Flight of Passage - Rinker Buck 2013-03-05

Writer Rinker Buck looks back more than 30 years to a summer when he and his brother, at ages 15 and 17 respectively, became the youngest duo to fly across America, from New Jersey to California. Having grown up in an aviation family, the two boys bought an old Piper Cub, restored it themselves, and set out on the grand journey. Buck is a great storyteller, and once you get airborne with the boys you find yourself absorbed in a story of adventure and family drama. And *Flight of Passage* is also an affecting look back to the summer of 1966, when the times seemed much less cynical and adventures much more enjoyable.

How to Be Fine - Jolenta Greenberg 2020-03-17

A humorous and insightful look into what advice works, what doesn't, and what it means to transform yourself, by the co-hosts of the popular *By the Book* podcast. In each episode of their podcast *By the Book*, Jolenta Greenberg and Kristen Meinzer take a deep dive into a different

self-help book, following its specific instructions, rules, and advice to the letter. From diet and productivity to decorating to social interactions, they try it all, record themselves along the way, then share what they've learned with their devoted and growing audience of fans who tune in. In *How to Be Fine*, Jolenta and Kristen synthesize the lessons and insights they've learned and share their experiences with everyone. *How to Be Fine* is a thoughtful look at the books and practices that have worked, real talk on those that didn't, and a list of philosophies they want to see explored in-depth. The topics they cover include: Getting off your device Engaging in positive self-talk Downsizing Admitting you're a liar Meditation Going outside Getting in touch with your emotions Seeing a therapist Before they began their podcast, Jolenta wanted to believe the promises of self-help books, while Kristen was very much the skeptic. They embraced their differences of opinion, hoping they'd be good for laughs and downloads. But in the years since launching the *By the Book*, they've come to realize their show is about much more than humor. In fact, reading and following each book's advice has actually changed and improved their lives. Thanks to the show, Kristen penned the Amish romance novel she'd always joked about writing, traveled back to her past lives, and she broached some difficult conversations with her husband about their marriage. Jolenta finally memorized her husband's phone number, began tracking her finances, and fell in love with cutting

clutter. Part memoir, part prescriptive handbook, this honest, funny, and heartfelt guide is like a warm soul-baring conversation with your closest and smartest friends.

Flight 232 - Laurence Gonzales 2015-07-07

"A richly detailed story that is equal parts heartbreaking, inspiring...and full of fascinating science...masterful." —San Francisco Chronicle As hundreds of rescue workers waited on the ground, United Airlines Flight 232 wallowed drunkenly over the bluffs northwest of Sioux City. The plane slammed onto the runway and burst into a vast fireball. The rescuers didn't move at first: nobody could possibly survive that crash. And then people began emerging from the summer corn that lined the runways. Miraculously, 184 of 296 passengers lived. No one has ever attempted the complete reconstruction of a crash of this magnitude. Drawing on interviews with hundreds of survivors, crew, and airport and rescue personnel, Laurence Gonzales, a commercial pilot himself, captures, minute by minute, the harrowing journey of pilots flying a plane with no controls and flight attendants keeping their calm in the face of certain death. He plumbs the hearts and minds of passengers as they pray, bargain with God, plot their strategies for survival, and sacrifice themselves to save others. Ultimately he takes us, step by step, through the gripping scientific detective work in super-secret labs to dive into the heart of a flaw smaller than a grain of rice that shows what brought the aircraft down. An unforgettable drama of the triumph of heroism over tragedy and human ingenuity over technological breakdown, *Flight 232* is a masterpiece in the tradition of the greatest aviation stories ever told.

