

The Social Impact Of Aids In The United States

When people should go to the ebook stores, search introduction by shop, shelf by shelf, it is in point of fact problematic. This is why we allow the book compilations in this website. It will definitely ease you to look guide **The Social Impact Of Aids In The United States** as you such as.

By searching the title, publisher, or authors of guide you truly want, you can discover them rapidly. In the house, workplace, or perhaps in your method can be all best area within net connections. If you strive for to download and install the The Social Impact Of Aids In The United States , it is no question simple then, since currently we extend the associate to purchase and create bargains to download and install The Social Impact Of Aids In The United States hence simple!

[HIV/AIDS in South Africa](#) - S. S. Abdool Karim 2010-06-17

This second edition of the book provides up-to-date information on new drugs, new proven HIV prevention interventions, a new chapter on positive prevention, and current HIV epidemiology. This definitive text covers all aspects of HIV/AIDS in South Africa, from basic science to medicine, sociology, economics

and politics. It has been written by a highly respected team of South African HIV/AIDS experts and provides a thoroughly researched account of the epidemic in the region.

[The Impact of AIDS: Psychological and Social Aspects of HIV Infection](#) - Jose Catalan 1997-05-22

This volume contains a selection of key contributions

to the discussion on the psychological and social implications on HIV infection. It contains up-to-date and authoritative papers by senior practitioners and researchers in the field of the psychological and social aspects of HIV infection. The book will appeal to those involved in providing care

It Was Vulgar and It Was Beautiful - Jack Lowery

2022-04-05

The story of art collective Gran Fury—which fought back during the AIDS crisis through direct action and community-made propaganda—offers lessons in love and grief. In the late 1980s, the AIDS pandemic was annihilating queer people, intravenous drug users, and communities of color in America, and disinformation about the disease ran rampant. Out of the activist group ACT UP (AIDS Coalition to Unleash Power), an art collective that called itself Gran Fury formed to campaign against corporate greed, government inaction, stigma, and public indifference to the epidemic. Writer Jack

Lowery examines Gran Fury's art and activism from iconic images like the "Kissing Doesn't Kill" poster to the act of dropping piles of fake bills onto the trading floor of the New York Stock Exchange. Lowery offers a complex, moving portrait of a collective and its members, who built essential solidarities with each other and whose lives evidenced the profound trauma of enduring the AIDS crisis. Gran Fury and ACT UP's strategies are still used frequently by the activists leading contemporary movements. In an era when structural violence and the devastation of COVID-19 continue to target the most vulnerable, this belief in the power of public art and action persists.

[AIDS and Development in Africa](#) - R Dennis Shelby
1999-05-13

AIDS and Development in Africa: A Social Science Perspective is the first book-length treatment of both the impact of AIDS in Africa and an assessment of intervention

Downloaded from
animalwelfareapproved.us
on by guest

strategies in varying cultural situations. Developed from revised selected papers from the nineteenth Southern African Universities Social Science Conference, AIDS and Development in Africa will be of interest to counselors, medical and development practitioners, Africanists, and AIDS researchers. From this book, you will find wide analytical coverage of the issues and country case studies related to the contributory factors and development impact of the HIV/AIDS pandemic in Africa. You will also explore the ability of countries to willingly promote and cope with the pandemic in the context of their different economic circumstances. Specifically in AIDS and Development in Africa, you will read about: socioeconomic context of AIDS social scientific explanations of the AIDS pandemic in Africa HIV/AIDS and the status of women in Botswana and Swaziland sexual abuse and HIV/AIDS law and HIV/AIDS orphans of the AIDS pandemic media and the

African context of social construction human resource development and training in relation to HIV/AIDS in Zambia AIDS and Development in Africa uses a multidisciplinary social science perspective in case studies of such countries as Botswana, Swaziland, Zimbabwe, South Africa, Malawi, and Zambia to reveal contributory factors and the developmental impact of HIV/AIDS in Africa. This book demonstrates the human consequences of AIDS and the efforts being made by governments, individuals, families, villages, communities, and national government organizations to respond to the pandemic. For example, you will learn about information campaigns and peer education approaches that are successfully increasing transmission awareness and condom use. You will read beyond the usual analysis of demographics and receive much more substantial assessments and analyses of the burden on people, economies, and health care

systems of the African countries. AIDS and Development in Africa is indispensable to anyone who is involved with HIV/AIDS prevention/intervention in Africa. This comprehensive book provides you with essential and up-to-date research on the many issues surrounding Africa's HIV/AIDS pandemic.

