Mind-Blowing Modular Origami - Byriah Loper 2016-10-11

Modular origami is the latest craze in paper folding! These three-dimensional models are created from a number of small pieces of paper that are easily folded and then cleverly fit together to form a spectacular shape. They range from paper polyhedra to bristling buckyballs that are reminiscent of sea urchins—to ornate flower-like spheres. Each piece of paper is held by the tension of the other papers—demonstrating the remarkable hidden properties of paper, which is at the same time flexible but also strong! Author Byriah Loper has been creating modular origami sculptures for just five years, but in that time, he's pushed the upper limits of the art form with some of the largest, most complex geometric paper constructions ever assembled. While many geo-modular origami artists focus on creating dense floral spheres, Byriah has pioneered the open, linear "wire frame" approach, which results in a very complex-

looking model that reveals the interior of its form. He exhibits his sculptures annually at the Origami USA convention in New York, and was recently a featured artist at the "Surface to Structure" exhibition at the Cooper Union gallery in the East Village. A great way to learn origami, the easy-to-follow diagrams and step-by-step instructions in this book show you how to fold the paper components and then assemble them to create 22 incredible models. Each model is a new challenge, and the paper sculptures you create look fantastic on your desk or shelf!

Discovering Craft Villages in Vietnam - Sylvie Fanchette 2018-11-19

With their festivals and traditional industries, their commun halls, pagodas, temples, and vernacular buildings, the villages around Hà Nội possess a rich body of cultural, architectural and craft heritage. Less than one hour from the capital are over 500 specialist craft villages, producing an array of religious or artistic objects, as well as food products, industrial goods, textiles, basketware and much more. Despite the trials and tribulations Vietnam has endured, these traditions have remained alive; today they constitute the basis of material, social and spiritual culture among the village communities of the Red River delta. The artisans themselves, and their local institutions, see cultural tourism as a way of further improving the fortunes of the craft village communities and bringing their heritage to wider attention. Until recently, few guides or tourists had forayed into these settlements, some of which are lost in the maze of routes and tracks that criss-cross the rice paddies of the Hà Nội hinterland. The history and skills they harbour have been inaccessible to all but a few specialists. Few of the villages are signposted, yet between them they are home to three quarters of the architectural, religious and craft heritage of the upper delta. This book, the fruit of several years' research by specialists working in northern Vietnam, comprises ten itineraries, blending potted histories, legends, descriptions of craft techniques, signposted walks and maps, designed to introduce travellers and lovers of Vietnamese culture to forty or so villages around Hà Nội. Many of us have seen their wares on sale in

shops in and around the 36 streets of Hà Nội Old Quarter or in other cities in West. This book is about the true lives and enduring skills of the nameless artisans who made them.

Why Don't Students Like School? - Daniel T. Willingham 2009-06-10
Easy-to-apply, scientifically-based approaches for engaging students in the classroom Cognitive scientist Dan Willingham focuses his acclaimed research on the biological and cognitive basis of learning. His book will help teachers improve their practice by explaining how they and their students think and learn. It reveals the importance of story, emotion, memory, context, and routine in building knowledge and creating lasting learning experiences. Nine, easy-to-understand principles with clear applications for the classroom Includes surprising findings, such as that intelligence is malleable, and that you cannot develop "thinking skills" without facts How an understanding of the brain's workings can help teachers hone their teaching skills "Mr. Willingham's answers apply just as well outside the classroom. Corporate trainers, marketers and, not least, parents -anyone who cares about how we learn-should find his book valuable reading." —Wall Street Journal

Cut and Assemble Frank Lloyd Wright's Robie House - Edmund V. Gillon, Jr. 1987-01-01

Designed in 1908 as a suburban residence for a Chicago businessman, the Robie House embodied the full spirit of Frank Lloyd Wright's pioneering "prairie school" of design. Today, this masterpiece of modern architecture remains a classic example of the builder's ideas and ideals. Long, low, streamlined and exemplary of the prairie's spaciousness, the Robie House profoundly influenced the course of American architecture — so much so that a model of Wright's innovative structure has long been on display at the Museum of Modern Art in Manhattan. Now model builders as well as lovers of fine architecture can construct an accurate three-dimensional model of the Robie House, and thereby discover for themselves the harmonious interrelationships of parts and numerous other design details that make this home a world-famous architectural masterpiece. Printed in full color on sturdy card stock, the model comes complete with step-by-step instructions and exploded diagrams. A series

of multi-level horizontal planes includes balconies, platforms, a porch and entrance court, while easy-to-follow directions clearly explain how to cut, fold and glue walls, doorways, windows, roof and other features. Students of architecture, miniaturists and paper engineers will delight in recreating an outstanding example of American residential architecture, which, in Wright's own words, has become "a source of worldwide inspiration."

The Brand Mapping Strategy - Karen Leland 2016-06-20

A fundamental paradigm shift has occurred in marketing and branding.

Today the most successful CEOs, executives, entrepreneurs and enterprises set their sites on developing a long-term platform instead of a short-term strategy that supports and builds buzz for their personal or business brand. That's really the key to the new business mindset — the recognition that branding and marketing are an ongoing, steady stream of small efforts, not a series of gigantic pushes. Social media, blogging and other business development activities — both online and off — are about the persistent, ongoing process of building a platform, creating credibility and increasing the number of people that you funnel into your potential client and network pipeline. Converting those people into clients or fans may take a month, a year or two years, but the new mindset leads you to strategies that will keep that pipeline full. In short, you need to start a bunch of small fires to keep your brand burning hot. How can today's CEOs, executives and entrepreneurs keep these fires going and powerfully get their messages across, motivate others to action and be authentic — all while simultaneously shepherding initiatives from creation to implementation in high-demand markets? CEO, executive and team branding are key factors that enable effective leaders to achieve peak performance, gain greater influence in their industries and generate increased engagement within their companies. By creating a brand (business or personal) by design instead of default, leaders and companies bring their brand promise into every interaction across the board. A personal, team or business brand is not just a single statement or a clever quip but a multilayered, congruent narrative told across multiple channels — online and off — within the organization and to the business community at large. The power is in knowing how to tell the story. The book will introduce CEOs and executives in Fortune 500 companies and entrepreneurs in SMBs to the SMG Brand Mapping Process©, a process that will guide them in creating personal, team and business brands that work in harmony and parallel with each other.
