courses. Integral use of spreadsheets - Spreadsheet software is used for explaining techniques and making applications more realistic. In depth research - Summaries of international research studies that address important cost management issues have been updated and more references to recent research findings have been added. Intuitive explanation of accounting - The authors show directly how events impact the balance sheet and profit and loss account

Cost Accounting - Charles T. Horngren 2000

Provides data for three major purposes; planning and controlling routine operations; nonroutine decisions, policy making, and longrange planning; and inventory valuation and income determination.

Intermediate Accounting - Donald E. Kieso 2018

Encyclopedia of Management - Marilyn M. Helms 2006

This updated fifth edition of Encyclopedia of Management covers more than 300 topics in management theories and applications, written by academics and business professionals. All information has been reviewed and edited by the esteemed Dr. Marilyn M. Helms, sesquicentennial endowed chair and professor of management at Dalton State College.

Financial Management for Decision Makers - Peter Atrill 2009

Adopting an innovative, open-learning approach to introduce the main principles of financial management in an accessible, non-technical way, this fully updated fifth edition provides a unique focus on the practical application of financial management and its role in decision making. New to this edition: Expanded coverage of key topics such as financing the business Increased coverage of corporate governance issues Even more real-world examples to help illustrate the practical application and importance of the topics discussed Financial statements throughout based on the latest International Accounting Standards Full-colour design, packed with pedagogical features, providing an original learning experience Key features: Written in a unique, 'open learning' style Clear explanations and minimal technical jargon to aid understanding -no previous knowledge of financial management is assumed Based on a solid foundation of theory, but

focusing throughout on its value for decision making Covering all the main areas of financial management in sufficient detail to provide a good grasp of the subject Numerous examples, activities and exercises throughout, allowing the reader to test his/her knowledge at frequent intervals Fully supported by a comprehensive range of student and lecturer learning resources, Financial Management for Decision Makers is ideal for undergraduates from a non-finance/accounting discipline taking an introductory module in financial management, and postgraduate/postexperience students on courses such as the ACCA Diploma in Financial Management, Diploma in Management Studies and MBA programmes. The text is also suitable for finance and accounting students as a foundation for further study. Peter Atrill is a freelance academic and author working with leading institutions in the UK, Europe and SE Asia. He has previously held posts as Head of Business and Management and Head of Accounting and Law at University of Plymouth Business School.

JOURNAL OF ACCOUNTING AND PUBLIC POLICY - 2000

Healthcare Financial Management - 1996

Some issues accompanied by supplements.

Cost Management - Leslie G. Eldenburg 2016-03-28

Cost Management: Measuring, Monitoring, and Motivating Performance, Third Canadian Edition was written to help students learn to appropriately apply cost accounting methods in a variety of organizational settings. To achieve this goal, students must also develop professional competencies, such as strategic/critical thinking, risk analysis, decision making, ethical reasoning and communication. This is in line with the CPA curriculum and the content of this edition and the problem materials is mapped to the CPA. Many students fail to recognize the assumptions, limitations, behavioural implications, and qualitative factors that influence managerial decision making. The textbook is written in an engaging step-by-step style that is accessible to students. The authors are proactive about addressing the challenges that instructors and students face in their teaching and learning endeavors. They utilize features such as realistic examples, real ethical dilemmas, self-study problems and unique problem material structured to encourage students to think about accounting problems and problem-solving more complexly.

Business Process Transformation - Chitra Sharma 2015-05-19

This book presents a framework through transformation and explains how business goals can be translated into realistic plans that are tangible and yield real results in terms of the top line and the bottom line. Process Transformation is like a tangram puzzle, which has multiple solutions yet is essentially composed of seven 'tans' that hold it together. Based on practical experience and intensive research into existing material, 'Process Tangram' is a simple yet powerful framework that proposes Process Transformation as a program. The seven 'tans' are: the transformation program itself, triggers, goals, tools and techniques, culture, communication and success factors. With its segregation into tans and division into core elements, this framework makes it possible to use 'pick and choose' to quickly and easily map an organization's specific requirements. Change management and process modeling are covered in detail. In addition, the book approaches managed services as a model of service delivery, which it explores as a case of process transformation. This book will appeal to anyone engaged in business process transformation, be it business process management professionals, change managers, sponsors, program managers or line managers. The book starts with the basics, making it suitable even for students who want to make a career in business process management.