And The Band Played on - Randy Shilts 2000-04-09

An examination of the AIDS crisis exposes the federal government for its inaction, health authorities for their greed, and scientists for their desire for prestige in the face of the AIDS pandemic.

Mountains Beyond Mountains - Tracy Kidder 2009-08-25

NEW YORK TIMES BESTSELLER • “[A] masterpiece . . . an astonishing book that will leave you questioning your own life and political views.”—USA Today
“If any one person can be given credit for transforming the medical establishment's thinking about health care for the destitute, it is Paul Farmer.

. . . [Mountains Beyond Mountains] inspires, discomforts, and provokes.”—The New York Times (Best Books of the Year)
In medical school, Paul Farmer found his life's calling: to cure infectious diseases and to bring the lifesaving tools of modern medicine to those who need them most. Tracy Kidder's magnificent account shows how one person can make a difference in solving global health problems through a clear-eyed understanding of the interaction of politics, wealth, social systems, and disease. Profound and powerful, *Mountains Beyond Mountains* takes us from Harvard to Haiti, Peru, Cuba, and Russia as Farmer changes people's minds through his dedication to the philosophy that “the only real nation is humanity.” WINNER OF THE LETTRE ULYSSES AWARD FOR THE ART OF REPORTAGE
This deluxe paperback edition includes a new Epilogue by the author

The Culture of AIDS in Africa - Gregory Barz 2011-10-13

Downloaded from
animalwelfareapproved.us
on by guest

The Culture of AIDS in Africa presents 30 chapters offering a multifaceted, nuanced, and deeply affective portrait of the relationship between HIV/AIDS and the arts in Africa, including source material such as song lyrics and interviews.

AIDS in Africa - Joint United Nations Programme on HIV/AIDS. 2005

This report presents three hypothetical case studies for how the AIDS epidemic in Africa could evolve over the next 20 years based on policy decisions taken today by African leaders and the rest of the world; and considers the factors likely to drive the future responses of African countries and the international community. The scenarios draw on the age-old tradition of story-telling, rather than using data projections, to explore the wider context of the AIDS epidemic, reflecting the complexity of the subject matter.

AIDS - National Research Council 1990-02-01

Expanding on the 1989 National Research Council

volume AIDS, Sexual Behavior, and Intravenous Drug Use, this book reports on changing patterns in the distribution of cases and the results of intervention efforts under way.

It focuses on two important subpopulations that are becoming more and more at risk: adolescents and women. The committee also reviews strategies to protect blood supplies and to improve the quality of surveys used in AIDS research. AIDS: The Second Decade updates trends in AIDS cases and HIV infection among the homosexual community, intravenous drug users, women, minorities, and other groups; presents an overview of a wide range of behavioral intervention strategies directed at specific groups; discusses discrimination against people with AIDS and HIV infection; and presents available data on the proportion of teenagers engaging in the behaviors that can transmit the virus and on female prostitutes and HIV infection.

The Impact of Aids - Jose Catalan 2020-09-30

First Published in 1997. From the start of the HIV epidemic, the psychological and social aspects of the AIDS infection have been recognized. This volume contains a selection of key contributions to the discussion on the psychological and social implications of such infection.

