Komodo Dragons - James B. Murphy 2015-03-31  
More than twenty years have passed since Walter Auffenberg's monumental *The Behavioral Ecology of the Komodo Monitor*. In the intervening years the populations of Komodo dragons—native only to a handful of islands in southeast Indonesia—have dwindled, sparking intensive conservation efforts. During the last two decades new information about these formidable predators has emerged, and the most important findings are clearly presented here. A memoir from Walter Auffenberg and his son Kurt is followed by the latest information on Komodo dragon biology, ecology, population distribution, and behavior. The second part of the book is dedicated to step-by-step management and conservation techniques, both for wild and captive dragons. This successful model is a useful template for the conservation of other endangered species as well, for, as Kurt and Walter Auffenberg note, "The species may well

indeed survive in the wild for generations to come while countless other organisms are lost.”

**Internal Combustion Engines** - Institution of Mechanical Engineers 2014-10-10

This book presents the papers from the Internal Combustion Engines: Performance, fuel

economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion

engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

*Ground Loads* - United States. Air Force-Navy-Civil Committee on Aircraft Design Criteria 1948

Ossian Bingley Hart, Florida's Loyalist Reconstruction Governor - Canter Brown, Jr.  
1997-07-01

In this exceptional biography, Canter Brown, Jr., removes Ossian Bingley Hart (1821-1874)—a Unionist, the principal founder of the Republican Party in Florida, and a Reconstruction-era governor of the state—from the shadows of

history. Through an examination of Hart's life and career, Brown offers new insight into the political problems of the day—the role of Unionism in Deep South politics in particular—and enriches our understanding of the complexities of Reconstruction. Brown traces Hart's life from his privileged childhood in the newly founded port town of Jacksonville through his service as a volunteer soldier in the Second Seminole War, his education in South Carolina, and the dawn of his legal and political career on Florida's Atlantic frontier to his election as governor in 1872 and his premature death sixteen months later. Brown's multifaceted biography offers a rare glimpse at the persistence of Loyalism in the post-Civil War South and clearly illustrates the pivotal role played by both Loyalists and African Americans in southern politics of that era and how these two groups merged to resist carpetbag rule.

**The Working Kelpie** - Anthony D. Parsons 1986

**Working with and for Ancestors** - Chelsea H. Meloche 2020-11-30

Working with and for Ancestors examines collaborative partnerships that have developed around the study and care of Indigenous ancestral human remains. In the interest of reconciliation, museums and research institutions around the world have begun to actively seek input and direction from Indigenous descendants in establishing collections care and research policies. However, true collaboration is difficult, time-consuming, and sometimes awkward. By presenting

examples of projects involving ancestral remains that are successfully engaged in collaboration, the book provides encouragement for scientists and descendant communities alike to have open and respectful discussions around the research and care of ancestral human remains. Key themes for discussion include new approaches to the care for ancestors; the development of culturally sensitive museum policies; the emergence of mutually beneficial research partnerships; and emerging issues such as those of intellectual property, digital data, and alternatives to destructive analyses. Critical discussions by leading scholars also identify the remaining challenges in the repatriation process and offer a means to continue moving forward. This volume will appeal to a broad, interdisciplinary audience interested in collaborative research and management strategies that are aimed at developing mutually beneficial relationships between researchers and descendant communities. This includes students

and researchers in archaeology, anthropology, museums studies, and Indigenous communities. *Theory of Interplanetary Flights* - Grigor A. Gurzadyan 2020-12-18

*Search For Justice* - Jack Spence 2019-06-21

I originally became interested in the law and society nature of this research project through a law school and then graduate political science educational background. This led me to consider courts in a number of settings, including the popular tribunals in Cuba. Before going to Chile, I wrote a lengthy paper comparing local court institutions in tribal, peasant, urban U.S. and Cuban settings. As that paper was being completed, Allende had been elected and proposals for neighborhood courts were in the air. This coincided with the above interests and with the urban political and Latin American foci I had in graduate school.

### **The Impacts of Language and Literacy Policy on Teaching Practices in Ghana -**

Philomena Osseo-Asare 2021-03-16

This text critically examines changes in Ghanaian language and literacy policy following independence in 1957 to consider its impacts on early literacy teaching. By adopting a postcolonial theoretical perspective, the text interrogates the logic behind policy changes which have prioritised English, local language, or biliteracy. It draws on data from interviews

with teachers and researcher observation to demonstrate how policies have influenced teaching and learning. Dr Osseo-Asare's findings inform the development of a conceptual framework which highlights the socio-cultural factors that impact the literacy and biliteracy of young children in Ghana, offering solutions to help teachers combat the challenges of frequent policy changes. This timely monograph will prove to be an essential resource not only for researchers working on education policies, teacher education, and English-language learning in postcolonial Ghana but also for those looking to identify the thematic and methodological nuances of studying literacy and education in postcolonial contexts.
