Loving Music Till It Hurts - William Cheng
2019-10-01

Can music feel pain? Do songs possess dignity? Do symphonies have rights? Of course not, you might say. Yet think of how we anthropomorphize music, not least when we believe it has been somehow mistreated. A singer butchered or mangled the "Star-Spangled Banner" at the Super Bowl. An underrehearsed cover band made a mockery of Led Zeppelin's classics. An orchestra didn't quite do justice to Mozart's Requiem. Such lively language upholds music as a sentient companion susceptible to injury and in need of fierce protection. There's nothing wrong with the human instinct to safeguard beloved music . . . except, perhaps, when this instinct leads us to hurt or neglect fellow human beings in turn: say, by heaping outsized shame upon those who seem to do music wrong; or by rushing to defend a conductor's beautiful recordings while failing to defend the multiple victims who have accused this maestro of sexual assault. *Loving Music Till It Hurts* is a capacious exploration of how people's head-over-heels attachments to music can variously align or conflict with agendas of social justice. How do we respond when loving music and loving people appear to clash?

Unleashed in 2003, it has been offered in 5.7-, 6.1-, 6.2-, and now 6.4-liter displacements. With each successive engine introduction, Chrysler has extracted more performance. And with the launch of the Hellcat and Demon 6.2-liter supercharged engines, Chrysler built the highest horsepower production engines ever made, at 707 hp and 840 hp respectively. This third-generation Hemi carries on a high-performance Chrysler tradition and is considered the most powerful and "buildable" new pushrod V-8 engine on the market today. Mopar engine expert and veteran author Larry Shepard reveals up-to-date modification techniques and products for achieving higher performance. Porting and modifying the stock Hemi heads as well as the best flow characteristics with high lift are revealed. In addition, guidance on aftermarket heads is provided. Shepard guides you through the art and science of selecting a cam, so you find a cam that meets your airflow needs and performance goals. He details stock and forged crankshafts plus H- and I-beam connecting rods that support the targeted horsepower, so you can choose the best rotating assembly for your engine. The conservation of landscape connections, where animals, plants, and ecological processes can move freely from one habitat to another, is therefore an essential part of any new conservation or environmental protection plan. In practice, however, maintaining, creating, and protecting connectivity in our increasingly dissected world is a daunting challenge. This fascinating volume provides a synthesis on the current status and literature of connectivity conservation research and implementation. It shows the challenges involved in applying existing knowledge to real-world examples and highlights areas in need of further study. Containing contributions from leading scientists and practitioners, this topical and thought-provoking volume will be essential reading for graduate students, researchers, and practitioners working in conservation biology and natural resource management.

Kill the Company - Lisa Bodell 2016-10-21
In the ever-changing world of business, we've arrived at a point where process has trumped culture, where the race toward efficiency has left us unable to reach our potential. Stuck in the land of status quo, we've forgotten how to think. The very structures put in place to help businesses grow are now holding us back;; it's time to Kill the Company. This book is a call to arms: to start a revolution in how we think and work. But instead of more one-size-fits-all change initiatives forced upon employees, we need to embrace small changes that create ripple effects throughout the organization. Lisa Bodell urges companies to move from "Zombies, Inc." to "Think, Inc." Thinking can no longer be exclusive to the creative team or lead strategists. A culture of curiosity must be fostered among the ranks to shake up our standard practices, from unproductive meetings to go-nowhere strategic planning. This revolution can and will awaken our ability to think, and ultimately, to innovate and grow.