In Changing Times - Martin P. Levine 1997-08-18

The HIV/AIDS epidemic has been a major catastrophe for gay communities. In less than two decades, the disease has profoundly changed the lives of gay men and lesbians. Not just a biological and viral agent, HIV has become an opportunistic social invader, reshaping communities and the distribution of wealth, altering the social careers of gay professionals and the patterns of entry into gay and lesbian life, and giving birth to groups like ACT UP and Queer Nation. The distinguished contributors to this volume discuss the ways HIV/AIDS has changed collective and individual identities, as well as lives, of gay men and lesbians, and how

these alterations have changed our perceptions of the epidemic. They cover such topics as the impact of the epidemic on small towns, cultural barriers to AIDS prevention, gay youth and intergenerational relations, and the roles of lesbians in AIDS organizations. This collection provides compelling insights into the new communities among gay men and lesbians and the new kinds of identities and relationships that are emerging from the social and cultural ferment engendered by HIV/AIDS. Contributors include Barry D. Adam, Lourdes Arguelles, Rafael Miguel Diaz, John H. Gagnon, Gilbert Herdt, Gregory M. Herek, Nan D. Hunter, Peter M. Nardi, John L. Peterson, Anne Rivero, Gayle S. Rubin, Beth E. Schneider, and Nancy E. Stoller.

AIDS - Associate Professor of Health Policy Elizabeth Fee 1988

Chronicles the responses of societies in times past to deadly diseases and illnesses, exploring the relevance of, and

the lessons to be learned from, these events in terms of the current AIDS crisis

Stigma, Discrimination and Living with HIV/AIDS - Pranee Liamputtong 2013-04-22

Up until now, many articles have been written to portray stigma and discrimination which occur with people living with HIV/AIDS (PLWHA) in many parts of the world. But this is the first book which attempts to put together results from empirical research relating to stigma, discrimination and living with HIV/AIDS. The focus of this book is on issues relevant to stigma and discrimination which have occurred to individuals and groups in different parts of the globe, as well as how these individuals and groups attempt to deal with HIV/AIDS. The book comprises chapters written by researchers who carry out their projects in different parts of the world and each chapter contains empirical information based on real life situations. This can be used as an evidence for health care

providers to implement socially and culturally appropriate services to assist individuals and groups who are living with HIV/AIDS in many societies.

The book is of interest to health care providers who have their interests in working with individuals and groups who are living with HIV/AIDS from a cross-cultural perspective. It will be useful for students and lecturers in courses such as anthropology, sociology, social work, nursing, public health and medicine. In particular, it will assist health workers in community health centres and hospitals in understanding issues related to HIV/AIDS and hence provide culturally sensitive health care to people living with HIV/AIDS from different social and cultural backgrounds. The book is useful for anyone who is interested in HIV/AIDS-related stigma and discrimination in diverse social and cultural settings.

Preventing and Mitigating AIDS in Sub-Saharan Africa - National Research Council 1996-03-28

The AIDS epidemic in Sub-Saharan Africa continues to affect all facets of life throughout the subcontinent. Deaths related to AIDS have driven down the life expectancy rate of residents in Zambia, Kenya, and Uganda with far-reaching implications. This book details the current state of the AIDS epidemic in Africa and what is known about the behaviors that contribute to the transmission of the HIV infection. It lays out what research is needed and what is necessary to design more effective prevention programs.

The AIDS Pandemic -

Lawrence O. Gostin 2005-11-16
In this collection of essays, Lawrence O. Gostin, an internationally recognized scholar of AIDS law and policy, confronts the most pressing and controversial issues surrounding AIDS in America and around the world. He shows how HIV/AIDS affects the entire population--infected and uninfected--by influencing our social norms, our economy, and our country's role as a world leader. Now in the third

decade of this pandemic, the nation and the world still fail to respond to the needs of persons living with HIV/AIDS and continue to tolerate injustice in their treatment, Gostin argues. AIDS, both in the United States and globally, deeply affects poor and marginalized populations, and many U.S. policies are based on conservative moral values rather than public health and social justice concerns. Gostin tackles the hard social, legal, political, and ethical issues of the HIV/AIDS pandemic: privacy and discrimination, travel and immigration, clinical trials and drug pricing, exclusion of HIV-infected health care workers, testing and treatment of pregnant women and infants, and needle-exchange programs. This book provides an inside account of AIDS policy debates together with incisive commentary. It is indispensable reading for advocates, scholars, health professionals, lawyers, and the concerned public.

