A History of the French in London - Debra Kelly 2013

This book examines, for the first time, the history of the social, cultural, political and economic presence of the French in London, and explores the multiple ways in which this presence has contributed to the life of the city. The capital has often provided a place of refuge, from the Huguenots in the 17th century, through the

period of the French Revolution, to various exile communities during the 19th century, and on to the Free French in the Second World War. It also considers the generation of French citizens who settled in post-war London, and goes on to provide insights into the contemporary French presence by assessing the motives and lives of French people seeking new opportunities in the late 20th and early 21st centuries. It analyses the impact that the French have had historically, and continue to have, on London life in the arts, gastronomy, business, industry and education, manifest in diverse places and institutions from the religious to the political via the educational, to the commercial and creative industries.

The Phenomenology of Aesthetic Experience - Mikel Dufrenne 1973

The Phenomenology of Aesthetic Experience (Fr. *Phénoménologie de l'expérience esthétique*) was first published in 1953. In the first of four parts, Dufrenne distinguishes the "aesthetic object" from the "work of art." In the second, he elucidates types of works of art, especially music and painting. He devotes his third

section to aesthetic perception. In the fourth, he describes a Kantian critique of aesthetic experience. A perennial classic in the SPEP series, the work is rounded out by a detailed "Translator's Foreword" especially helpful to readers in aesthetics interested in the context and circumstances around which the original was published as well as the phenomenological background of the book.

Italian scientist since Galileo. Called the Pope by his peers, he was regarded as infallible in his instincts and research. His discoveries changed our world; they led to weapons of mass destruction and conversely to life-saving medical interventions. This unassuming man struggled with issues relevant today, such as the threat of nuclear annihilation and the relationship of science to politics. Fleeing Fascism and anti-Semitism, Fermi became a leading figure in America's most secret project: building the atomic bomb. The last physicist who mastered all branches of the discipline, Fermi was a rare mixture of theorist and experimentalist. His rich legacy encompasses key advances in fields as diverse as cosmic rays, nuclear technology, and early computers. In their revealing book, *The Pope of Physics*, Gino Segré and Bettina Hoerlin bring this scientific visionary to life. An examination of the human dramas that touched Fermi's life as well as a thrilling history of scientific

innovation in the twentieth century, this is the comprehensive biography that Fermi deserves.

When China Rules the World - Martin Jacques 2009-11-12 Greatly revised and expanded, with a new afterword, this update to Martin Jacques's global bestseller is an essential guide to understanding a world increasingly shaped by Chinese power. Soon, China will rule the world. But in doing so, it will not become more Western. Since the first publication of *When China Rules the World*, the landscape of world power has shifted dramatically. In the three years since the first edition was published, *When China Rules the World* has proved to be a remarkably

prescient book, transforming the nature of the debate on China. Now, in this greatly expanded and fully updated edition, boasting nearly 300 pages of new material, and backed up by the latest statistical data, Martin Jacques renews his assault on conventional thinking about China's ascendancy, showing how its impact will be as much political and cultural as economic, changing the world as we know it. First published in 2009 to widespread critical acclaim - and controversy - *When China Rules the World: The End of the Western World and the Birth of a New Global Order* has sold a quarter of a million copies, been translated into eleven languages, nominated for two major literary awards, and is the subject of an immensely popular TED talk.

times of recession. It looks at Portuguese emigrants who, after the crisis of 2008, moved both intra-EU, such as UK, France, Switzerland, Germany and Spain, but also into countries with historical links, such as the USA and Canada, and to Portuguese speaking countries such as Brazil, Angola and Mozambique, as well as the processes of return. In addition to the dynamics of movement, the book provides an in-depth analysis of the heterogeneity of this emigration. It deepens the multifaceted identities concerning social and professional pathways among highly skilled and less skilled emigrants. The labour market continues to be the main regulatory force of Portuguese emigration, which helps to explain the outflow and the processes of settlement and return. Nonetheless, this book demonstrates that non-economic factors have likewise been of great importance in the decision to emigrate. As such this book will be a valuable read to policy makers, students

and scholars in migration.