Essentials of Cost Accounting for Health Care Organizations - Steven A. Finkler 1999

Essentials of Cost Accounting for Health Care Organizations, Second Edition is a comprehensive text that applies the tools & techniques of cost accounting to the health services field. It's an essential tool for all professionals who need to deal with the challenges of managing health facilities in a difficult economic environment. The new edition has an increased emphasis on managed care as well as a new computer-based component. Instructor's manual available.

Assessment of Student Learning in Business Schools - Kathryn Denise Martell 2005

International Encyclopedia of Public Health - William C Cockerham 2016-10-06

International Encyclopedia of Public Health, Second Edition is an authoritative and comprehensive guide to the major issues, challenges, methods, and approaches of global public health. Taking a multidisciplinary approach, this new edition combines complementary scientific fields of inquiry, linking biomedical research with the social and life sciences to address the three major themes of public health research, disease, health processes, and disciplines. This book helps readers solve real-world problems in global and local health through a multidisciplinary and comprehensive approach. Covering all dimensions of the field, from the details of specific diseases, to the organization of social insurance agencies, the articles included cover the fundamental research areas of health promotion, economics, and epidemiology, as well as specific diseases, such as cancer, cardiovascular diseases, diabetes, and reproductive health. Additional articles on the history of public health, global issues, research priorities, and health and human rights make this work an indispensable resource for students, health researchers, and practitioners alike. Provides the most comprehensive, high-level, internationally focused reference work available on public health Presents an invaluable resource for both researchers familiar with the field and non-experts requiring easy-to-find, relevant, global information and a greater understanding of the wider issues Contains interdisciplinary coverage across all aspects of public health Incorporates biomedical and health social science issues and perspectives Includes an international focus with contributions from global domain experts, providing a complete picture of public health issues

Management Accounting, 4th Edition - Leslie G. Eldenburg 2020-01-21

Eldenburg's fourth edition of Management Accounting combines the basic technical issues associated with cost management, management accounting and control with more recent and emerging themes and issues. Management accounting is a compulsory element of the accounting major, and this text is written to cover the content typically taught in the two management accounting units offered in most accounting programs. The Management Accounting interactive e-text features a range of instructional media content designed to provide students with an engaging learning experience. This includes case videos, interactive problems and questions with immediate feedback. Eldenburg's unique resource can also form the basis of a blended learning solution for lecturers.

Cost Management - Leslie G. Eldenburg 2004-11-19

"Cost Management" was written in response to changes in the global business environment. Unbridled access to information and intense competition has meant that cost accounting has become an increasingly important tool for managers and accountants alike. Most textbooks focus on content knowledge and then expect students to 'magically' demonstrate skills such as decision-making and critical thinking. "Cost Management" better prepares students for professional success by bridging the gaps between Knowledge, Skills and Abilities. Many students fail to recognize the assumptions, limitations, behavioral implications and qualitative factors that influence managerial decision-making. The dynamic, new author team focuses on cost accounting methods, techniques and the quality of cost accounting information used for decision-making to deliver a thoroughly modern treatment of cost accounting topics.

Financial Environment and Business Development - Mehmet Huseyin Bilgin 2016-08-16

This volume focuses on the latest findings concerning financial environment research and the effects on business. Major topics addressed range from finance-driven globalization, contagion risk transmission, financial sustainability, and bank efficiency, to oil price shocks and spot prices research. Further topics include family business, business valuation, public sector development and business organization in the globalized environment. This book features selected peer-reviewed articles from the 16th EBES conference in Istanbul, where over 270 papers were presented by 478 researchers from 56 countries.

Supply Chain Development for the Lean Enterprise - Robin Cooper 2017-12-06

Four questions determine whether a company is using interorganizational cost management. Does your firm set specific cost-reduction objectives for its suppliers? Does your firm help its customers and/or suppliers find ways to achieve their cost-reduction objectives? Does your firm take into account the profitability of its suppliers when negotiating component pricing with them? Is your firm continuously making its buyer-supplier interfaces more efficient? If the answer to any of these questions is "no", your firm risks introducing products that cost too much or are not competitive. The full potential of the supply network can be realized only when the entire supply chain adopts interorganizational cost management

practices. Competitive pressure has led many firms to try to increase the efficiency of supplier firms through interorganizational cost management systems, a structured approach to coordinating the activities of firms in a supplier network to reduce the total costs in the network. It is particularly important to lean enterprises for two reasons: Lean enterprises typically outsource more of the added value of their products than their mass producer counterparts. Lean enterprises usually compete more aggressively and must manage costs more effectively. Interorganizational cost management can reduce costs in three ways: through product design, through product manufacture and through cooperative approaches between buyers and suppliers to build smoother interfaces. However, more than just cost management must cross interorganizational boundaries. Suppliers are also a major source of innovation for lean enterprises. Successful supplier networks encourage every firm in the network to innovate and compete more aggressively. Read this book to learn to manage the supply chain to forge competitive advantage while reducing costs.