Global Health Nursing in the

21st Century - Suellen Breakey, PhD, RN 2015-03-16

THE FIRST BOOK TO PRESENT THE SUCCESSES, CHALLENGES, AND OPPORTUNITIES OF GLOBAL HEALTH NURSING This text is designed specifically for nurses and nursing students who have an interest in global health as a specialty, regardless of experience or education level. It reflects both the unique contributions of the nursing profession and of other disciplines, which is in keeping with the editors' perspective on how to bring about lasting change. The text views global health through a nursing lens, but maintains this awareness and appreciation of interprofessionalism throughout. The editors and contributors have firsthand experience of the complex dynamics in achieving global health, and bring a wealth of knowledge to this important field, which has grown as a course and specialty. The text depicts the worldwide expansion of nursing partnerships between

resource-rich and resource-limited countries, discusses challenges and obstacles, and provides cases and guidance on how to achieve global health. It will appeal to all nurses, from student nurses embarking on a global health experience to more experienced global health nurses who offer professional nursing expertise from around the world. The text responds to a recent WHO mandate, which seeks the input of nurses and midwives as part of an interprofessional team of key strategists for facilitating global health. The Lancet report is also an important document used throughout the text, and an interview with Dr. Julio Frenk, author of that report, is included. Social, political, cultural, economic, and environmental factors—including climate change—are integrated into determinants of global health. The text covers the foundations of global health, including the emerging concept of climate justice, the ethical context of global health, and the importance of interprofessional

education. It addresses key issues of global health with a focus on poor and vulnerable individuals—particularly women and children—and those living in areas of conflict. In addition to describing notable accomplishments toward achieving global health, the book focuses on the need for increasing access to primary care, improving clinical practice through expanded education, and engaging interdisciplinary researchers in discovery of viable solutions. The book includes the perspectives of nurses and colleagues from other disciplines in both resource-rich and resource-limited countries. References provide resources for additional study, and PowerPoint slides and a test bank for instructors accompany the text. KEY FEATURES Case studies depict real-world experiences Presents firsthand knowledge of global health dynamics, challenges, and opportunities Provides a wealth of information from multiple perspectives Authored by

contributors across a variety of clinical and academic roles who are experienced in global health nursing and global health Includes chapters written by nurses from both resource-limited and resource-rich countries

HIV, Resurgent Infections and Population Change in Africa - Michel Caraël

2008-08-12

Forty years ago, the age-old battle against infectious diseases as a major threat to human health was believed close to being won. However, by the late twentieth century, the increase of emerging and reemerging infectious diseases was evident in both low and high income countries. About 30 new infectious diseases have been identified in the last 20 years. Among the "new" diseases, and most importantly, the Human Immunodeficiency Virus (HIV) epidemic, with 40 million persons infected and 25 million deaths since its first description, presents one of the most significant health, societal and security challenges facing the global community. The

interaction of HIV/AIDS with tuberculosis, malaria and bacterial infections have increased HIV-related morbidity and mortality, and in turn, the HIV pandemic has brought about devastating increases in tuberculosis. Understanding the population impact and the dynamics of infection diseases in the most affected region is critical to efforts to reduce the morbidity and mortality of such infections, and for decisions on where to use limited resources in the fight against infections. This book aims to contribute to these efforts by offering a demographic and epidemiological perspective on emerging and reemerging infections in sub-Saharan Africa.