Public Access ICT Across Cultures - Francisco J Proenza 2015-05-08

A systematic assessment of the impact of public access to computers and the Internet, with findings from developing countries in South America, Asia, and Africa. Shared public access to computers and the Internet in developing countries is often hailed as an effective, low-cost way to share the benefits of digital technology. Yet research on the economic and social effects of public access to computers is lacking. This volume offers the first systematic assessment of the impact of shared public

access in the developing world, with findings from ten countries in South America, Asia, and Africa. It provides evidence that the benefits of diversified participation in digital society go beyond providing access to technology. Public access venues—most often Internet cafés in cities and state-run telecenters in rural areas—are places for learning, sharing, working, empowerment and finding opportunities. The book documents the impact of public access on individuals, on society and networks, and on women. Chapters report findings and examine policy implications of research on such topics as users' perceptions of the benefits of Internet café use in Jordan; ICT job training in Rwanda; understanding user motivations and risk factors for overuse and Internet addiction in China; the effect of technology use on social inclusion among low-income urban youth in Argentina; productive uses of technologies by grassroots organizations in Peru; use of

technology by migrant ethnic minority Burmese women in Thailand to maintain ties with their culture and their family and friends; and women's limited access to the most ubiquitous type of venue, cybercafés, in practically all countries studied—and quite severely in some places, e.g. Uttar Pradesh, India.

Hugh Maaskant - Michelle Provoost 2014-02-28
Today considered the godfather and forerunner of a generation that includes Adriaan Geuze, Rem Koolhaas, Winy Maas and Willem Jan Neutelings, Hugh Maaskant (1907-1977) was underappreciated for many years. Maaskant led the postwar reconstruction of

Rotterdam, designing revolutionary, complex, large-scale buildings, such as the Groothandelsgebouw and Euromast, as well as the Amsterdam Hilton Hotel and the Scheveningen Pier in The Hague. In Hugh Maaskant: Architect of Progress, historian and Maaskant scholar Michelle Provoost orients the architect in an international as well as historical perspective, recounting his work in the context of the optimistic reconstruction of the postwar period as well as the exciting developments of the 1960s and Holland's increasing prosperity throughout that decade. The book features both historical and recent photographs, including a series taken especially for this edition by internationally renowned architectural photographer Iwan Baan.

Cosmopolitanism - Carol A. Breckenridge 2002-04-19
As the final installment of Public Culture's Millennial Quartet, Cosmopolitanism assesses the pasts and possible futures of cosmopolitanism—or ways of thinking, feeling, and acting beyond one's particular society. With contributions from distinguished scholars in disciplines such as literary studies, art history, South Asian studies, and anthropology, this volume recenters the history and theory of translocal political aspirations and cultural ideas from the usual Western vantage point to areas outside Europe, such as South Asia, China, and Africa. By examining new archives, proposing new theoretical formulations, and suggesting new possibilities of political practice, the contributors critically probe the concept of cosmopolitanism. On the one hand, cosmopolitanism may be taken to promise a form of

supraregional political solidarity, but on the other, these essays argue, it may erode precisely those intimate cultural differences that derive their meaning from particular places and traditions. Given that most cosmopolitan political formations—from the Roman empire and European imperialism to contemporary globalization—have been coercive and unequal, can there be a noncoercive and egalitarian cosmopolitan politics? Finally, the volume asks whether cosmopolitanism can promise any universalism that is not the unwarranted generalization of some Western particular. Contributors.

In Battle for Peace - William Edward Burghardt Du Bois
2014-02-20

W. E. B. Du Bois was a public intellectual, sociologist, and activist on behalf of the African American community. He profoundly shaped black political culture in the United States through his founding role in the NAACP, as well as

internationally through the Pan-African movement. Du Bois's sociological and historical research on African-American communities and culture broke ground in many areas, including the history of the post-Civil War Reconstruction period. Du Bois was also a prolific author of novels, autobiographical accounts, innumerable editorials and journalistic pieces, and several works of history. One of the most neglected and obscure books by W. E. B. Du Bois, *In Battle for Peace* frankly documents Du Bois's experiences following his attempts to mobilize Americans against the emerging conflict between the United States and the Soviet Union. A victim of McCarthyism, Du Bois endured a humiliating trial-he was later acquitted-and faced political persecution for over a decade. Part autobiography and part political statement, *In Battle for Peace* remains today a powerful analysis of race in America. With a series introduction by editor Henry

Louis Gates, Jr., and an introduction by Manning Marable, this edition is essential for anyone interested in African American history.

Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who

take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.