Advances in Management Accounting - Chris Akroyd 2021-10-28

Advances in Management Accounting is a publication of quality applied research in management accounting. The journal's purpose is to publish thought-provoking articles that advance knowledge in the management accounting discipline and are of interest to both academics and practitioners.

Management Accounting - Leslie Eldenburg 2017-12

Handbook of Healthcare Management - Myron D. Fottler 2015-09-25

The Handbook of Healthcare Management is a comprehensive examination of key management practices for global healthcare organizations, arguing that insight into and implementation of these practices is essential for success and sustainability.

Management Accounting - Leslie Eldenburg 2010-08-12

Management Accounting 2nd edition has been revised in response to changes in the global business environment. Unbridled access to information, intense competition and ongoing challenges in the corporate world have meant that cost accounting has become an increasingly important tool for managers and accountants alike. Most textbooks focus on content knowledge and then expect students to 'magically' demonstrate skills such as decision-making and critical thinking. As many students fail to recognise the assumptions, limitations, behavioural implications and qualitative factors that influence managerial decision-making, this text will better prepare students for professional success by bridging the gaps between knowledge, skills and abilities. The textbook is written in a style that is accessible to students and includes chapter scene setters, realistic illustrative examples, self-study problems and unique problem material structured to encourage students to think about accounting problems and problem-solving more complexly.

Human-Centred Education - Scherto Gill 2017-01-06

Human-Centred Education (HCE) radically rethinks the aims of education, the nature of learning, and the relationship between individuals in schools. This accessible guide presents a HCE approach to schooling and includes a variety of rich pedagogical examples. It provides practical suggestions as to how the approach might be adopted as a whole-school initiative, or else woven into particular aspects of existing school life, including the curriculum, classroom culture and feedback for learning. This handbook also illustrates how holistic educational practices, found in some alternative schools, can be introduced fruitfully into the state educational system with step-by-step guidance on how to integrate HCE into teacher training and school governance. HCE is more than a set of inflexible pedagogical prescriptions or a recipe of lesson plans. It originates from the fundamental values of care, positive relationships and well-being. National education policies tend to ignore deeper educational processes, such as the cultivation of qualities that are central to living meaningfully and well, because they focus on measured, high-stakes academic performance. HCE is an effective antidote to this, and brings to the fore a more human-centred approach without sacrificing academic standards. Current secondary teachers, members of school management and leadership teams, as well as those currently undertaking teacher training will all benefit from reading this important book.

American Book Publishing Record - 2005

Costing Systems - Eva Labro 2019-04-24

Costing Systems provides a structured overview of costing system research to explain the co-existence of different costing practices. This body of research has come to prescriptive conclusions, which will be valuable and insightful to practitioners designing costing systems and managers using reported cost data. The monograph is structured around four primary purposes of cost measurement: decision-making, cost management, inventory valuation for financial and tax accounting, and control and performance measurement. Part 1 of the monograph relates to the production or supply choices made by costing system designers. Part 2 moves onto the demand side for cost information. This monograph aims to be useful both to novices in the costing field who are searching for a primer on this literature as well as for people familiar with the literature who are interested in a structured overview and thoughts on where future research

avenues may lead.

Earnings Management - Joshua Ronen 2008-08-06

This book is a study of earnings management, aimed at scholars and professionals in accounting, finance, economics, and law. The authors address research questions including: Why are earnings so important that firms feel compelled to manipulate them? What set of circumstances will induce earnings management? How will the interaction among management, boards of directors, investors, employees, suppliers, customers and regulators affect earnings management? How to design empirical research addressing earnings management? What are the limitations and strengths of current empirical models?

Aanwinsten van de Centrale Bibliotheek (Queteletfonds) - Bibliothèque centrale (Fonds Quetelet) 2004