The Social Impact of AIDS in the United States -

National Research Council
1993-02-01

Europe's "Black Death" contributed to the rise of nation states, mercantile economies, and even the Reformation. Will the AIDS epidemic have similar dramatic

effects on the social and political landscape of the twenty-first century? This readable volume looks at the impact of AIDS since its emergence and suggests its effects in the next decade, when a million or more Americans will likely die of the disease. The Social Impact of AIDS in the United States addresses some of the most sensitive and controversial issues in the public debate over AIDS. This landmark book explores how AIDS has affected fundamental policies and practices in our major institutions, examining: How America's major religious organizations have dealt with sometimes conflicting values: the imperative of care for the sick versus traditional views of homosexuality and drug use. Hotly debated public health measures, such as HIV antibody testing and screening, tracing of sexual contacts, and quarantine. The potential risk of HIV infection to and from health care workers. How AIDS activists have brought about major change in the way new

drugs are brought to the marketplace. The impact of AIDS on community-based organizations, from volunteers caring for individuals to the highly political ACT-UP organization. Coping with HIV infection in prisons. Two case studies shed light on HIV and the family relationship. One reports on some efforts to gain legal recognition for nonmarital relationships, and the other examines foster care programs for newborns with the HIV virus. A case study of New York City details how selected institutions interact to give what may be a picture of AIDS in the future. This clear and comprehensive presentation will be of interest to anyone concerned about AIDS and its impact on the country: health professionals, sociologists, psychologists, advocates for at-risk populations, and interested individuals.

The Impact of HIV/AIDS on Education and Institutionalizing Preventive Education - Roy A. Carr-Hill
2002

This book examines the impact of HIV/AIDS on education in sub-Saharan African countries. It looks at the situation at both macro and micro levels and emphasizes the need to react quickly and to institutionalize the response of education systems to the negative consequences of the pandemic. Drawing on studies of a few countries in sub-Saharan Africa, the first part of the book discusses the practicability of implementing a range of indicators for monitoring the impact of HIV/AIDS, specifically on the demand for supply, management, and quality of education at all levels. It underlines the difficulties of assessing and monitoring the impact on demand, supply, and quality in many of the worst affected countries in Africa. The second part focuses on the essential role that the education system has to play in preventing the expansion and mitigating the impact of the epidemic. A range of responses is developed, drawing on the experience of various national

and international organizations. This part also presents an overview of the education system in several countries that have attempted programs to impart life skills to children and young people. It considers the problems of evaluating such programs in light of cost effectiveness. (Author/WFA).

Living with HIV and Dying with AIDS - Lesley Doyal 2013

Doyal brings together findings from a wide range of empirical studies spanning the social sciences to explore experiences of HIV positive people across the world. This will illustrate how the disease is physically manifested and psychologically internalised by individuals in diverse ways depending on the biological, social, cultural and economic circumstances in which they find themselves. A proper understanding of these commonalities and differences will be essential if future strategies are to be effective in mitigating the effects of HIV and AIDS.

*The Impact of AIDS:
Psychological and Social*

Aspects of HIV Infection, 3rd Edition - Jose Catalan
1997-05-22

This volume contains a selection of key contributions to the discussion on the psychological and social implications on HIV infection. It contains up-to-date and authoritative papers by senior practitioners and researchers in the field of the psychological and social aspects of HIV infection. The book will appeal to those involved in providing care for people with HIV infections, be they physicians and nurses or psychologists, social workers and psychiatrists, as well as those involved in preventing the spread of the HIV infection. From the start of the HIV epidemic, the psychological and social aspects of the AIDS infection have been recognized. What could have been regarded simply as an infectious disease was soon acknowledged as a global problem that raised important issues about its transmission and prevention; economic, ethical and legal questions

regarding the mental health consequences and the need for access to medical and social care.

