A new chapter on refractive surgery has been added to this rapidly expanding subspecialty. Imaging words such as OCT have been added. This ophthalmic dictionary is useful for ophthalmologist and ophthalmic Assistant.

**Controversial Statistical Issues in Clinical Trials** - Shein-Chung Chow 2016-04-19

In clinical trial practice, controversial statistical issues inevitably occur regardless of the compliance with good statistical practice and good clinical practice. But by identifying the causes of the issues and correcting them, the study objectives of clinical trials can be better achieved. Controversial Statistical Issues in Clinical Trials covers commonly encountered controversial statistical issues in clinical trials and, whenever possible, makes recommendations to resolve these problems. The book focuses on issues occurring at various stages of clinical research and development, including early-phase clinical development (such as bioavailability/bioequivalence), bench-to-bedside translational research, and late-phase clinical development. Numerous examples illustrate the impact of these issues on the evaluation of the safety and efficacy of the test treatment under investigation. The author also offers recommendations regarding possible resolutions of the problems. Written by one of the preeminent experts in the field, this book provides a useful desk reference and state-of-the art examination of problematic issues in clinical trials for scientists in the pharmaceutical industry, medical/statistical reviewers in government regulatory agencies, and researchers and students in academia.

**Harwood-Nuss' Clinical Practice of Emergency Medicine** - Allan B. Wolfson 2014-10-27

Harwood-Nuss' Clinical Practice of Emergency Medicine presents a clinically focused and evidence-based summary of emergency medicine. Chapters are templated to include the clinical presentation, differential diagnosis, evaluation, management and disposition, with highlighted critical interventions and common pitfalls. Management and disposition are especially critical in the emergency department, and their emphasis is unique to Harwood-Nuss. Often, a diagnosis can not be made, given the constraints of an ED evaluation; thus, effective management of the patient, with or without a confirmed diagnosis, is key. Also distinct to Harwood-Nuss is the High-Risk Chief Complaints section, which covers the key presentations in the ED: chest pain, abdominal pain, shortness of breath, altered mental status. When patients present in the ED, they don't present with a known diagnosis; this chapter walks the physician through possible differential diagnoses and the evaluation and management of these patients so that they can be stabilized and treated quickly and effectively.

Chapters detail drug transfer across barriers, systemic toxicity of topically applied drugs, autonomic drugs used for diagnostics, as well as anti-inflammatory, antiallergic, glaucoma and antimicrobial therapies, and avenues for the development of new ocular drugs. Applications of extemporaneously prepared formulations are described to inform day-to-day clinical practice. The use of mucoadhesive polymers in tear substitutes, ocular drug delivery systems, stem cell therapy, pharmacogenomics and antiangiogenic ocular chemotherapy are also explored. The book also provides insights from drugs of herbal origin, and a historical perspective on drugs for ocular use. Practicing and resident ophthalmologists, optometrists, pharmacists, nursing professionals, scholars in ocular drug research and students will equally benefit from this comprehensive guide.

[RDA and Serials Cataloging](#) - Ed Jones 2013

Serials and continuing resources present a variety of unique challenges in bibliographic management, from special issues and unnumbered supplements to recording the changes that a long-running periodical can experience over time. Easing catalogers through the RDA: Resource Description and Access transition by showing the continuity with past practice, serials cataloging expert Jones frames the practice within the structure of the FRBR and FRAD conceptual models on which RDA is based. With serials' special considerations in mind, he Explains the familiarities and differences between AACR2 and RDA Demonstrates how serials catalogers' work fits in the cooperative context of OCLC, CONSER and NACO Presents examples of how RDA records can ultimately engage with the Semantic Web Occasional serials catalogers and specialists alike will find useful advice here as they explore the structure of the new cataloging framework.

[RDA: Resource Description and Access: 2013 Revision](#) - Joint Steering Committee (JSC) 2013-10-28

This e-book contains the 2013 Revision of RDA: Resource Description and Access, and includes the July 2013 Update. This e-book offers links within the RDA text and the capability of running rudimentary searches

of RDA, but please note that this e-book does not have the full range of content or functionality provided by the subscription product RDA Toolkit. Included: A full accumulation of RDA—the revision contains a full set of all current RDA instructions. It replaces the previous version of RDA Print as opposed to being an update packet to that version. RDA has gone through many changes since it was first published in 2010.

Cataloging practice described by RDA has not changed dramatically due to the changes above, but nearly every page in RDA Print was impacted by the changes, with the result that an RDA Print update packet would require nearly as many pages as the full revision. The most current RDA—the revision contains all changes to RDA up to and including the 2013 RDA Update approved by the JSC. Annually the JSC considers proposals to update, enhance and maintain RDA as a current cataloging standard. These updates can and often do change the cataloging process as described by RDA. The JSC also periodically issues changes to RDA to fix errors and to clarify meaning. These changes do not typically change cataloging practice as described by RDA. Reworded RDA—the revision includes the reworded version of RDA instructions. To improve readability and comprehension of complex instructions, RDA has been edited and reworded since its original release. The rewording was carried out by the JSC, RDA Copy Editor, and reviewed by the U.S. RDA Test Coordinating Committee.