Lovelock - Orson Scott Card 2001-02-10

Bestselling author Orson Scott Card teams up with the talented Kathryn H. Kidd to create a startling look at the ethics of bioengineering. *Lovelock* is a capuchin monkey engineered to be the perfect servant--intelligent,

agile, pliant, and devoted to his owner. He is a Witness--privileged to spend his days and nights observing the life of one of Earth's most brilliant scientists through digital recording devices behind his eyes. In his heart is the desire to please, not just to avoid the pain his owner can inflict with a word, but because he loves her. Lovelock is on a voyage he did not choose. What human would consider the feelings of a capuchin monkey, no matter how enhanced? But Lovelock is something special among Witnesses--he's a little smarter than most humans; smart enough to break through some of his conditioning. Smart enough to feel the bonds of slavery, and want freedom. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The Haywire Heart - Christopher J. Case 2017-01-05

Too much exercise can kill you. The Haywire Heart is the first book to

examine heart conditions in athletes. Intended for anyone who competes in endurance sports like cycling, triathlon, running races of all distances, and cross-country skiing, The Haywire Heart presents the evidence that going too hard or too long can damage your heart forever. You'll find what to watch out for, what to do about it, and how to protect your heart so you can enjoy the sports you love for years to come. The Haywire Heart shares the developing research into a group of conditions known as "athlete's heart", starting with a wide-ranging look at the warning signs, symptoms, and how to recognize your potential risk. Leading cardiac electrophysiologist and masters athlete Dr. John Mandrola explores the prevention and treatment of heart conditions in athletes like arrhythmia, atrial fibrillation and flutter, tachycardia, hypertrophy, and coronary artery disease. He reviews new research about exercise intensity and duration, recovery, inflammation and calcification, and the ways athletes inflict lasting harm. These heart problems are appearing with alarming frequency among masters athletes who are pushing their bodies harder than ever in the hope that exercise will keep them healthy and strong into their senior years. The book is complete with gripping case studies of elite and age-group athletes from journalist Chris Case—like the scary condition that nearly killed cyclist and coauthor Lennard Zinn—and includes a frank discussion of exercise addiction and the mental habits that prevent athletes from seeking medical help when they need it. Dr. Mandrola explains why many doctors misdiagnose heart conditions in athletes and offers an invaluable guide on how to talk with your doctor about your condition and its proven treatments. He covers known heart irritants, training and rest modifications, effective medicines, and safe supplements that can reduce the likelihood of heart damage from exercise. Heart conditions affect hardcore athletes as well as those who take up sports seeking better health and weight loss. The Haywire Heart is a groundbreaking and critically important guide to heart care for athletes. By protecting your heart now and watching for the warning signs, you can avoid crippling heart conditions and continue to exercise and compete for years to come.

[Social Work in Europe](#) - Charlotte Williams 2013-09-13

It is an acknowledged if not accepted fact that all European societies are being fundamentally transformed, and indeed perceptively unsettled, by increased migrations across nations and by the asserted presence of established minorities within their borders. The scale and speed at which these transformations have taken place have brought in their wake considerable social impacts and no small measure of fear and anxiety. Encounters with such diversity are part and parcel of the social work task, and learning how to negotiate them should be a de facto aspect of the training and continuous professional development of social workers and other social professions. However, the moral and political dimensions of the role, scope and nature of the social work task in responding appropriately to these changed and changing realities are rather more contested. This volume addresses many dimensions of the response to issues of race and ethnicity in social work practice in Europe. It extends the debates on inter-cultural and race equality practice in social work through a stimulating and innovative collection of contributions. This book was originally published as a special issue of the European Journal of Social Work.

[The Invention of Yesterday](#) - Tamim Ansary 2019-10-01

From language to culture to cultural collision: the story of how humans

invented history, from the Stone Age to the Virtual Age Traveling across millennia, weaving the experiences and world views of cultures both extinct and extant, *The Invention of Yesterday* shows that the engine of history is not so much heroic (battles won), geographic (farmers thrive), or anthropogenic (humans change the planet) as it is narrative. Many thousands of years ago, when we existed only as countless small autonomous bands of hunter-gatherers widely distributed through the wilderness, we began inventing stories--to organize for survival, to find purpose and meaning, to explain the unfathomable. Ultimately these became the basis for empires, civilizations, and cultures. And when various narratives began to collide and overlap, the encounters produced everything from confusion, chaos, and war to cultural efflorescence, religious awakenings, and intellectual breakthroughs. Through vivid stories studded with insights, Tamim Ansary illuminates the world-historical consequences of the unique human capacity to invent and communicate abstract ideas. In doing so, he also explains our ever-more-intertwined present: the narratives now shaping us, the reasons we still battle one another, and the future we may yet create.