The Risks and Macroeconomic Impact of HIV/AIDS in the Middle East and North Africa - David A. Robalino 2002

Disease and Democracy -

Peter Baldwin 2005-05-16

Disease and Democracy is the first comparative analysis of how Western democratic nations have coped with AIDS. Peter Baldwin's exploration of divergent approaches to the epidemic in the United States and several European nations is a springboard for a wide-ranging and sophisticated historical analysis of public health practices and policies. In addition to his comprehensive presentation of information on approaches to AIDS, Baldwin's authoritative book provides a new perspective on our most enduring political dilemma: how to reconcile individual liberty with the safety of the community. Baldwin finds that Western democratic nations

have adopted much more varied approaches to AIDS than is commonly recognized. He situates the range of responses to AIDS within the span of past attempts to control contagious disease and discovers the crucial role that history has played in developing these various approaches. Baldwin finds that the various tactics adopted to fight AIDS have sprung largely from those adopted against the classic epidemic diseases of the nineteenth century—especially cholera—and that they reflect the long institutional memories embodied in public health institutions.

[Vulnerabilities, Impacts, and Responses to HIV/AIDS in Sub-Saharan Africa](#) - Getnet Tadele 2013-05-07

This book examines HIV/AIDS vulnerabilities, impacts and responses in the socioeconomic and cultural context of Sub-Saharan Africa. With contributions from social scientists and public health experts, the volume identifies gender inequality and poverty as the main causes of the HIV

epidemic in sub-Saharan Africa.

Private Acts, Social Consequences - Ronald Bayer 1991

In this timely, penetrating analysis, Bayer examines the legal and political implications of creating and implementing an effective and rational nationwide health policy that balances public safety with private freedom.

AIDS & Ethics - Frederic G. Reamer 1991

Should a physician with AIDS be required to inform his or her patients? Does a physician have an obligation to warn the partner who wants this fact kept secret? Should all newborns and pregnant women be screened for HIV? Should insurance companies be required to insure patients who test positive for the disease? Professionals and society at large are confronted by a wide range of complex ethical issues produced by the AIDS health crisis. *AIDS and Ethics* is the first major collection of essays on the complex ethical issues created by the AIDS crisis. The

nation's leading bioethics experts from the fields of law, medicine, philosophy, political science, religion, and social work present original and accessible essays. They address current controversial issues related to the tension between civil rights and public health, mandatory HIV testing, human subjects research, health care insurance, AIDS education, militant AIDS activism, the physician-patient relationship, issues of privacy, and legal issues. This important book will provide philosophical and practical guidelines to health care and human service professionals, policy makers, scholars, and others affected by the AIDS crisis.

Let the Record Show - Sarah Schulman 2021-05-18
Winner of the 2022 Lambda Literary LGBTQ Nonfiction Award and the 2022 NLGJA Excellence in Book Writing Award. Finalist for the PEN/John Kenneth Galbriath Award for Nonfiction, the Gotham Book Prize, and the ALA Stonewall Israel Fishman

Nonfiction Award. A 2021 New York Times Book Review Notable Book and a New York Times Book Review Editors' Choice. Longlisted for the 2021 Brooklyn Public Library Literary Prize. One of NPR, New York, and The Guardian's Best Books of 2021, one of BuzzFeed's Best LGBTQ+ Books of 2021, one of Electric Literature's Favorite Nonfiction Books of 2021, one of NBC's 10 Most Notable LGBTQ Books of 2021, and one of Gay Times' Best LGBTQ Books of 2021. "This is not reverent, definitive history. This is a tactician's bible." --Parul Sehgal, *The New York Times* Twenty years in the making, Sarah Schulman's *Let the Record Show* is the most comprehensive political history ever assembled of ACT UP and American AIDS activism. In just six years, ACT UP, New York, a broad and unlikely coalition of activists from all races, genders, sexualities, and backgrounds, changed the world. Armed with rancor, desperation, intelligence, and creativity, it took on the AIDS crisis with an indefatigable,

ingenious, and multifaceted attack on the corporations, institutions, governments, and individuals who stood in the way of AIDS treatment for all. They stormed the FDA and NIH in Washington, DC, and started needle exchange programs in New York; they took over Grand Central Terminal and fought to change the legal definition of AIDS to include women; they transformed the American insurance industry, weaponized art and advertising to push their agenda, and battled—and beat—The New York Times, the Catholic Church, and the pharmaceutical industry. Their activism, in its complex and intersectional power, transformed the lives of people with AIDS and the bigoted society that had abandoned them. Based on more than two hundred interviews with ACT UP members and rich with lessons for today's activists, *Let the Record Show* is a revelatory exploration—and long-overdue reassessment—of the coalition's inner workings, conflicts, achievements, and

ultimate fracture. Schulman, one of the most revered queer writers and thinkers of her generation, explores the how and the why, examining, with her characteristic rigor and bite, how a group of desperate outcasts changed America forever, and in the process created a livable future for generations of people across the world.

HIV/AIDS: A Very Short

Introduction - Alan Whiteside
2008-01-24

Providing an introduction to HIV/AIDS, this book explains the science, the international and local politics, the demographics and the devastating consequences of the disease. This book is aimed at general readers interested in the science, the epidemiology and the social effects of the disease which has killed 20 million.

Meddling with Mythology -

Rosaline S. Barbour 1998

What are the responsibilities of the researcher to the researched and to the public? This book examines the role of research in the construction

and dissemination of the mythology or folklore surrounding AIDS/HIV.

AIDS Doctors - Ronald Bayer
2002-05-16

Today, AIDS has been indelibly etched in our consciousness. Yet it was less than twenty years ago that doctors confronted a sudden avalanche of strange, inexplicable, seemingly untreatable conditions that signaled the arrival of a devastating new disease. Bewildered, unprepared, and pushed to the limit of their diagnostic abilities, a select group of courageous physicians nevertheless persevered. This unique collective memoir tells their story. Based on interviews with nearly eighty doctors whose lives and careers have centered on the AIDS epidemic from the early 1980s to the present, this candid, emotionally textured account details the palpable anxiety in the medical profession as it experienced a rapid succession of cases for which there was no clinical history. The physicians

interviewed chronicle the roller coaster experiences of hope and despair, as they applied newly developed, often unsuccessful therapies. Yet these physicians who chose to embrace the challenge confronted more than just the sense of therapeutic helplessness in dealing with a disease they could not conquer. They also faced the tough choices inherent in treating a controversial, sexually and intravenously transmitted illness as many colleagues simply walked away. Many describe being gripped by a sense of mission: by the moral imperative to treat the disempowered and despised. Nearly all describe a common purpose, an esprit de corps that bound them together in a terrible yet exhilarating war against an invisible enemy. This extraordinary oral history forms a landmark effort in the understanding of the AIDS crisis. Carefully collected and eloquently told, the doctors' narratives reveal the tenacity and unquenchable optimism that has paved the way for

taming a 20th-century plague. [Consolidated guidelines on HIV prevention, testing, treatment, service delivery and monitoring](#) - World Health Organization 2021-07-16

These consolidated guidelines on HIV prevention, testing, treatment, service delivery and monitoring bring together existing and new clinical and programmatic recommendations across different ages, populations and settings, bringing together all relevant WHO guidance on HIV produced since 2016. It serves as an update to the previous edition of the consolidated guidelines on HIV. These guidelines continue to be structured along the continuum of HIV care. Information on new combination prevention approaches, HIV testing, ARV regimens and treatment monitoring are included. There is a new chapter on advanced HIV disease that integrates updated guidance on the management of important HIV comorbidities, including cryptococcal disease, histoplasmosis and

tuberculosis. The chapter on general HIV care, contains a new section on palliative care and pain management, and up to date information on treatment of several neglected tropical diseases, such as visceral leishmaniasis and Buruli ulcer. New recommendations for screening and treating of cervical pre-cancer lesions in women living with HIV are also addressed in this chapter. Guidance on service delivery was expanded to help the implementation and strengthening the HIV care cascade. Importantly, this guidance emphasizes the need for differentiated approaches to care for people who are established on ART, such as reduced frequency of clinic visits, use of multi-month drug dispensing and implementation of community ART distribution. The adoption of these efficiencies is essential to improve the quality of care of people receiving treatment and reduce the burden on health facilities, particularly in resource limited settings.

[AIDS in the Mind of America](#) -

Dennis Altman 1987

The AIDS Generation - Perry N. Halkitis 2014

Examines the strategies employed by the first generation of HIV-positive gay men to survive and cope and provides an understanding of how individuals cope with life-threatening diseases.

AIDS and the Policy Struggle in the United States - Patricia D. Siplon 2002

Focusing on one of the most controversial public policy issues in U.S. history, the author illuminates the issues that continue to swirl around this topic while revealing how various groups in American society have tried to use them to change laws and government policy. (Current Affairs)

of HIV/AIDS in Africa - David E. Sahn 2010

"Published in cooperation with the United Nations University."

HIV/AIDS and Work -

International Labour Office
2004

It is estimated that by the end of 2003 there were just under 38 million people living with HIV/AIDS, with all but two million of these people of working age. This report, prepared by the ILO Programme on HIV/AIDS and the World of Work, sets out global estimates of the impact of HIV/AIDS on the labour force and the working age population in 50 countries in Africa, Asia, Latin America and the Caribbean and in more developed regions. Issues discussed include: the implications for the private and public sectors, on agriculture and concerns for food insecurity and on the informal economy; on women and children; policy implications and examples of responses to the problem in a variety of workplace settings; provision of antiretroviral therapy in

conjunction with HIV prevention in the workplace and the potential for expanded access to workplace-based treatment.

Social and Psychological Aspects of HIV/AIDS and their Ramifications -

Gobopamang Letamo
2011-10-26

This book has assembled an array of chapters on the social and psychosocial aspects of HIV/AIDS and their impact on HIV/AIDS and related behaviours. The book addresses key areas of HIV and AIDS, including, but not in any way limited to, care-seeking behaviour, adherence, access, psychosocial needs and support services, discrimination and the impact the epidemic has on various sectors of the economy. The book has seventeen chapters; seven chapters deal with social aspects of HIV/AIDS, four with psychosocial aspects of HIV/AIDS, and the remaining six chapters with the impact of social and psychosocial factors on HIV/AIDS and related behaviours. The book is an

essential reading for academics, students and other people interested in the field of HIV and AIDS.

Linked by Blood: Hemophilia and AIDS - David Green 2016-05-19

Linked by Blood: Hemophilia and AIDS recounts the factors responsible for the widespread infection of people with hemophilia by Human Immunodeficiency Virus (HIV)-contaminated blood and offers a prescription for addressing the challenges of future viral epidemics. The book describes the impact of AIDS on people with hemophilia, their families, and caregivers. The collection, processing, and distribution of blood in the early years of the HIV epidemic are described, including the failure of regulatory agencies to promulgate effective rules to safeguard the blood supply. The contributions of individuals and organizations that mitigated the epidemic are recognized. Linked by Blood presents recommendations for addressing the myriad medical, social, and economic

challenges posed by blood-borne viral infections (AIDS, Ebola, MERS) that periodically sweep through large segments of our population. Addresses the challenges of future viral epidemics Promotes understanding of the risks and benefits of blood transfusion Demystifies HIV/AIDS by explaining how the virus causes disease and is detected and treated Covers the factors that led to contamination of the blood supply and contributed to the AIDS epidemic Provides background information on hemophilia: who is affected, why they bleed, how it is treated, and what complications can occur Discusses the role of regulatory agencies in protecting the blood supply and ensuring the safety of blood and blood products Features new proposals to enhance blood product safety and regulate the prices of blood, drugs, and devices that are essential for human health

Preparing for the Future of HIV/AIDS in Africa - Institute of Medicine 2011-03-28

HIV/AIDS is a catastrophe globally but nowhere more so than in sub-Saharan Africa, which in 2008 accounted for 67 percent of cases worldwide and 91 percent of new infections. The Institute of Medicine recommends that the United

States and African nations move toward a strategy of shared responsibility such that these nations are empowered to take ownership of their HIV/AIDS problem and work to solve it.
